PREFACE.

-65450-

THERE never was a time in the history of civilized man, when the desire of truth for its own sake was more evident in all departments of intellectual activity than it is at the present day. And this desire does not seem to be hindered, much less arrested, by the pressure of practical business, which has developed beyond all bounds in the modern world; nor even by that determined pursuit of the prizes of life which is so marked a characteristic of the times in which we live. Nobody, not even the professed pleasure-seeker, is any longer satisfied with the mere allegation of authority in matters of belief. Everybody who reflects at all, and many a one who does nothing worthy of the name of reflection, demands the reason of things propounded for his assent and acceptance. An impatience of mere assertion, an irreconcileable discontent with traditional statements and formulas, is the very atmosphere of our generation. Men want to justify their beliefs, as well as to be justified by them.

Like all other sciences, history has undergone a complete revolution in our day. Masters of style, no doubt, occasionally produce brilliant romances which they dignify as "histories"; but the public is too sensitive to the importance of facts to be long misled by the superficial charm of style. Novelty, eloquence, imagination, count for little or nothing, when the demand is for truth and correspondence with reality. And however passionately some may desire that it might not be so, Sacred History—the history of religious institutions, ideas, literatures, in connexion with that of the

peoples among whom they originated—is so far from being exempt from the influence of these modern demands and tendencies, that it is precisely in this field of inquiry that men are most anxious to bring their opinions into harmony with fact.

The present work is the fruit of an honest endeavour to furnish Bible students who are not versed in the languages of the ancient East, with some of the chief results of recent Oriental research and discovery, so far as these are calculated to throw light on the text and meaning of Scripture. I have not approached my subject, nor handled my material, after the fashion of a professional Apologist. It has not been my direct aim to "confirm the Scriptures" by showing that they are in absolute agreement with all the available contemporary evidence. I do not believe that the Hebrew Scriptures stand in need of either apology or confirmation. My purpose has rather been to lead my readers to the right point of view for understanding them. At the same time, the documents here brought forward afford ample proof of the general trustworthiness of Israelitish history, so far as it is the work of writers who lived in or near to the times which they describe. And even when that is not the case, Hebrew tradition gains a relative justification, sufficient to satisfy all reasonable minds, by the demonstration that it is not due to the idle imaginings of ignorant and prejudiced priests and popular story-tellers; a demonstration which is effected by tracing it to its origin in more ancient Semitic legend, or by comparing it with the parallel accounts of the older and more or less kindred races. I might enlarge on this theme; but a glance at the Table of Contents or at the Index of Subjects will do more than pages of introduction towards enabling the reader to form a conception of the range and variety of interesting and relevant matters which are discussed with more or less completeness in this volume, from the "Babylonian Epic of Creation" to those few but

PREFACE. ix

important Phœnician inscriptions which offer so many striking parallels to the religious ideas and practices of ancient Israel. I sincerely envy those readers to whom these illustrations of the Bible, derived from earlier and contemporary sources, will come invested with all the charm of the novel and the unexpected. They will find the sacred writings with which they are familiar acquiring fresh force, significance, and value, by comparison and contrast with the literary remains and monumental records of the great empires and peoples which so powerfully affected the fortunes of Israel. Their Old Testament will become to them a new Testament in the light of Oriental Archæology.

It is hoped that the number of cuneiform and other texts with translations, and the accurate reproductions of hundreds of Babylonian, Egyptian, Assyrian, North Syrian, and Phœnician antiquities, here brought together for the first time within the compass of a handy volume, may recommend the book to scholars and teachers as well as to the intelligent student of our English Bible.

To my old and valued friend, Mr. W. H. RYLANDS, F.S.A., my warmest acknowledgments are due for the untiring interest he has taken in the progress of the work, and for the material assistance he has given in connexion with its pictorial illustration.

MESOPOTAMIAN DOCUMENTS WHICH ILLUSTRATE GENESIS.

Babylonian Epic of Creation.

THE Assyrian Creation Tablets were found by the late George Smith at Kuyunjik, on the site of the ancient Nineveh, in a chamber of the ruined

palace of Assur-bani-pal, king of **Assyria**, B.C. 668–626. Their contents, however, are not of Assyrian origin, the tablets having been copied from Babylonian originals for Assur-bani-pal's library (see page 200). As duplicate copies of portions of them have been found in the ruined temples of Borsippa and Sippara,

FRAGMENT OF THE FIRST TABLET OF THE CREATION SERIES.

we may reasonably suppose the composition of the series to be at least as early as the great literary period B.C. 2200-1800, when the Deluge and other stories seem to have been first committed to writing.

There appear to have been seven tablets in the series, but very little is left of several of them. The following is a translation of the principal fragments (cf. Professor Delitzsch's recent German edition):—

TABLET I.

THE BIRTH OF THE GODS FROM APSÛ AND TIÂMAT (OCEAN AND THE DEEP), BEFORE THE CREATION OF HEAVEN AND EARTH—TIÂMAT PLOTS TO DESTROY HER DIVINE OFFSPRING—SOME OF THE GODS RALLY TO HER SIDE—SHE PREPARES FOR THE CONFLICT BY CREATING ELEVEN KINDS OF MONSTERS OF THE DEEP, AND APPOINTING KINGU LEADER OF HER HOST.

```
Cf. Gen. 1. 6, 8. When aloft Heaven existed not,

Gen. 1. 9, 10. When Earth below had yet no being;

But eldest Ocean, the Sower of them (i.e. of the gods),

Gen. 1. 2. And the dark (?)* Deep, who was to bear them all,—

The waters of these mingled in union, and

No fields † were embanked, no islands (or marshes) were seen;

When the gods had not come forth, not one,

When they neither had being, nor [settled] destinies:

Then were born the [eldest] gods—

Io Lachmu ‡ and Lachamu came forth [together].

The ages multiplied . . . . .

Gen. 2. 1. Anshar § [and] Kishar were born [together?]

Long time they lived . . . . .

Anu . . . . . . . . . . . .
```

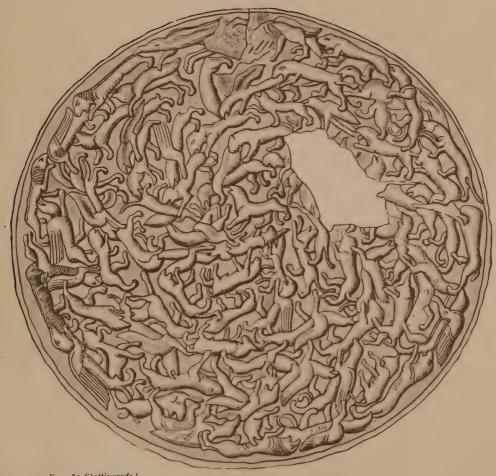

From this point, l. 15 to l. 115, only a few half-lines are preserved. But in l. 38 sqq. Apsû and Tiâmat appear as taking counsel together against the great gods, their offspring. Apsû declares "Their way shall

^{*} Mummu, if of Sumerian origin, as is probable, may be compared with Chinese mung, eldest, chief; or better, perhaps, with ming, dark, as in ming hai, the dark (i.e. deep) sea. Apsû and Tiâmat are prototypes of Homer's Okeanos and Tethys, as the original parents of all things, even of the gods. The name Tethys may perhaps be related to Tiâmat-Tiâwat, and that of the sea-god Poseidas-Poseidon to Apsû, while Okeanos may have some connexion with Kingu (l. 126).

[†] The Sumerian GE-BARA, black stretch, refers to the colour of the soil.

[†] The Sumerian god Lagh-ma (Lamma?) and his wife Lagha-ma are probably dragon-deities. We may perhaps compare with Lagh the second element in She-ragh, a serpent-god, and Chinese lung, dragon. Among the monsters created by Tiâmat (page 3 infr.) are Lachami or dragons; and Nabonidus set up Lachmu's at the doors of the temple of Harran. The meaning of the characters Lag-ma may be either "Terror-clad," or "Terror-making," or "Terror-being."

[§] Anshar and Kishar are personifications of "The Host of Heaven" and "The Host of Earth" (Sumerian an, heaven; ki, earth; shar, host).

be destroyed," and "A cry of woe shall be made"; while Tiāmat says (l. 50) "Let their way be made hard" or "painful!" Then l. 55 sq. we read:—

Ocean [rejoiced] at her; his face became bright: Evil they plotted against the [great] gods.

Although the lines which related the grounds of Tiâmat's enmity against the great gods are unhappily lost, it was evidently founded on a foreboding that they were destined to supplant their parents and dethrone them from the position of sole supremacy; just as the elder gods of the Greek mythology are dethroned by their own mightier progeny. The old mythmakers perceived that the new world is but the old one under new forms. They suggest the intimate connexion between the successive states of existence by the very natural metaphor of generation. On the other hand, the changes incident to the evolution of the Cosmos are symbolised by the strife which arises in the family of the gods. Variation is figured by variance, differentiation by difference; and the process of creation becomes a warfare of elemental powers. APSÛ and TIÂMAT with their divine following are opposed to their kindred Lachmu and Lachamu, Anshar and Kishar, Anu, Bel and Ia, IA'S SON MERODACH, the god of light, BIL-GI or GI-BIL, the god of fire, and the IGIGI or spirits of heaven.

After the great gap between lines 56 and 106 the narrative, as restored from Tablets II. and III., continues thus:—

· All the gods (i.e. of her party) turned unto her;

Cf. Rev. 12. 3-9. They cut themselves off (?), and to Tiâmat's side went over.

They sulk, they plot restlessly, night and day.

Challenging conflict, they chafe, they rage;

110 They muster and prepare battle.

The Mother of the Depth, the Maker of All,

Cf. Gen. 1. 21. Added matchless instruments, bringing forth monster-snakes:

Heb. tannînîm. Sharpfanged were they, unsparing of attack;

With venom for blood their body she filled.

115 Raging pythons with terrors she clothed;

With awful brightness she robed them, overwhelming from above :

"Whoso seeth them, let trembling overcome him!

Let their bodies rear up, and none repel their breasts!"

She posted vipers, basilisks, and dragons;

120 Giant asps,* furious hounds, scorpion-men;

Fierce white-snakes,* fish-men, and chimaeras;

^{*} With Assyr. Amu cf. Arab. aimun, plur. uyûm, a long white and specially venomous serpent. Here, of course, a mythical serpent is intended, as in the other instances. The ideogram naturally came to be used in the sense of storm-demon, storm, because storm-clouds were mythologically conceived as serpents (Job 26. 13, Heb.).

Bearing ruthless weapons, fearless of battle:

Strict were her orders, not to be gainsaid.

Mighty the eleven (kinds of monsters) as a storm (?) she made.

125 Among the gods her firstborn who made her a muster,

She exalted KINGU in their midst—him she made great:

The leading of the van, the command of all,

The first lifting of weapons, the stirring up of the fray,

Mastery in conflict, winning of victory,

130 She entrusted to his hand, she seated him on a cushion.

"I have uttered a spell for thee, in the assembly of the gods I have magnified thee,

The rule of all the gods have I delivered unto thee!

Thou shalt be great, thou, my sole (or chosen) spouse!

Let them magnify thy name over all regions!"

135 She gave him the Tablets of Destiny, she put them in his bosom:

"Thy word be not made void, that which goeth forth from thy mouth be established!"

Cf. Isa. 14. 13. When Kingu was exalted, having received godhead (or supremacy),

Among the gods her children he gave decrees:

"Make up your mouth, let it still the Fire-god!

140 The highest in valour shall become great in power!"

TABLET II.

TIÂMAT'S DOINGS ARE REPORTED TO ANSHAR—HE SENDS AND FIRST, AND THEN IA (NUDIMMUD), TO APPEASE HER, BUT BOTH RETURN WITHOUT SUCCESS—ANSHAR THEN APPLIES TO MERODACH, WHO UNDERTAKES TO QUELL TIÂMAT, ON THE CONDITION THAT THE GODS RECOGNIZE HIM AS THEIR LORD.

The opening lines are lost. They probably repeated the account of the creation of the monsters by Tiâmat (Tab. I. III-I22), though in what precise connexion is not clear. Then followed, as before, the story of Kingu's exaltation (Tab. I. I25-I40). It is not necessary to exhibit here the more than Homeric repetitions of the Babylonian epic. It would seem that some messenger has reported to Anshar these doings of Tiâmat, whereupon

27 [Of Anshar the soul] was mightily troubled; [His loins he smote and his li]p he bit; his mind was agitated; 30 he uttered a painful cry.

After a considerable gap in the narrative, we find Anshar bidding his son Anu undertake the reduction of Tlâmat:—

66 [To Anu] his son [a word] he speaks:
"............... mighty one, champion,
Whose powers are great, whose onset resistless!
[Go,] and before Tiâmat take thy stand;

70 Let her temper [be soothed,] her heart relieved!

[If she be stubborn and] hearken not to thy speech,

Address her with [a spell,] and she will be appeased!"

[Anu heard] the words of his father Anshar,

[Took the straight ro]ad to her, and followed the way to her.

75 Anu [went,] the grinning (?) of Tiâmat he saw; [Anu was dismayed and] turned back again.

ANU returns to his father Anshar, and tells him how he has sped; but his words are lost. There is a complete gap of 24 lines, and only the closing syllables of the next twenty-five are preserved; but it is inferred from Tab. III. 54 that Anshar next applied to the god Nudimmud (Ia) with like ill success. Then this very fragmentary Tablet closes with a reply of Merodach to his "father," *i.e.*, grandfather, Anshar, who seems to have tempted him to the perilous enterprise with offers of high distinction.

[Merodach heard] the speech of his father;

130 His heart [ex]ulted, and to his father he saith: "Lord(?) of the gods, Arbiter of the great gods! If I, as your avenger, Quell Tiâmat and preserve your lives, Hold the assembly, declare my lot supreme!

135 In Ub-shu-ukkin * all together joyfully take your seats;
Framing my mouth, instead of you, I will pronounce dooms!
Whatever I do, let it not be changed;
Let the word of my lip return not, nor be made void!"

THE GOD AŠŠUR: (Cf. pages 31, 32, 85, 98, 227.)

^{*} The Sumerian name of the place where the gods meet at New Year, in order to "pronounce dooms" or determine destinies. It means World-gathering, Universal Assembly, or the like, and should, perhaps, be read ub-shugin, as the symbol ukkin had also the value kin or gin, and shu-gin resembles shu-nigin, napharu, "assemblage," "total," and gin was used in the sense of gimru, "all" (Brünnow, 2388). Ub, "region," for which we also find ib, is the Chinese ip, yip, i, "district"; shu, "hand," = Chinese sheu, "hand"; gin = Chinese k'iün, "concourse," "all," k'ün, "to collect in crowds" (P.S.B.A. Feb. 1890, page 207).

TABLET III.

Anshar Sends Gaga to Lachmu and Lachamu to Rehearse the

Story of Tiâmat's Plot, and to Propose a Banquet of the Gods, at which they shall be Induced to Resign their Prerogatives to Merodach—The Banquet is Held, and Succeeds.

[Anshar] his [mouth] made up, and [To Gaga] his [minister] a word he speaks: "[Go, Gaga, minis]ter that gladdeneth my soul!

[To Lachmu and Lach]amu will I send thee,

Ply the tongue, sit at the banquet, [Eat bread, prepare sesame-wine,

IO [To Merodach,] their [aven]ger, decree the lot!

[Go, Gaga,] stand before them, and [All that I sa]y to thee, rehearse to them as followeth:

Anshar, your son, hath sent me; He hath made me apprehend his will as followeth:

15 Tiâmat, our parent, hateth us; She hath made a muster, and raged wrathfully:

All the gods (*i.e.* of her party) turned unto her:

With those whom ye created, to her side they are gone."

The next thirty-four lines, relating the creation of the eleven kinds of monsters and the exaltation of Kingu, are identical with Tab. I. 106-140. Anshar then continues his message in these terms:

FRAGMENT OF THE THIRD TABLET.

"I sent Anu; he durst not encounter her; Nudimmud was dismayed, and turned back again.

55 Merodach came forward, the Sage of the gods, your son; To encounter Tiâmat his heart urged him to set forward. Framing his mouth, he saith to me: If I, as your avenger,

Quell Tiâmat and preserve your lives,

60 Hold the Assembly, declare my lot supreme!
In UB-SHU-UKKIN all together joyfully take your seats, and
Framing my mouth, instead of you, I will pronounce dooms!
Whatever I do, let it not be changed;
Let the word of my lip return not, nor be made void!

65 Make haste! your prerogative quickly assign him! Let him go to encounter your strong enemy!"

Gaga went, pursued his way, and Reverently to Lachmu and Lachamu, the gods his parents, Did obeisance, and kissed the ground beneath them;

70 He fell down, rose, and spake to them: "Anshar, your son, hath sent me;"

Etc., etc., repeating word for word the message of Anshar (52 lines). The poem then continues (l. 125):—

125 Lachmu (and) Lachamu heard, they started up (izzizu?);
The IGIGI, all of them, lamented grievously:
"What is altered, so that they have taken offence (?)?
We know not, we, Tiâmat's pûrpose (?)."
They crowded together and went—

The great gods, all of them, the arbiters of destiny—
They went in before Anshar, they filled [the hall?]:
They jostled one another in the assembly
They plied the tongue, they [sate] at the banquet;
Bread they ate, they prepared the [sesame-wine].

The sweet liquor altered their [sense];
They were drunken with drinking, swollen in body;
Greatly bewildered, their [cry?] went up;
To Merodach, their avenger, they assigned their prerogatives.

THE GODS EXALT MERODACH TO BE SUPREME OVER ALL—THE TEST OF HIS OMNIPOTENCE—"HE SPAKE, AND IT WAS DONE"—THE ARMING OF MERODACH—THE ENCOUNTER—TIÂMAT SLAIN, AND HER FORCES VANQUISHED—HER CARCASE DIVIDED—THE BUILDING OF HEAVEN.

They prepared him a chamber of state;

To receive his fathers (i.e. the elder gods) for counsel he settled therein:

Ex. 15. 11. "Thou," they cried, "art glorious among the great gods;

25 He spake with his mouth—the garment perished;
    He spake to it again, and the garment was made.
   When the gods, his fathers, saw what had come forth from his mouth,
   They rejoiced, they did homage: "Merodach is king!"
   They gave him sceptre, throne, and crown;

TABLET V.

CREATION OF THE HEAVENLY BODIES—INSTITUTION OF THE YEAR AND ITS DIVISIONS.

There is no break between the Fourth and Fifth Tablets. The latter tells of the creation of the stars as the "stations" or posts of "the great gods"; the institution of the year with its twelve months, each in connexion with three presiding stars (of the Zodiac; see Diodorus Siculus, 2.30); the arrangements made for preventing any star from wandering from its appointed place (cf. Jude 6, 13; Isa. 24. 21 sqq.; 40. 26); and the making of the moon, and assignment of its functions of distinguishing

The station of Bel and Ia he established with him.

Then opened he great doors (i.e. in heaven) on both sides;

The remaining lines are too broken and too difficult for connected translation. What else the Tablet related, after the account of the celestial arrangements, we do not know. Zimmern supposes that it went on to tell of the creation of dry land and sea, and perhaps also of vegetation. Delitzsch gives a fragment, which may have belonged to the Fifth Tablet, and which seems to say that Anu exhibited the net and the bow of the victor Merodach to the assembled gods; after which the bow was placed in the sky (cf. Gen. 9. 13).

SEMITIC BABYLONIAN SEAL OF HALI..., SON OF PASHKÎA, SERVANT OF THE GOD RIMMON.

^{*} This seems to be a loan from the Sumerian, in which LU is the common ideogram for sheep, flock, and MASH may mean bright, pure, shining. The stars are well calle a shining flock: see Tablet VII., Reverse, 1. 7, 8.

TABLET VI.

There are no certain, but some possible, remains of Tablet VI. The sole exception is the latter half of the first line, which is quoted as catchword of the next Tablet at the close of Tablet V.(.... of the gods when he heard). An interesting fragment, published in Delitzsch's Lesestücke, may perhaps have belonged to another cycle of Creation Legends. Gunkel and Zimmern give it very doubtfully as the Seventh Tablet of the present series, adding in a note that the attribution is highly precarious. Delitzsch declares that both the form and the contents of the fragment prove that it does not belong to our Epic. It may be thus translated:—

```
Gen. 1. 7, 8; 26, When the gods in their assembly (or in a body) had created
   Let us make.
                     [heaven?], and

                 They caused [all] the living creatures to come forth,—
 Gen. 1. 24, 25.
                 The cattle of the field, the [wild beasts] of the field, and the creep-
                     ing things [of the field].
. . . . . . to the living creatures . . . . . .
 . . . . . and with creeping (i.e. moving) things the city they fill[ed] . . . . . . .
"..... all the moving things, the whole of the creatures ......
                  ..... which in my entire family [are seen?]....."
 Gen. 1. 27, 28. [Then made] NIN-IGI-AZAG (i.e. Ia) two litt[le] . . . .
                 [Among the wh]ole of the moving things he made (them)
                      mighty.
```

The last two lines perhaps refer to the creation of the first human pair, so that their broken state is particularly tantalising. On this subject, as indeed on that of Creation in general, the Babylonians appear to have possessed various mythical accounts; but in what is probably the closing Tablet of the present series the creation of man is distinctly ascribed to Ia's son Merodach.

Delitzsch, who thinks that the Sixth Tablet must have treated of the creation of the earth, of the gathering together of the waters of Ocean $(Aps\hat{u})$ and the formation of the dry land, of the clothing of the ground with plants and trees (cf. Gen. 1. 9–12), and of making the water, air, and

earth alive with all sorts of animals (cf. Gen. 1. 20–25), has transcribed the scanty but precious remains of a much-injured fragment, which may have belonged to Tablet VI., or at least to the series. It mentions the naqbu, the hole or well, i.e. the abyss of the waters under the earth (cf. Gen. 49. 25; Exod. 20. 4); and the nachirê, or larger marine animals, such as seals and porpoises; after which it states that the Creator "heaped up" something, probably a dyke or barrier against the sea (cf. Job 38. 8–11). The next line mentions the "springs" (namba'ê), perhaps "the springs of the sea" (Job 38. 16). On the reverse side we read:—

Anshar making up his mouth speaketh, unto L[achmu he saith]:
25 "Above Ocean, [Nudimmud's] dwelling,
Over against Isharra which I builded . .
The places below [I] made fast (or solid) . . .
I will make a house; it shall be the dwelling of . . .
Within it let him firmly found his hold! . . ."

There can be little doubt that the founding of the earth "upon the seas" (Ps. 24. 2; 2 Pet. 3. 5) and facing heaven (Isharra), to be the home of man and the seat of his protecting deities, was the subject of these broken and partially obscure verses (cf. the last six lines of Tablet IV.). The "house," which is to be the dwelling-place of some god, or, perhaps, of mankind, may denote the ground or dry land itself, just as heaven is called a "great house" (IV. 144 sq.).—The tablet goes on to mention the institution of holy days (nubatta; cf. Gen. 2. 3), the "houses" or temples "of the great gods," and even the ancient cities of Nippur and Ashshur, which are thus made coeval with creation. The service of the gods in their chosen cities and sanctuaries appears to have been regarded as the ultimate reason for the origin of man and his world. In the Book of Genesis also, the building of cities (4. 17) and the formal worship of Jehovah (4. 26) begin soon after creation, in the lifetime of the first man. Quite naturally, therefore, a broken tablet of precepts concerning man's duties towards the gods and his fellows may be supposed to have followed next in the series, as the continuation or conclusion of Tablet VI.

It is deplorable that a document, so deeply interesting from the point of view of universal morality, should have suffered so much in transmission. But enough remains to prove, if other proof were wanting, that religion and morality were bound up together in the consciousness of the old Semitic population of **Assyria** and Babylonia, and in that of the Sumerians before them.

TABLET VII. (?)

"And God saw everything that He had made, and, behold, it was very good."
—Gen. 1. 31.

What is generally assumed to be the closing Tablet of this Epic of Creation, though not free from serious fractures on both sides, especially at the beginning and the end, is upon the whole better preserved than most of those which precede it. The subject is the acclamations with which **Merodach** was greeted by the assembly of the gods (cf. Job 38.7; Isa. 14. 13), after his conquest of Tiâmat and subsequent creative labours. He is hailed by all his titles of honour, and men are repeatedly called upon to remember his mighty works and to glorify him. (With the fifty names of Merodach cf. the ninety-nine names of Allah.)

- * I restore Dingir zi ukkin ina II-e imbû napšat naphar ilâni rabûti. The Sumerian expression Dingir zi uk-kin, or rather, in the present instance, Dingir zi kin, means God of the life of all (or, of the world): cf. Num. 16. 22. The term uk-kin, kin, all, whole, all together, is akin to the Chinese kung, all; kun, flock, concourse; much as kin, work, is to kung, work, or gin, to close, to kung in the same sense. Another Babylonian Account of the Creation.

THE Book of Genesis, as is well known, opens with two distinct and apparently independent accounts of the Creation (I. 1-2. 4a and 2. 4b-25). It is, therefore, a fact of the highest interest that the Babylonians also possessed two accounts, differing so greatly from each other as the two before us. This second Babylonian Cosmogony, brief and bald as it is in comparison with the one already considered, yet presents many points of contact with both of the Biblical narratives. It occupies a small but clearly-written terra-cotta tablet, which was unearthed by Mr. Rassam at Abû Habbah (Sippara) in 1882. Its comparative antiquity is suggested by the bald brevity and artless monotony of the style; by the fact that it is bilingual, being written in Sumerian, the primitive speech of Shinar (Shumer) or Southern Babylonia, with the addition of a Semitic Babylonian translation inserted in smaller characters between the halves of the Sumerian lines; and by the further fact that it is preserved as a sort of hymn prescribed for recitation in the ritual of some special service, apparently held in the temple of E-Zidda at Borsippa, as indicated by the remains of the inscription on the reverse side of the tablet.

^{*} The religious intention of the entire poem is well shown by the hortatory epilogue with which it closes. The author's aim is not private and personal; but, like the sacred writers of Israel, he is simply anxious that king and people should be duly instructed in the great works of their God, so that, by honouring him aright, they may retain his favour and escape his

```

It will be noticed that the founding of the primeval holy cities of Nippur (Niffer), **Erech** (Warka), Eridu (....), and **Babylon** (Bâbil), with their respective temples, is put in the forefront of this ancient mythical poem. The sanctuaries and service of the gods are the final purpose

^{*} The abyss of waters under the earth, whence springs and rivers flow.

[†] King of the pure Abode: i.e. the god Ia.

[‡] The Anunnaki were angels or spirits of "The Great Water" (Sumerian A.NUN) underground, the watery abyss whence the springs and rivers flow.

of Merodach's creative activity. Nippur was the sacred city of Illil or Bel, the father of the gods and lord of the habitable world; **Erech** of Anu, the god of heaven; Eridu of Ai or Ia, the god of deep wisdom, who dwelt in the abyss of waters under the earth; and **Babylon** of Ia's son Merodach, the creative and life-giving god. The goddess Aruru, who, according to the piece before us, assists Merodach in the creation of man, is elsewhere called *Lady of the gods of Sippar and Aruru*, and appears to have been the local deity of a town Aruru, which, like the town of Agadè, or **Accad**, became in the course of time a mere suburb of Sippara. In the Epic of Nimrod (VIII. 34) she

SEAL OF A PRIEST OR SCRIBE, Who calls himself arad abînû shamshi, "the servant of our Father the Sun."

creates Ia-bânî, the satyr-like companion of Gilgamesh, by nipping off a bit of clay and moulding it (cf. Gen. 2. 7; Job 33. 6; Isa. 64. 8). The obscure statement, l. 21, that Aruru made seed (or the seed) of mankind "along with" Merodach, or with his help and cooperation, reminds us of the no less obscure exclamation of **Eve**, "I have formed

a man along with Jehovah," Gen. 4. I (Assyr. itti = Heb. 'ēth).

The poem seems to open rather abruptly, unless we suppose that "the pure house, the house of the gods" (ll. 1, 9), may denote the inhabited world as known at the time of its composition—that is to say, Babylonia, or the valley of the **Euphrates** and Tigris (see the Ancient Map, page 23). Compare l. 10. But possibly the reference is to Eridu, the earliest and holiest city of **Shinar**, whose site was on the coast of the Persian Gulf at the mouth of the Four Rivers, and perhaps on an island close to the shore. Eridu, the earthly Paradise, might well be called preeminently the pure or holy house or home of the gods. It is the first thing made when there is an "off-flow," "out-flow," or ebb of the sea from the site of it (ll. 11, 12). E-SAG-ILLA, House of the High Head (or top), is Ia's temple there, as E-SAG-ILLA at **Babylon** is the temple of his son Merodach; and the name recalls the tower whose top was to reach "unto heaven" (Gen. 11. 4).

Lines 17, 18 may relate the origin of the reedy marshes at the southern extremity of Babylonia, though some think that they describe the creation of the dry land.

The word rendered "animals," l. 5, is of the greatest interest to the Biblical student. The Sumerian **A-dam** is literally "side-spouse," and seems, therefore, to denote all creatures which exist in pairs, or as male and female; so that it may be used of the entire animal creation, both brute and human. The meaning of the Sumerian term thus explains the story of the origin of woman (Gen. 2. 21 sq.), and accounts for the curious expression, "called their name Adam" (Gen. 5. 2). [The Assyrian equivalent, namaššû, seems to mean things that move or creep about, being derived from a root, namâšu, which looks like a cognate form of the Hebrew ramas, to creep (Gen. 1. 21 sqq.). I read the verb in the Assyrian version of 1. 5 as naššu = nanšu = namšu].

Ancient Babylonian Map of the World.

(7th or 8th cent. B.C.)

This unique document is a tablet of dark-brown clay, unhappily very much injured. The two large concentric circles represent the Ocean-stream, which, according to the ideas of antiquity, surrounded the earth (see Homer and Hesiod. Herodotus was the first to doubt the theory:

FRAGMENT OF TABLET WITH A
PLAN OF BABYLON,
Showing the district called Tuva, and the Great
Gate of the Sun-god.

ii. 23). The cuneiform writing between these circles reads: Nâr Marratim, "The Bitter (or Briny) Flood."

Each of the triangular projections from the outer circle, of which there seem to have been seven when the tablet was intact, is vaguely marked as a "district" or "region" (Haupt: "island"); and on the left side of each, an inscription specifies its exact distance (from the nearer shore, or from Babylonia?). The inscription to the left of the great hole on the top of the outer circle, where one of these triangular projec-

tions once existed, reads: v (?) KAS-BU ina birit, "Five KAS-BU (i.e. six hours) between"; with the strange addition, ashar DINGIR BABAR NU SHI.LAL (= shamshu la innamar), "where the sun is not seen," which reminds us of Homer's Cimmerians (Odyss. II. 14).

The two parallel lines, which run across the ground of the inner circle, represent the river **Euphrates**, and the little rings on each side are the cities of the territory through which it flows. At the top of the right

(i.e. on the left bank of the river), the word shadû, "east," is written. The Euphrates cuts through the great city of DIN.TIR.KI, i.e. Babylon, the larger part of which lies on its left or eastern bank. Below, in the south, the river enters the APPARU or "marshes."

The tablet supplies an excellent illustration of the state of geographical knowledge at the time. Cf. the four rivers of the Babylonian Paradise, mentioned in the closing lines of the legend of the Flood (page 41); and see Professor Haupt's paper, Wo lag das Paradies? in Ueber Land und Meer, No. 15. 1894/95.

Babylonian and Assyrian Seals.

HERODOTUS states that in his day every Babylonian wore a seal (i. 195). This, no doubt, had been the case from time immemorial. And probably no better illustrations of the religious beliefs and ritual of the Old Babylonians and Assyrians are to be found than those afforded by the subjects engraved on the extant cylinder-seals or signets, obscure as many of these remain, owing to our still imperfect acquaintance with the corresponding literature. Statues and sculptures of the oldest period are rare; but we possess a considerable number of these smaller but not less precious relics of the distant past, many of which are as old as the times of Sargon of

CYLINDER WITH GISHTUBARRA AND THE LION.

Accad. Ur-ba'u and Dun-gi of Erech, Gudea of Lagash, and Hammurabi or Amraphel of Shinar (Gen. The specimens given in this work, some of which are published for the first time, range in date from about B.C. 4500 to the close of the Assyrian monarchy (7th cent. B.C.). The usual shape of such

seals is that of a small roller or cylinder, pierced lengthways, and sometimes fitted with a swivel for use. The names of the owners, of their fathers, their gods, and their cities, are sometimes added in the old linear character. (The impressions, as rolled out on wax, are reproduced here.)

The subjects represented are usually those which meet us again on the sculptured walls of temples and palaces. The most prominent among them are scenes from the Epic of Nimrod, which celebrates the exploits of Gishtubarra or Gilgamesh (Nimrod) and his friend Ia-bânî. Ia-bânî is a mythical hero, with human head and bust, but with the horns, ears, and hind-quarters of a bull; and this strange pair may be regarded as the remote archetypes of the better known Herakles and Cheiron or Theseus (see page 25, No. IV.). Another frequent subject, variously modified, is

prayer and sacrifice. As a rule, the gods have the human form; composite figures are confined to subordinate spirits, demigods, cherubic beings, and demons. In this latter respect, the religion of **Mesopotamia** presents a striking contrast to that of **Egypt**.

Sometimes, though rarely, the scene is either a human sacrifice, as Ménant was the first to suggest, or at least a ceremonial symbolically imitating such a rite (page 152, No. III.). Other seals of similar style appear to represent scenes of initiation in religious mysteries, like those of Eleusis or of the Mithraic worship (page 27, No. VI.).

In some archaic specimens, we seem to see the very beginnings of the art of seal-engraving. The small chalcedony cylinder figured on page 27, No. V., shows a sacrificial scene of very primitive execution, in which limbs are indicated by straight lines, joints by round holes (cf. also pages 10, and 25, No. II.). The progress from these rude outlines to the masterly handling of animal forms, exhibited by seals as old as the time of Sargon I., B.C. 3800, is very remarkable (see page 45, No. 2). No later Babylonian or Assyrian work can be compared with these masterpieces of the early Chaldean kingdoms for breadth and freedom of treatment and truth to nature.

Assyrian seals are less common than Babylonian (see pages II, 3I). They are usually made of harder and finer materials, such as onyx and chalcedony. The flounced robe and the cap curving upward in horn-like projections (pages I5, 57), so characteristic of early Babylonian sylinders, are wanting to them. When inscribed, it is in the Assyrian cuneiform; and their subjects are the sacred tree, the winged solar disk, the eagle-headed cherub, and other religious types familiar in the Assyrian sculptures.

In No. I. we have the famous scene of the palm-tree with pendent fruit, towards which two seated figures are each stretching out a hand, while a serpent stands erect behind one of them. George Smith supposed that this might represent the Temptation (Gen. 3), noting, however, that "the two figures seem both to be males" (Chaldean Genesis). Others since have taken the fact for granted, but it is very doubtful; compare No. II., a seal in my own collection, where we see a god or goddess with a stellar symbol before the statue, a priest or king worshipping, and behind him an erect serpent and a naked woman. (Possibly the scene may be explained by the custom mentioned by Herodotus (i. 181 sq.), and the naked female may be Bel's chosen bride. On the other hand, she may be a goddess; as the serpent denotes goddesses in Egyptian hieroglyphs.) In No. III. two

women are gathering dates, and apparently presenting them to a third figure (perhaps a deity, as the crescent moon is seen before it). In the right-hand corner is a cartouche with the name TA-TA.

No. IV. seems to represent Gishdubar (Nimrod) and his friend Ia-bânî in conflict with the lion and the bull; and, on the other side of the defaced inscription, the capture of Ia-bânî (episodes in the Epic of Nimrod).

No. VI., a seal of green jasper in my possession, bears the name of its owner in archaic (linear) characters, viz.:—

GISH.TUG.PI.UD.A.RAURU.MU.SA.(or LIG?),

which in Semitic Babylonian may be read:—

migir Pir-Nunna Ala-mukîsh.

"Ala-mukish, the favourite of (the god?) Pir-Nunna."

It seems to exhibit a religious rite, perhaps a human sacrifice, or a ceremony of initiation.

No. VII. is noticeable for the animal-form, probably representing a demigod or demon.

Assyrian Sacred Trees with Cherubic Figures.

The sacred tree is common to almost all ancient religions. It is found among the Arabs, Phœnicians, Canaanites, Jews (cf. the groves, or rather Asherahs, I Kings 14. 23; 2 Kings 17. 10); among the Hindoos, the Persians, and the Scandinavians. It is therefore natural to find apparent traces of it in the sculptures of Assyria and Babylonia. It appears to have been most prevalent in Assyria during the Middle Empire, B.C. 900–721; and the representations are found at Nimrûd (Calah, Gen. 10. 11), and Khorsâbâd (Dûr-Shargâni, i.e. "Sargon's Castle"), but not at Nineveh.

According to an old bilingual Babylonian hymn in praise of the god Ea or Ia (4 R. 15, 52b, sqq.),

"In Eri-du a dark gish-kin tree grew,
On holy ground it sprang up:
Its appearance was that of gleaming lapis lazuli,
Lying in the deep" (i.e. seen under water).

MALE CHERUBIC FIGURES, KNEELING BEFORE A SACRED TREE.

The rest of the hymn refers to the god, not to the tree as my friend Prof. Sayce supposed (*Hibbert Lectures*, 1887, page 238). It may be rendered thus:

"Ia's way * in Eridu is fraught with abundance;

His abode is the sanctuary of the earth;

His resting-place is the bed of the goddess Bau;

Into the (his) pure House, whose shade spreads abroad like that of a forest,—into it none may enter."

^{*} Probably referring to the procession in which the god's image or ark (Babylonian "ship") was carried along the streets on certain festivals, in order to ensure peace and plenty.

[From the palace of Assur-nāṣir-pal, king of Assyria (B.C. 885–860), at Calah, the modern Nimrûd.] '

The two remaining lines are too defaced for translation.

The GISHKIN was, perhaps, a kind of palm (Chinese k'iung, kwang?), or a conifer (Chinese k'ien?). Black, white, and grey species are mentioned elsewhere. ERI-DU, "Good City," being the principal seat of the worship of Ia, the tree was perhaps sacred as giving oracles by the motion or rustling of its leaves; like the oaks of Dodona, the laurel of Delos (Virgil Æn. 3. 91), and that of Delphi (Hymn to Apollo, 390); cf. 2 Sam. 5. 24. The "Teacher's Oak" or "Terebinth" (A.V. plain of Moreh), Gen. 12. 6; "The Oak of the Diviners" (A.V. plain of Meonenim), Judg. 9. 37; perhaps also Deborah's Palm, and even the Burning Bush, may reflect the same order of ancient ideas. The Arabs still believe the

thorny bushes of the gharqad or box-thorn (a large species of Rhamnus), capable of uttering prophetic words, and regard the samūra, or Egyptian thorn, as sacred.

COMPOSITE CHERUBIC FIGURES AND SACRED TREE.

The trees before us are con-

ventional representations of the palm. On the settlement of the Babylonians in the Plain of **Shinar**, or South Chaldea (Gen. II. 2), they probably found the Plain covered with palms. The character for palm, which was read both gi-shimmar, "shimmar tree," and shanga, "pure," "holy," suggests that the name Shangar (**Shinar**), Shumir, may mean either Palm country or Holy Land. Cf. Deut. 34. 3. According to an Arab proverb, the palm has a hundred uses beneficial to man; and, as regards Babylonia, the inscriptions prove that at an early period it supplied food, both for men and cattle, wood for building, fibre, and many other useful products, whilst its dates yielded wine. The palm was sacred to the pre-Islamic goddess Athtar (i.e. Ishtar or Ashtoreth) among the Arabs, as also among the Phœnicians.

The kind of tree is indicated by the palm buds at the termination of each branch, the "palmettes," which passed into Greek art in the form of the "honeysuckle" ornament.

Female (or Youthful) Cherubic Figures, standing before a Sacred Tree.—In this illustration the symbol held in the hand of each figure perhaps indicates the sex. The tree is, as usual, conventionally treated, and may represent a grove of palms rather than a single tree. The uplifted hand suggests blessing.

All the illustrations are taken from Assyrian sculptured slabs now in the British Museum.

AN ASSYRIAN WINGED HUMAN-HEADED LION, REPRESENTING A GUARDIAN GENIUS OR SPIRIT.

Assyrian Cherubic Figures.

Guardians of Gates and Doorways.—Guardian Genii were not unknown to the Assyrians and Babylonians, although the designation **Cherubim** has not yet been found in the inscriptions. It is, however, probably akin to the Assyrian term $kar\bar{u}b\bar{\iota}$, "the mighty" (cf. Ps. 29. 1). At the doors of the royal palaces and temples were placed winged humanheaded lions and bulls, as also huge serpents. These strange composite figures were known by the name of $sh\bar{e}d\bar{\iota}$ (= Heb. $sh\bar{e}d\hat{\iota}$ m, Deut. 32. 17, A.V. devils), and $lamass\bar{\iota}$, and were placed at the entrance to public buildings

to protect the royal pathway and to repel enemies. So the Cherubim guard the way to the **Tree of Life.** Cf. also the two Cherubim overshadowing the **Ark**, Exod.

25. 18; which were probably winged human figures like those which we see performing similar functions in Egyptian paintings. In Ps. 18. 10; 104. 3, a cherub appears as Jehovah's steed or chariot; *i.e.* the storm-cloud borne onward by the blast. The Cherubim of Ezekiel's vision (Ezek. 1 and 10) seem to combine the principal Assyrian forms in one.

The Scorpion Men.—On this small Assyrian seal, a flaming incense burner stands between the winged human-headed figures, whose composite bodies end in a scorpion's tail curled back ready to sting. Above them is the winged solar disk.

These figures are supposed to represent the "Scorpion Men" described in the Babylonian Epic of Nimrod. There, the scorpionman and his wife keep the gate of the mountain $M\bar{a}shu$, which had to be passed to reach the Abode of the Blessed (cf. Gen. 3. 24).

"Their upper (i.e. human) part reacheth to heaven, and their bosom (i.e. the scorpion body) to the underworld; whose terror is overpowering, and whose look is death (ef. the Greek Gorgon); whose splendour is awful, overthrowing mountains. At sunrise and sunset they watch over the sun."

Eagle-headed Cherubic Figure.—The eagle-headed figures of the Assyrian sculptures have been by many considered to be representations of the god Nisroch (2 Kings 19. 37); but for this identification there is no ground whatever. No such name as Nisroch is known in the inscriptions; and the most tenable explanation is that Nisroch is a textual error, not for Nergal, as some have supposed, because there was a temple of Nergal at Nineveh, but for the well-known Assyrio-Babylonian deity Nusku or Nusku rêû, "The Shepherd Nusku," a title of Ninib. (See Halévy, Journal Asiatique, 1879, page 387.)

The monuments afford us some explanation of what the eagle-headed creatures represented. The Babylonians believed that before the creation of man the world was occupied by a number of composite beings, half men and half animals; and among these, we are told in the so-called Creation Tablet of Cutha, were—

"warriors with bodies of birds of the mountain gorges, men with the faces of birds of the desert."

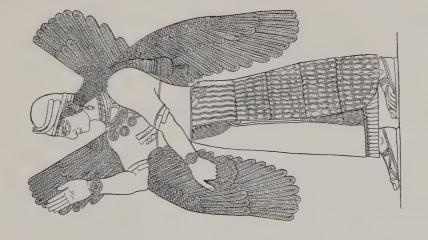

Like other cherubic figures in the sculptures, this one also holds a basket and a palm-spathe (in the act of fertilizing a palm-tree; a process often represented. The Assyrians and Babylonians considered the various arts of husbandry to be of divine origin: cf. Isa. 28. 23–29). Others think of a fir-cone, with which the figure is sprinkling the tree with holy water. Dr. Bonavia has proved that fir-cones were used by the ancients for such purposes (*Trans. Ninth Congress of Orientalists*, vol. ii.).

The Chaldean Story of the Flood and the Chaldean Noah.

The Deluge Tablet, of which there are several copies in the British Museum, is one of the most important inscriptions yet discovered. It forms the eleventh book of the Chaldean Epic of GILGAMESH, or Nimrod. It is introduced there because the eleventh month of the Babylonian

calendar, according to which the Epic was arranged, was called "the Month of the Curse of Rain," or "the Month of Destruction," corresponding to the eleventh Zodiacal sign of Aquarius.

The story is evidently older than the Epic into which it was woven; and is therefore more ancient than

B.C. 2200, the period at which the Epic is supposed to have been drawn up. It is related to "Gilgamesh" by his ancestor NûḤ-NAPISHTIM* (i.e. Rest of Soul), called also Atraḥasis or Ḥasisatra (= the Greek Xisouthros), "the very wise or pious," who is the Chaldean Noah.

The principal points of contact with the Hebrew account are:—

The Deluge is a punishment for sin. Atrahasis and his family are servants of Ia, the god of the watery abyss. The other gods decree a flood. He is directed to build a ship to hold himself, his family, and the craftsmen (who were under the special protection of Ia), as well as the various kinds of animals. The ark is covered with pitch without and

^{*} Haupt and others read the ideogram Pir-napishtim, "Offspring of life." But the Sumerian Ghis-zi represents an older Guz-zi=Kush-zi=Nih-napishtim, "Rest of soul," i.e. "Tranquil-hearted," whence the Hebrew $N\delta ah$, i.e. Rest, is abridged by omission of the second element in the Babylonian name.

within, and has a deck or covering. The rain lasted six days and nights. The birds—a dove, swallow, and raven—are sent forth, and the last returns not. The ark rests on the mount of Nizir. The rescued come forth from the ark. Sacrifice is offered, and the gods gather round the altar smelling the sweet savour. The gods agree not to punish mankind again with a flood. Finally the hero and his wife are taken or translated, like **Enoch**, to live like gods in the immortal land at the mouth of the four rivers of Paradise.

The chief part of this important text is translated here, Scripture parallels being suggested in the margin.

Fragment of another Babylonian Account of the Flood.

In 1875 the late George Smith wrote as follows: "The 'Izdubar · Legends' appear to me to have been composed during the early Babylonian empire, more than 2,000 years B.C." (Assyrian Discoveries, page 166). Early as this date may have appeared, it has recently been shown to be none too early. At the last Congress of Orientalists (Paris, 1897), Scheil gave an account of a fragment of a tablet containing a different version of the story of the Deluge, which was unearthed by himself in the course of his excavations at Abû Habbah, the ancient SIPPARA. Although the document is sadly mutilated, it is of the highest importance because of the colophon which gives the date as well as the name of the scribe, and because it connects the story with Sippara, as does Berosus (Euseb. Chron., ed. Schöne, page 20 sqq.), whose account differs in some respects from that which is embodied in the Epic of Nimrod. The colophon, according to Scheil, runs thus: "Second Tablet of the history (beginning), Whilst the man slept. Tablet of 439 lines. Mullil-Aya (or Ellit-Aya), the Scribe. Month of Sebat, day 28, the year when Ammizaduga the king built the fortress Ammizaduga's Place at the mouth of the Euphrates." (With this mode of marking a year by an event cf. Amos I. I.)

Thus the new text of the Deluge Story is actually dated by its writer at some point in the century 2250-2150 B.C. The tablet, however, from which he made his copy must even then have been already old; for it appears that he could not read it in some places.

The Babylonian Legend of Gilgamesh-Nimrod.

"Even as Nimrod, the mighty hunter before the Lord,"—Gen. 10. 8-10.

GILGAMESH or Gishtubarra, the old Sumerian demigod, who was called in Semitic-Babylonian Nârûdu—a weakened form of Navrûdu = Namrûdu, i.e. Nimrod—is the prototype of the Greek Heraklês, whose celebrated Twelve Labours recall the twelve episodes or books of the exploits of Gilgamesh-Nimrod, which constitute the old Babylonian Epic of that name.

Three archaic Babylonian Seals are figured:—

In Seal No. 1, Gilgamesh and the Lion, which many consider the absolute masterpiece of old Chaldean art, the mighty hunter is grappling

Judg. 16. 17.

with a huge lion, or raising it when vanquished upon his Judg. 14. 6.

Cf. 1 Sam. 17. 35 & brawny shoulders; as Heraklês in the Greek myth over2 Sam 23. 20; came the Nemean Lion, or as Samson rent the lion in came the Nemean Lion, or as Samson rent the lion in twain by the vineyards of Timnath. The tall reeds sug-

gest the Chaldean marshes as the scene of the exploit. The hero is naked,

SEAL No. 1.

wearing only a narrow girdle or belt above the middle: and, like Samson when he rent the lion, he has nothing (i.e. no weapon) in his hand. His strong, sinewy frame is broadly and powerfully indicated. Here, as always, he is seen

full face. His long curling locks and beard remind us again of Samson. The inscription is apparently "Kasha-Nabû, priest of Dûru (or Isin) . . . the scribe, thy servant." As Gilgamesh is a solar hero, the lion may represent the Zodiacal constellation of Leo.

Seal No. 2 shows Gilgamesh and his companion Ia-bânî in conflict with a bull and a lion. On the right stands the hero, grasping the lion by the throat with his right hand, and holding a fore-paw of the beast with his left. Ia-banî is seizing the bull by horns and tail from behind literally taking the bull by the horns—as he is said to have done in the 6th Tablet of the Epic of Nimrod; while Gilgamesh, whose figure is repeated, takes the animal by the throat and fore-leg in front. The bull is "the Bull

of Anu," which that god created to destroy Gilgamesh, at the request of Ishtar, whose wooing the hero had despised. It is the Zodiacal constel-

lation of Taurus, in the sun's annual path through the heavens.

The inscription of the owner's name at the extreme right is effaced; but the style and execution prove that

SEAL No. 2.

the seal belongs to the same early period as the similar one in the New York Museum and that of Sargon I., B.C. 3800, in the De Clercq collection.

In the Epic of Nimrod, the ancient city of **Erech** is the hero's residence; and in Gen. 10. 10 **Nimrod** appears as the founder of **Babel**, **Erech**, **Accad**, and **Calneh**.

Seal No. 3, according to the inscription in the right-hand top corner, belonged to "Ussi, the brother of the king of Erech, the scribe, thy servant." It may be referred to the times of Ur-ba'u and Dun-gi (B.C. 2700). The central figure, the only one whose head is covered, who carries a sceptre, and towards whom the others look, those nearest him having the hands folded on the breast in the usual attitude of deference, is probably the king of Erech. He wears the flounced robe of the Babylonian priests and gods, which, according to Heuzey, was really a fleecy stuff or woollen tissue, with tufts arranged in rows, called by the Greeks kaunakes (the

SEAL No. 3.

poet Menander mentions a purple robe of this kind; cf. Josh. 7. 21). Two of his attendants wear a dress of similar material, and carry wands of office. Immediately behind him walks a shaven personage in a fringed robe, who may represent the scribe, the

owner of the seal. An armour-bearer or body-guard, with bow and quiver, and an arrow in the right hand, leads the way. Under the inscription two slave-boys are seen, carrying a stool and a bundle of some kind.

An Inscribed Limestone Tablet from Sippara (Abû Habbah).

Transcription in Roman Letters, and Translation.

This venerable relic of the remote past, found some years ago on the site of the temple of the Sun-God at $Ab\hat{u}$ Habbah, the ancient Sippar (Sippara), in Southern Babylonia (by some wrongly identified with **Sepharvaim**), is important as exhibiting the oldest known forms of the archaic Babylonian writing, from which the cuneiform characters were in course of time developed. It probably belongs to the period B.C. 4500-4000 (cf. page 155). It seems to be part of an old temple-register, not only giving an account of the flocks and herds and other property of the sanctuary, but also briefly chronicling events of interest affecting the sacred lands. Professor Hommel considers the town A-IDINNA, mentioned in the 13th line, whose Assyrian name would be $N\hat{a}du$, to be identical with the **Nod** of Gen. 4. 16. The tablet is now in Mr. Ball's collection.

** The capital letters mark Sumerian words, the small type Semitic Babylonian words and terminations, the occurrence of which here and there proves the text to be of Semitic origin.

On the reverse of the tablet four lines are ruled, but only two filled up. They are inscribed;—

Total: twenty-five dwellings. Gunaa (i.e., prob., the scribe's name).

The third line exhibits a single arrow, the beginning of a character left unfinished. The tablet has evidently been broken in half, perhaps by those who found it. The publication of the part we possess may

lead to the identification of the other portion, a result much to be desired.

The reference to the temple-garden in Col. II. 28 sqq. might be illustrated by many passages in the Babylonian religious texts. Thus in W.A.I., Vol. IV., pl. 25, which gives the service appointed for the conse-

cration of an image of the Moon-god, we read what may be rendered as follows:—

".... At sunset in the garden

[Thou shalt pray] to Bel; his throne thou shalt cover with the cloth thereof;

The great tablet in the garden thou shalt set up. At sunrise

On the bank of the river, a grassy place, pure water draw; three knots

For Ia, Shamash, and Merodach thou shalt tie;

One knot for this god (i.e. the new statue) thou shalt tie;

Dates, wheaten meal for sprinkling, honey, butter thou shalt place;

Make splendid, make rich (thine offerings)! Three drink-offerings to Bel, Shamash, and Merodach pour;

One drink-offering to this god pour; best wine pour out, and

Set on plenty. The great bason take up, and into the great bason

Cedar, cypress, tamarisk, the herb mashtakal, a palm sapling,

The reed shalalu, honey, butter, oil, choice oil, thou shalt put."

The temple-lands would be necessary for the production of all these ritual requisites, as well as for the maintenance of the priests and their dependents. See my version of the entire text, in the *Proceedings of the Society of Biblical Archaelogy*, February 1892.

Head of a Mace or Sceptre Inscribed with the Name of Sargon I.

A NUMBER of objects of this kind, mostly in limestone or marble, exist in the British Museum and other collections. The writer possesses two in fine blue chalcedony (see page 217), dedicated respectively to the gods **Merodach** and **Nebo**, and dating from the period of the New Baby-

lonian empire. On sculptures and seals, gods and kings hold sceptres with similar heads (see pages 53, 160). The example figured here was found in the lower strata of the excavations of the Temple of Sippara, and bears an inscription of Sargon I., king of **Accad** (Gen. 10. 10); whose date is

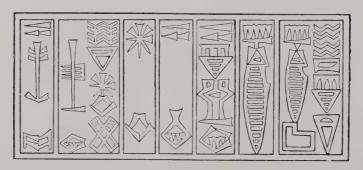

fixed by a statement in the inscription of Nabonidus, the last native king of **Babylon**, B.C. 555:—"I dug down to a depth of eighteen cubits, and the foundation inscription of NARAM-SIN, the son of Sargon, which for 3,200 years no king my predecessor had seen, the Sun-god, the great

lord of E-BARRA, the dwelling-place of his delight, suffered me to be-This makes the date of Naram-Sin about B.C. 3750, and that of Sargon, who reigned fifty years, B.C. 3800. The inscription upon the mace-head reads "SARGON, king of the city, king of AGADÊ (Accad). To the Sun-god in Sippara I look (for help)"; cf. Pss. 123. 1, 2; 141. 8. This inscription is written in Semitic Babylonian, and therefore shows that the characters, the invention of the Sumerian (Turanian) population of Babylonia, had been long in use, and were borrowed by the Semites even earlier than B.C. 3800. The same thing is proved by the inscribed bricks and door-sockets of

Sargon and his son Naram-Sin, found by the Pennsylvania expedition in the ruins of E-Kurra, the great temple of Ellil or Bel at Nippur, now called Nuffar, supposed by some to be the Biblical **Calneh**. (See Hilprecht: Babylonian Expedition of University of Pennsylvania, Vol. I.).

INSCRIPTION ON THE MACE HEAD.

Seal of Ilu-Ishtar (?).

This old Babylonian seal, figured in Plate X. of the Rev. H. G. Tomkins' learned and luminous work *Abraham and his Age*,* and described by him on page xxviii of the same book, was found by Cesnola at Curium in **Cyprus.** The inscription may be thus read in Semitic Babylonian: *Abil-Ishtar*(?) *abil Ilu-bânî arad ili Narâm-Sîn*, which means: "Abil-Ishtar. ISHTAR (?) son of ILU-BANI, servant of the god NARAM-SIN." Abil-Ishtar.

the owner of the seal, therefore, was either a servant of the king Naram-Sin, who is called a "god," as the Pharaohs were called by their subjects; or he was the priest of the cult of Naram-Sin, who, like Gudea and other Babylonian monarchs, was deified and served with regular offer-

SEAL OF ILU-ISHTAR.

ings in a special sanctuary after his death. Whether the worship of the old Babylonian sovereign extended to Cyprus, we cannot say. The seal of Abil-Ishtar(?) may have found its way into the Temple-treasury of Curium simply as a rare and precious object. Moreover, it is uncertain whether the king Naram-Sin, or the god of **Accad**, who appears to have borne that designation, is intended by the inscription. M. Thureau Dangin has lately published the legend stamped on a document addressed to Lugal-Ushumgal, a patesi of Sirgulla, contemporary with Sargon and Naram-Sin, which reads as follows: "The god Naram-Sin, god of Agadê (Accad). Sharru-Ishdagal the scribe, thy servant" (Révue d'Assyriologie, Vol. IV., No. III., page 76).

As M. Dangin observes, we can hardly ascribe too much importance to the epoch of Sargon and Naram-Sin. By the substitution of a great and compact empire for the numerous small rival principalities into which the country was parcelled out, and by the remarkable impulse given to all branches of activity, and by the full expansion in all directions of an art, a culture, a civilisation, the slow development of which had occupied the previous centuries, nay, millenniums, it marks a culminating point in the history of the ancient East.

Inscribed Statue of Gudea, King of Chaldea.

(Circ. B.C. 3000 or 2800.)

This long inscription is in a somewhat later form of the archaic linear Babylonian character. The language is the non-Semitic Sumerian. The statue and inscription show the skill of the Chaldean sculptor as early, perhaps, as B.C. 3000. The stone is hard diorite, which the inscription tells us was obtained from Magan, a country formerly identified

RUINS OF THE PALACE OF GUDEA AT TELL-LOH.

with the peninsula of **Sinai**, but which is now more probably considered to be N.E. Arabia, bordering on Babylonia and the Persian Gulf. The inscription records

the building by Gudea of the temple of his god, Ningirsu, or Nin-Sugir, "the Lord of Sugir" (= Sun-gir = Shinar?).

The statue is one of eight, some standing, others sitting figures, some under life-size, and others over it, which were found by M. de Sarzec at *Tell-Loh* in 1881, and are now in the Louvre. All these statues have lost their heads; but one of the two heads on page 134 may have belonged to one of them, as these heads were found among them, in the central court of the palace. The statue here reproduced is known as "Gudea the Architect," the plan of a building and a graduated rule being sculptured on the lap.

Though the main topic is the building of "E-Ninnû," the temple of "Ningirsu," the inscription throws some light on Gudea's relations to other countries. Thus in col. v. 21 sqq. we read:—

"When he had built the House of NINGIRSU, NINGIRSU his beloved King, spake, (and) opened wide his (Gudea's) way from the Upper Sea (i.e. the Persian Gulf) to the Lower Sea (i.e. the Mediterranean)."

On AMĀNUM (= Amanus, N. of Lebanon), "the cedar mountain," he felled cedars for the building of his temples, and fetched various kinds of stone from the mountains of MARTU, or Syria and Phœnicia. From Meluchcha, i.e. probably N.W. Arabia as far as the borders of Arabia Petraea, he brought hardwood trees and gold dust; from Gubin haluku trees; and nalua stones from Barsib (Borsippa), conveying them down the **Euphrates** in "great boats." (See page 116.)

In col. vi. 64 we have the important notice:—

"With the sword the city of Anshan in Elam he subdued; its spoils to Ningirsu in E-Ninnû he dedicated."

"Anshan," or Anzan was the kingdom of Cyrus, some 2000 years later.

In col. vii. 10 Gudea records that he brought stone from Magan for making this statue of himself, to which he gave the honorific name, "O My King Whose House I have built, be Life my Guerdon!" and dedicated it in "E-Ninnû," bidding the statue make constant appeal to his god, whose statue, no doubt, it faced:—"Speak thou to the image of my King!" All the statues of Gudea have the hands folded on the breast, in the manner of Oriental servants awaiting orders—a token of the king's continual worship and service. (So David would fold his hands when he "went in and sat before the Lord," 2 Sam. 7. 18.)

STATUE OF GUDEA, KING OF CHALDEA. (Circ. B.C. 3000 or 2800.)

The Old Sumerian Inscription known as Gudea B.

I have translated this inscription from the text as published in De Sarzec's *Découvertes en Chaldée*. The version of Amiaud, there given, is the only one I have seen. Gudea's date is fixed by an inscription which mentions his son UR-NINGIRSU as contemporary with Dun-GI, king of UR (see Winckler, *Untersuchungen*, 157.9).

If a *Patesi* revoke it, transgress Ningirsu's command,—may his own continual offering in the House of Ningirsu be revoked, his own behests be thwarted!

For Ningirsu, his King, he prepared splendid adornments. In E-Ninnt (the chapel called) "May **Rimmon** lighten the Darkness!" he **Ps. 18. 28.** rebuilt, and restored its dwellingplace. Within it his own chosen sepulchre of fragrant cedar he built him.

From MADGA-land, from the mountains of the river GALRUDA, mineral pitch he fetched; the platform of E-NINNÛ he built therewith. IM-GA-UM he fetched. From the mountains of Barsib with nalua-stone great barges he filled; the base of E-Ninnü he surrounded therewith. With arms he crushed the city of Anshan in Elam; the spoils of it for NINGIRSU in E-NINNÛ he laid up.

GUDEA, the Patesi of SIRGULLA, when he had built E-NINNÛ for NINGIRSU (and?) adorned it with decorations; when a House of Imagery (or carven work), such as no Pontiff-king had ever built for Ningirsu, he had built; (his) name he inscribed; an ornament (viz., his own statue) he prepared (cf. Col.

v. 14); the commands of NINGIRSU he faithfully performed. From the land of MAGAN hard stone (=diorite) he fetched; into his own likeness (i.e. the statue) he formed it; LU.GAL-MU.EA.NI MU.NA.RU NAM.TI NI.BA.MU (My king, Whose House I have built, let Life be my Reward!) for a name he called it; in E-NINNt he placed it. GUDEA to the statue gave command: "To the statue of my King say thou it!" (i.e. the prayer expressed in thy name).

After I had built E-NINNÛ, His beloved House, I enfranchised debtors (lit. loosed interest), I washed hands (i.e. cleared all liabilities). During seven days corn (food) was not restricted (?);

Bronze Statuette of a God or Pontiff-king.

This curious figure, $8\frac{1}{4}$ inches high, found in a cavity of solid brickwork, bears an inscription of Gudea. It was cast in a mould, **Gen. 4. 22.** thus showing that the art of casting bronze was known even at so remote a date; and it also bears traces of being chased and inlaid with gold in a primitive style of Damascene work. In the earliest Babylonian hymns, a man purified from sin is

often compared to glowing molten bronze; a fact which indicates a very early knowledge of the working of metals. (The tiara with horns, conventionally indicated in profile, is characteristic of gods and genii or divine beings in the Assyrian sculptures.) It is generally held that the cone served for fixing such figures in cement. M. de Sarzec found several others; among them a statuette of a woman standing on a cone, and a bull lying on one, each concealed in a similar cavity (see illustration, page 59).

Gudea got his copper from KA(N).GAL-AD.KI in the Copper Mountains (or Mountains of KI.MASH). The Sumerian KAN.GAL-AD.KI, "Father's Gate Country," in Semitic Babylonian *Abul-abîshu*, "Gate of his father," is a name which, according to Hommel, refers to the

passage of Gilgamesh-Nimrod through the "gate" or pass of the mountains of Mash (the high plateau of Central Arabia), which was guarded by the mythical Scorpion-men, when he went to seek his forefather Nûh-napishtim (see page 31).

Fragments of Assyrian Clay Tablets, inscribed with early Hieroglyphic Forms of Cuneiform Characters.

These three fragments, the smallest of which came from *Kuyunjik* or **Nineveh**, and the two larger ones from *Nimrûd* or **Calah**, exhibit certain cuneiform characters side by side with the antique hieroglyphic figures or

rude outlines of objects, from which they were slowly developed in the course of time and use. It is a curious fact that the primitive picture-characters of Babylonia had already lost their original shapes long before the time of Sargon I. (3800 B.C.); whereas the Egyptian hieroglyphs survived unaltered throughout the whole course of Egyptian history.

Ur of the Chaldees, and Inscribed Bricks from its Site.

Ruins of the Great Temple of the Moon-god.—The explorations of Mr. Loftus have proved that the site of the city of Abram, Ur of the **Chaldees**, is represented by the mounds of Mugheir, or rather Mugayyar,

Gen. 11, 28; Josh. 24. 2; Gen. 10. 19. situated on the west bank of the Euphrates, about 150 miles below the site of Babylon. The city of Ur, called by the primitive Sumerian population of Babylonia Uru-unu-ki, "Brother's or Protector's (i.e. the Moon-god's)

dwelling-place," was one of the oldest city-kingdoms in Babylonia; and its situation on the western side of the Euphrates, bordering on the

desert, made it one of the first towns in which the Semitic people, the ancestors of the Hebrews, would settle. It was probably occupied at a very early period, certainly before B.C. 3800 by the Semites. The principal temple here was dedicated to the Moon-god, called En-zu and Nanna by the Accadians, Sin (cf. Sinai and Wilderness of Sin), or Nannaru, the "bright one," by the Semites. In Josh. 24. 2 it is

expressly stated that when the family of Terah dwelt on the other side of the Euphrates they served other gods than Jehovah.

The following lines from a bilingual hymn to Nanna-Nannaru, "Lord of Ur," may suggest how closely akin might be the ideas and language of Babylonian and Hebrew devotion:—

"Father, merciful, relenting, whose hand holdeth the life of all the world,

Lord, thy godhead, like the far heavens, filleth the broad sea with awe.

Creating the world, fast-founding the temples, proclaiming their names,

Father, begetter of gods and man, causing the sanctuary to be founded, ordaining the freewill offerings!

In heaven, who is supreme? Thou alone art supreme! On earth, who is supreme? Thou alone art supreme!

As for thee, when thy word is spoken in heaven, the seven spirits bow their faces;

When thy word is spoken on earth, the spirits below kiss the ground.

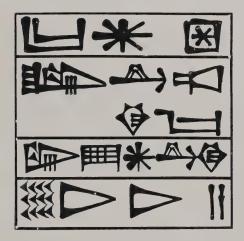

When thy word above sigheth like the wind, it causeth food and drink to sprout forth abundantly:

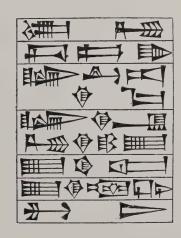

When thy word worketh on earth, vegetation springeth!"

In the Elamite invasion of **Chaldea** in B.C. 2280 the city of **Ur**, like most of the cities of Chaldea, fell into the hands of the enemy, and the new rule may have proved particularly oppressive to the Semitic population, among whom we may number the family of **Terah**. No doubt at that time large numbers of Semites left the country, and, among others, the family of **Terah**, who removed to **Haran**. The inscriptions show

that the city of Kharran, the modern Haran, was affiliated with the city of Ur, and had a temple of great antiquity dedicated to the Moon-god. This temple was restored by Assur-nāṣir-pal (B.C. 885), by Shalmaneser (B.C. 858), by Assur-bani-pal (B.C. 668), who was crowned there, and by Nabonidus (B.C. 555). It is also worth notice in this connection that the Assyrians had a god Laban; a name which recalls that of Laban, Jacob's uncle, who lived at Haran (Gen. 29. 4, 5). Possibly Laban, "the white," was a title of the Moon-god of Haran, as one of the Hebrew terms for moon is $leb\bar{a}n\bar{a}$ (fem. of $l\bar{a}b\bar{a}n$, white). Laban, we know, was an idolater (Gen. 31. 19, 30).

The following inscriptions afford additional illustration of the power and activity of Dun-gi:—

An inscription on a black stone in the British Museum (IR. 2. No. II. 2) may be transcribed and translated thus:—

E-Anna, "The House of Heaven," was the temple of Ishtar at Erech.

Portrait of Ḥammurabi, or Amraphel, King of Shinar.

This tablet from the temple of the Sun-god at Sippara (pages 48, 155, 205, 208), now $Ab\hat{u}$ Habbah, is of much interest, as bearing the portrait and inscription of a king who may have been contemporary with **Abram**.

Hammurabi was one of the greatest monarchs of early

Gen. 14. 1. Babylonian history, being perhaps the first of them who succeeded in uniting all the independent city-kingdoms and establishing a Babylonian empire. During his reign of fifty-five years, and that of his son, the empire of Chaldea included the whole of

Syria; and the use of cuneiform writing became established there (*cp*. the Tell el-Amarna letters, *e.g.* page 86). At this time also many important literary works, such as the Epic of Gilgamesh, or **Nimrod** (page 44), were either composed or translated from the Sumerian into Assyrian.

During the same period Babylonian commerce reached a high stage of development, as many documents extant in the British Museum demonstrate.

Inscribed Cylinder of Arioch (?), King of Ellasar.

This cylinder from Babylonia contains a most important inscription of Babylonian and Elamite kings. It is a votive memorial of Eri-enzu, or Eri-aku, king of Larsa (Ellasar), for himself and his father, Kudur-Mabug, king of Ur, and of Shumir (Shinar) and Accad. (The reading of the name is uncertain. It means "Servant of the Moon-god"; in Semitic, Arad-Sin. Both Enzu and Aku were titles of Sin; but it is at present only a conjecture that the name here written in Sumerian ideograms, URU (?)-DINGIR-EN-ZU, was pronounced Eri-âku.)

In the year B.C. 2280 the land of **Chaldea** was invaded by the Elamite king, Kudur-Nankhundi, "Servant of the god Nankhundi," and most of the principal cities were taken and sacked. For a period of about eighty years the Elamites were rulers in Babylonia; and the old capital, **Erech**, being destroyed, the Elamite viceroy, who was usually a member of the reigning family, had his seat of government at Larsa. At some time during this Elamite rule the invaders pushed on and conquered **Syria** and Palestine, the sovereignty of which, according to Gen. 14. 4, they retained for a period of thirteen years. On bricks found at **Ur**, Kudur-Mabug styles

himself "Father of the West Country," i.e. Syria. Some Gen. 14. 1-16. account of this rule, the revolt, and the expedition to reconquer Southern Palestine are found in the same chapter of Genesis, which may in part be based on Babylonian documents. The names of the allies in Scripture and the monuments correspond as follows:—

SCRIPTURE.	Monuments.
Amraphel, king of Shinar	= { Hammurabi (or <i>Hammu-rapaltu</i>), king of Shumir, S. Babylonia.
Arioch, king of Ellasar	
Chedorlaomer, king of Elam	= {Kudur-Lagamar, or Kudur-Laghamal,* king of Elam.
	= {Tudghulâ,* king of the Gutî (mountaineers of Kurdistan).

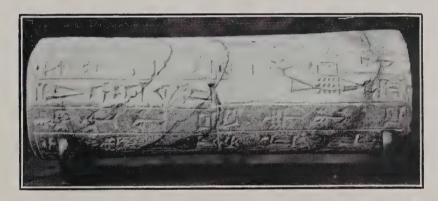

The overthrow of this foreign dominion took place about B.C. 2200, on the accession of Ḥammurabi to the throne, shortly, no doubt, after the defeat in Syria; and it is recorded upon a contract tablet that—

"then Hammurabi the king prosperously marched, and Eri-aku and the king of Elam he defeated" (Boscawen).

^{*} See page 70. The name of Kudur-Lagamar has not yet been found; but it is composed of the Elamite elements Kudur, "servant," and Lagamar(u), the name of a deity whose image was carried off by Assur-bani-pal at the sack of Susa. Moreover, it is like the Elamite royal names, Kudur-Mabug and Kudur-Nankhundi.

Upon these data we arrive at a very near approximation to the date of the migration of **Abram**, which may have taken **Gen. 12. 1-5.** place between B.C. 2280 and B.C. 2255. There are a number of other inscriptions of Hammurabi in the British and other Museums.

According to a statement of Nabonidus, Hammurabi reigned seven hundred years before Burna-Buriash (see page 211): thus, circ. B.C. 2200, or, as others think, circ. 2000. He was the sixth king of the first Babylonian dynasty, which Professor Hommel has quite lately proved to have been of Arab origin. The names of these kings are as follows:—Shumuabî (Shem is my Father), Sumu-la-ilu (cf. Lael, Num. 3. 24), Zabium (warrior), Abil-Sin (son of Sin), Sin-muballit (Sin quickeneth), Hammurabi ('Amm is great), Samsu-iluna (the Sun is our god), Abîshû'a or Ibishu

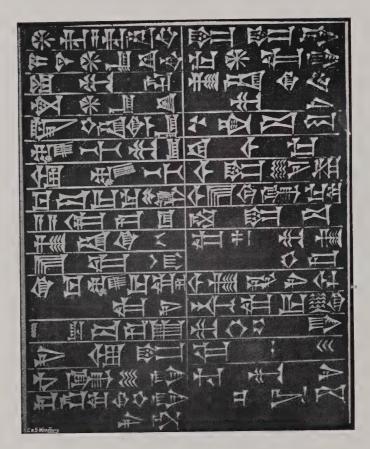

INSCRIBED CYLINDER OF ERI-AKU(?), OR ARIOCH, KING OF ELLASAR (Gen. 14. 1).

(Arab. Abî-yathû'a), Ammi-satana, Ammi-zaduga ('Amm is righteous), and Samsu-satana. After the reduction of the Elamite power established at Larsam, Ḥammurabi and his successors ruled over the whole of Babylonia until his dynasty was again dispossessed by the Elamites (Kassites). A letter of Ḥammurabi to his vassal Sin-idinna, king of Larsam, published by Scheil in the Révue Biblique, 1896, page 601, was supposed by that scholar to prove that Chedorlaomer was no mythical personage, but a real king of Elam contemporary with the writer. The text as transcribed by Scheil may be thus translated:—

"Unto Sin-idinna say thus: I Hammurabi restore thee the goddesses of Emutbal (i.e. W. Elam), thy conquest in the day of Chedorlaomer (written Ku-dur-la-akh-ga-mar). When the god thy maker (or father) is angry, with the men (i.e. warriors) of thy hand overthrow men, but let goddesses abide undisturbed in their dwelling!"

From this it would seem that after the battle which decided the fate of the Elamites, and which is expressively called "the Day of Chedorlaomer," just as Isaiah (9.4) alludes to **Gideon's** famous rout of the Midianites (Judg. 7) as "the Day of Midian," Sin-idinna had sent the Elamite goddesses, taken from the enemy by himself, as a present or trophy to his overlord. Hammurabi returns them, with the pious injunction that in future wars his vassal should be content with the overthrow of human

INSCRIPTION OF ARIOCH (?), KING OF ELLASAR.

enemies, and leave gods unmolested. Mr. L. W. King, of the British Museum, however, has just published a text from a photograph of the original, which shows that Scheil's copy is very incorrect, and especially that the name of Chedorlaomer is a misreading of Inukhsamar. Mr. King's version is as follows:—

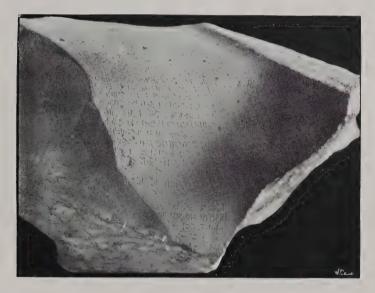

"From Hammurabi to Sin-idinna. The goddesses of Elam which are assigned to thee, the troops under the command of Inukhsamar will bring to thee in safety. When

they reach thee, with the troops that are in thy hand destroy the people, and the goddesses to their dwelling let them bring in safety."

Hammurabi orders the restoration of the captive deities, probably on account of some misfortune, which his priest-prophets explained as due to their anger. (See *Letters and Inscriptions of Hammurabi*, by L. W. King, page xxxvi. Luzac, 1898.)

Sumerian and Semitic-Babylonian Inscription.

This inscription is written in two languages—Sumerian, the Turanian dialect of the old Babylonian people, and Semitic Babylonian, a language akin to Hebrew. It contains the names and titles of Ḥammurabi, king of Babylonia B.C. 2200, and shows the existence at that time of a bilingual population. In connexion with the story of the Confusion of Tongues (Gen. 11), we may remember that the plain of **Shinar** or South Babylonia

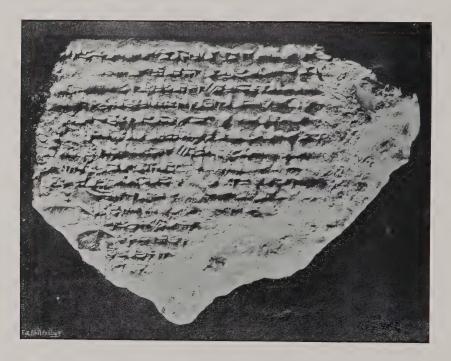

BILINGUAL INSCRIPTION.

has always been a land of mixed peoples and languages. In the very earliest days we find two Turanian sister dialects, the Accadian and Sumerian; then Semitic Babylonian, with Elamite, Kassite, and Assyrian. Later comes Hebrew; and after the Captivity, Median, Persian, Greek, and other tongues, until almost every language of antiquity is represented in the city of **Babylon**.

Obverse of an Unbaked Clay Fragment in the British Museum.

THE text of this document, which is one of several related fragments, is obscure, and the tablet itself appears to be comparatively late (4th cent. B.C.?); but it derives considerable interest from the fact that it contains the names of Ku.ku.ku.mal,* or Ku.dur.ku.mal, which Mr. Pinches

OBVERSE OF AN UNBAKED CLAY FRAGMENT.

reads Kudur-laghamal, Eri.e.a.ku or Eri.e.ku.a, and Tu.ud.Ghu.la.a, which more or less resemble the **Chedorlaomer, Arioch**, and **Tidal** (Heb. *Tidghal*) of Gen. 14. The reading of the first name, however, is highly precarious, although it is probable that the first half of it was *Kudur*; and, in any case, it is certain from the fragmentary context that the persons intended by these names are not those mentioned in Gen. 14.

^{*} Ku.ku.ku.ku.mal is perhaps only a scribe's error.

Inscription of Ku-du-ur-Ma-bu-ug (Kudur-Mabug), on Bricks from the Foundations of the Buildings on the South of the Great Mound of Muqayyar.

"For SIN his King Kudur-Mabug, Father of the West Land, son of SIMTI-SHILḤAK, in the day when SIN anticipated his prayer, the garden great and splendid of SIN, for his own life and the life of Eri-Aku his son, for the men of Larsa he made it." (See I R. 2, No. III.)

Here the Elamite sovereign of **Ur** calls himself "Father," *i.e.* protector or suzerain of Syria (see page 64). He worships the Semitic deity Sin, the moon-god of Ur, calling Him his "King"—a frequent title of Jehovah in the Old Testament, especially in the Psalms. He records the making of the temple-garden (cf. page 49) as a thank-offering to the god.

Tablet of Assur-Nāsir-Pal I., King of Assyria.

This fine text preserves a prayer of a king who reigned five or six centuries before the times of Moses and the Exodus. The old Assyrian monarch calls upon—

"The Lady of Nineveh,
The loftiest of the gods,
The daughter of the Moon,
The sister of the Sun,
The Queen of Heaven and
Earth,"

Ishtar, to deliver her devoted servant from deadly sickness. The piece may be called a Psalm of Supplication, and its language often recalls the familiar phraseology of the Hebrew Psalter. [See Brünnow, Zeitschriftfür Assyriologie, Vol. V., 69.]

Assur-nāsir-pal I. was the son and successor of *Samsi-Rammānu I.*, who reigned about B.C. 1820, and built a temple of Anu and **Rimmon** in his capital city Assur; but little more is known about either of these ancient kings.

ASIATICS IN EGYPT.

A Family of the Aamu of N. Arabia going down into Egypt, depicted in the Tombs at Beni-Hassan in Upper Egypt, about midway between Memphis and Thebes.

In the tomb of Khnum-hotep, the governor of the city of Menât-Khufu in the reign of Usertesen II., is represented in the paintings on the wall the visit of thirty-seven of the people of the AAMU—men, women, and children,—who bring a gift of MEST'EMIT, "kohl" or "eye-paint," to Khnum-

Aamu seems to have been a general name given to Asiatics, wandering Arabs, and others living to the north of Sinai, in the Negeb or "South" of Palestine; the type of face is a distinctly Semitic one. The coming of the Aamu was the beginning of a much larger influx of Asiatics, which a few years later led to the conquest of Lower Egypt by the Hyksos (Hak-Shasu = Arabs, see page 139) or Shepherd kings. This scene shows distinctly the honourable receptions accorded to these eastern clans, even in the period of the great 12th dynasty. It also shows the high civilization which prevailed at that early period in the countries lying between Babylonia and Egypt. The rich clothing, the weapons (bow, boomerang, spear), the man playing the lyre, the women wearing socks as well as sandals, indicate a culture not inferior to that of Egypt.

A FAMILY OF THE AAMU OF N. ARABIA GOING DOWN INTO EGYPT.

[From a wall-painting in one of the tombs at Beni-Hassan (page 73).]

The first of two barefooted scribes who introduce the party holds out a tablet inscribed:—

"Year six, under the majesty of Horus, the guide of the Two Countries, the king of Upper and Lower Egypt, Cha-cheper-Ra: number of the Aamu, brought by the son of the prince Khnum-hotep, on account of the *mest'emit*, belonging to the land of Shu: number, thirty-seven."

Below this his name is written in larger characters:—
"The royal scribe Nefer-hotep."

In front of the other scribe is written:-

"The inspector of the huntsmen, Chati."

"Singularly enough," writes Mr. Tomkins, in describing the glorious times of the 12th dynasty, "the memorials of this period no longer exist above ground like the pyramids of the earlier age but in the unrivalled subterranean chambers and galleries of Beni-Hassan, covered with the beautiful pictures of agricultural and domestic life; of field-sports, fishing, and marsh-fowling; of festivals, games, processions, and the endless humours and conceits of daily doings, which afford us almost a cyclopædia of Egyptian manners" (Age of Abraham, page 135).

Funerary Stele of Aunef.

(13th Dynasty.)

MONUMENTS of the obscure period of the 13th dynasty are not common. This one—the funerary tablet of a noble named Auner, who enjoyed the rank of a "king's son"—was found by Mr. Percy Newberry, and is now in my own collection.

From the Turin papyrus and other sources, Petrie gives a list of 55 kings of this dynasty, which was in power from circ. B.C. 2565 to 2112.

SEBEK, THE CROCODILE-HEADED GOD.

The name Sebek-hotep occurs five or six times among the first thirty-seven, and an existing statue of Neferhotep, the twenty-first king of Petrie's list, is inscribed, "Beloved of Sebek in Shed" (Crocodilopolis). Probably, therefore, the dynastic capital was in the Fayûm, where the crocodile was sacred, and Sebek the crocodile-headed god was adored. The fine statues and other monuments of these kings, e.g. the brick pyramid of Rā-fu-ab at Dahshûr, the large syenite figures

of Mermeshau at \hat{San} (**Zoan**-Tanis), and the grey granite colossi of Sebekhotep (the twenty-third king) on the isle of Arqo above the third cataract, prove that theirs was a time of average peace and prosperity; while the distribution of these remains about the country indicates that both Upper and Lower Egypt were subject to their undiminished sway.

FUNERARY STELE OF AUNEF (13TH DYNASTY).

The Hyksos or Shepherd (cf. Gen. 46. 34) Kings.

MONUMENTAL evidence and tradition appear to justify the opinion that Abraham and Jacob and his sons went down to Egypt (under stress of famine) during the period when Lower Egypt was in Gen. 12. 10 the hands of the foreign invaders from Asia, who entered the country shortly after the fall of the 12th (or 13th) dynasty, that is, about B.C. 2200. Such an invasion would not be the coming of one people, but of a vast wave or mixed body, composed of many Asiatic tribes, the majority borne on by the prospect of plunder. (Similar impulses carried the Mongols, Goths, and other barbarous peoples across whole continents at a later period of history.) The monuments of Egypt and Chaldea, as well as the Hebrew records, suggest that the Elamite invasion of Chaldea in B.C. 2280, the migration of Abram from Ur of the Chaldees to Kharran and Southern Palestine, and the Hyksos invasion of Lower Egypt, may have been more or less contemporaneous and perhaps connected events.

During the obscure period between the 12th and 18th Egyptian dynasties, all Lower Egypt was overrun by bands of Asiatics, known as

HYKSOS KING APEPA.

Hyksos, a term explained by the chronicler Manetho as derived from the Egyptian hyk or hak, "prince," and sos, "shepherd." Sos appears to be really a Græcized form of Shasu, the usual Egyptian name for the pastoral nomads of the Arabian desert; and hak Shasu, "Bêdâwî chiefs," would be a contemptuous nickname given to the kings after the expulsion of their dynasty. These foreign rulers, who for more than four centuries were masters of Lower Egypt,

resided at a fortified frontier-city, Avaris (Eg., *Ḥauar*; probably the same as **Zoan-**Tanis), at Memphis, and also midway at Bubastis. (Petrie makes the many kings of the 14th dynasty "merely the puppets of the

Hyksos power," and fixes the period of Hyksos rule to the time of the 15th to the 17th dynasties, circ. B.C. 2098-1587.)

That the ruling element, and probably the fighting class among the "Shepherd" people, was composed of Turanians of a Mongol type related to the **Hittites**, may be perhaps inferred from the faces of the statues and sphinxes of the Hyksos rulers. Note the high cheek-bones, flat cheeks, both in one plane, massive nose, firm projecting lips, and the thick hair, with the austere and almost savage expression of power; and compare the racial characteristics of the Hittites (pages 95, 96).

Head and Statue of the Hyksos King Apepa.—This colossal seated statue and head, found by M. Naville at Bubastis (Pi-beseth, Ezek. 30. 17, now Tell Basta), undoubtedly belong to the Hyksos period. Although

the throne is inscribed with the name and titles of Osorkon II. of the 22nd dynasty, USER-MAAT-RA, i.e. Potent by the Law of Ra, Sotep-en AMUN, i.e. chosen of Amun, AMUN-MERI, i.e. beloved of Amun, UASARKEN, it is thought that the name and titles of Apepa have been obliterated from the pedestal of the throne of the statue. The style of the head (page 78) bears so close a resemblance to the Hyksos sphinxes and figures as to leave no doubt of its belonging to the same period. Both the Hyksos kings and those of the 22nd dynasty were of Asiatic ori-

(See Illustration on the next page.)

Zoan, or Tanis, called Sechet T'ant, i.e. "the field of Zoan," by the Egyptians (cf. Ps. 78. 12, 43), is now represented by the mounds of Sân, on the Tanitic branch of the Nile. The excavations made here by Mariette and Petrie show that it must have been the chief city of Lower Egypt. Its records extend from the age of Pepi I., of the 6th dynasty, to the time of the 12th, and continue down to Ptolemaic times. The Decree of Canopus (see page 256), a bilingual inscription like the famous Rosetta Stone, was found here.

It may have been in Tanis and Bubastis, as the chief Hyksos cities,

that **Joseph** acted as chief minister of King Apepa. As **Abram** found a welcome

Hittites
of Hebron, so Joseph
and his brethren would
probably find one at

and his brethren would probably find one at the court of the Asiatic Pharaoh.

The Hyksos were patrons of art, and introduced new forms, e.g. the (Semitic) winged sphinx. The comparative rarity of remains of their period is due to the wholesale destruction of their monuments by the restored native princes, who, as Brugsch says, sedulously obliterated every record of the detested usurpers.

The Sallier papyrus gives a vivid picture of the relations between APEPA and an Egyptian vassal-king, Segenen-RA, who was permitted to rule at Thebes:—

OBSIDIAN HEAD OF A PHARAOH IN KLAFT AND URÆUS.

GRANITE HEAD OF A PHARAOH IN KLAFT AND URÆUS.

SELECTION OF HYKSOS HEADS.

"Egypt was in the hands of enemies, and nobody was lord in that day. There was indeed a king, Seqenen-Ra; but he was but a chief (hak) in the City of the South (Thebes), while enemies abode in the Town of the Aamu, and Apepa was king in Avaris. . . . And king Apepa chose Set (Sutech = Baal-Zephon) for his god, and served none of the gods which were adored in the whole country. He built him a magnificent temple, appointing feasts and days of sacrifice."

APEPA seems to have demanded of Segenen-Ra that he should establish the sole worship of Set or Sutech in the South country also.

The papyrus relates:—

"The messenger of King Apepa betook him to the governor of the city of the South, and was brought before the governor of the city of the South country. He spoke thus, when he spoke to the messenger of King Apepa: 'Who hath sent thee hither to the city of the South? Art thou come in order to spy out?'"

It is noteworthy that this is the very question which **Joseph** puts to his brethren, when they appear at the northern court (Gen. 42.9). (The Sallier papyrus does not give the sequel of the story. The account of the successful revolt of Egypt against the foreign yoke is to be read on the walls of the tomb of the brave captain AAḤ-MES at El-Kab, who relates his own feats of arms in connexion with the fall of AVARIS and other Hyksos strongholds. See Brugsch, Hist. of Egypt.)

The Sallier papyrus also records that the court of Apepa was famous for its magicians; with this fact may be associated the high position of **Joseph**, who could interpret dreams. Indeed, historical and other considerations lead us to see in this Hyksos period the only period which is in harmony with the life and times of **Joseph**. The tradition preserved by the Byzantine writer George the Syncellus or Chancellor (fl. A.D. 800), that the **Pharaoh** of Joseph's days was named Aphophis, is one which is

now found to agree exactly with the testimony of the monuments. There were two Hyksos kings named Apepa or Aphophis; but it was probably during the reign of Apepa I. of the 15th dynasty that Joseph rose

to power. During this period the court of Lower Egypt was at **Zoan**, in the field of **Zoan**; and the conquerors had adopted the manners, customs, language, and court etiquette of the native Egyptians, but had introduced into the country the horse and chariot, hitherto unknown in Egypt (cf. "The Hittites" below).

After the expulsion of the foreigners, Tanis was largely patronised by Seti I. and Rameses II., of the 19th dynasty, who erected important buildings, statues, sphinxes, etc., there. During the period of the 21st (B.C. 1110) and 23rd (B.C. 766) dynasties Tanis was again the seat of government.

EGYPT AND SYRIA.

Chu-en-aten, or Akhu-en-aten (Amenophis IV., King of Egypt, 18th Dynasty), the heretical or reforming Pharaoh.

OF all the Pharaohs whose names and doings are chronicled more or less completely by their own monuments, none - not even the great Rameses II.—is so interesting a figure as Chu-en-aten, son of

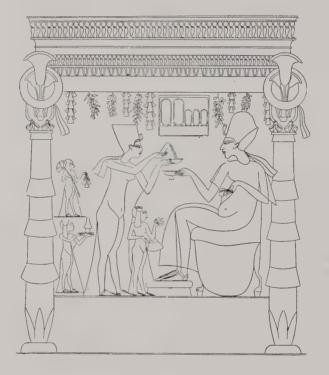

CHU-EN-ATEN, OR AKHU-EN-ATEN

(=Splendour of the Solar disk), i.e. Amenophis IV., king of Egypt, his queen, Nefer-Titi, and three of their six daughters, throwing largess to subjects from a balcony of a palace at Chu-aten (Tell el-Amarna).

Amenophis III., and the Middannian, i.e. Mesopotamian, princess Tii, the famous king to whom so much of the Tell el-Amarna correspondence is addressed; who, if he resembled Solomon in his peace-loving disposition, and the magnificence displayed in the palace and temple which he built at his new capital, no less reminds us of **David** by the hymns which he wrote in honour of his god, and of **Hezekiah** and **Josiah**, by his earnest labours as a religious reformer and the short-lived results of those labours.

His father, Amenophis III., had married him in youth to Dâdu-ghîpa, daughter of Dushradda, king of Middanni in Northern Mesopo-

CHU-EN-ATEN, OR AMENOPHIS IV., KING OF EGYPT,

His queen, Nefer-Titi, and three daughters. A domestic scene within the palace at Chu-àten (Telt'el-Amarna). The queen is straining wine into the king's cup, and his three daughters are offering him cakes and flowers. He holds a flower in his left hand. Among the titles of Nefer-Titi are erpat writ hont hemtu neb, "the great heiress, the queen of all women"; hont res meh nebt taui, "the queen of south and north, the lady of the two lands" (i.e. Upper and Lower Egypt), and Aten-neferneferu, "the beauty of the beauties of Aten."

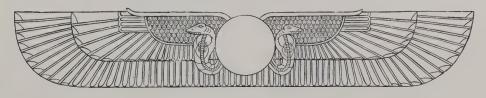

tamia. In Egypt, Dâdu-ghîpa was called Nefer-titi, which is perhaps an adaptation of her name (nefer, "good," "fair" = ghîpa; Titi = Dâdu, Tâtu). Under her influence and that of the queen-mother Tii, who was regent during his minority, Amenophis IV. repudiated the worship of Amun of Thebes (see page 99), and of the other gods of Egypt, early in the sixth year of his reign, when—like **Josiah** (2 Kings 22. 3)—he was about

eighteen years old; adopting his Asiatic mother's religion, the worship of the ATEN (perhaps = the Syrian Adon, "lord"), the sun as the lord and giver of life, to the entire exclusion of the polytheistic and theriomorphic * conceptions which had hitherto prevailed in Egypt. This new state-religion is indicated in the illustration on page 83. Over the heads of the royal persons is seen the Solar Disk, shedding rays terminating in hands, which support the bodies and sustain the crowns of the king and queen, while two of them hold the ankh or symbol of life to the nostrils of the sovereigns.

This radical change in religion was marked by a change of name. Rejecting his former designations, Nefer-Cheperu-Rā-ua-en-Rā, i.e. the beautiful Becomings (or creations) of Ra, the Only One of Ra, and Amenhotep-nutar-haq-uast, i.e. Amenhotep the divine king of Thebes, the king assumed the name of Chu-en-aten, i.e. splendour of the Solar Disk, with the prefix Ankh-em-maāt, i.e. living in Truth. A new capital was founded at Chu-aten (Tell el-Amarna, see page 86). Here were built a great palace, occupying a space of at least 1500 ft. by 500 ft., and a temple of the Aten, about 250 ft. square, standing in a sacred enclosure nearly half a mile long.

Chu-en-aten took no delight in war; he was not so much a great conqueror as a good man. His family affection is proved by the significant fact that his wife and daughters are everywhere represented with him, and by the artistic splendour of the part of his palace dedicated to their use, as well as by his inscriptions, in one of which he says:—

"Sweet love fills my heart for the Queen and her young children. God grant a great age to Queen NEFER-TITI! (see above), for long years may she hold fast the Pharaoh's hand! Grant a great age to the royal daughter Meri-Aten (i.e. dear to the Solar Disk), and to the royal daughter Makt-Aten (i.e. protected by the Solar Disk), and to their children! may they hold fast the hand of the Queen their mother for ever and ever!"

The Tell el-Amarna Correspondence.

In the year 1887 a remarkable discovery of clay tablets bearing cuneiform inscriptions was made in Egypt. The discovery of such documents in Egypt was quite unexpected; but they are now generally recognised

TELL EL-AMARNA TABLET.

[Letter from an unnamed king of Alashia, in Northern Syria, or, as others think,

Cyprus, to the king of Egypt.]

as supplying an important chapter in Oriental history. The tablets were found at *Tell el-Amarna*, the ruins of the city of Chu-aten, built by Amenophis IV. after his adoption of the heretical creed of the worship of the Aten or Solar Disk (see page 84). As there are some letters

addressed to his father, Amenophis III., among the tablets, the whole collection may be dated between B.C. 1500-1450.

At this period, owing to the marriages of Amenophis III. with wives from Babylonia and Middanni (N. Mesopotamia), the Egyptian court was crowded with Asiatics, and correspondence with the East was carried on in the style of writing then most used for diplomacy and commerce in Western Asia, namely, in the Babylonian cuneiform.

Among the tablets from the city now in the British Museum, the Royal Museums at Berlin and at Gizeh (Cairo), are letters from Babylon and Middanni, as well as from **Tyre**, **Sidon**, **Gebal**, **Askelon**, **Gaza**, **Lachish**, and **Jerusalem**, showing the universal use of the Babylonian writing at this period, more than a century before the Exodus. The letters from Jerusalem are of great interest. They are written by Abdi-Ḥiba to the king, complaining of the advance of the Philistines and others against him. Abdi-Ḥiba describes himself as the Pharaoh's vassal:

"Behold, this territory of Jerusalem—neither my father nor my mother gave it me; the king's mighty arm gave it me!"

His letters will be found translated below, pages 89-93.

From the King of Alashîa to the King of Egypt.

(Brit. Mus. No. 5; Winckler, 25.)

To the King of the land of Mizraim,* my brother, says thus:—The King of the land of Alashîa is thy brother. I am well,—my houses, my wive(s?), my children, my grandees, my horses, my chariots; and in the heart of my lands there is (or may there be) exceeding weal. And may my brother be well,—thine houses, thy wives, thy children, thy grandees, thine horses, thy chariots; and in the heart of thy lands may there be exceeding weal!

My brother, behold I send my messenger with thy messenger unto thee in Mizraim, Whereas I bring thee V hundred (manehs?) of copper, as a present unto my brother I bring

them thee: My brother, if the copper is little, let it not rankle in thine heart; for in my country the hand of Nergal† my Lord hath smitten all the people of my country, and the copper-working has ceased; therefore, my brother, let it not rankle in thine heart. Thy messenger along

brother, give me silver of the gods (or of God; i.e. the purest silver); and beyond (i.e. more than) my brother's gift whatever thou desirest, my brother, I on my part will send thee.

Next, my brother, the bull which my messenger desired, give me, my brother; and of oils (or ointments) the choicest, my brother, send me two kukubu's, my brother; and send me one of the Vulture-Charmers.*

Next, my brother, the men of my land complain against me because of my timber which the King of **Mizraim** taketh; and, my brother, because of the asses and the (copper?).

Next, as follows. A man of Alashı̂a has died in Egypt, and his goods are in thy country, and his son and his wife with me: let my brother collect the goods of people of Alashı̂a, and give them, my brother, into the hand of my messenger.

My brother, let it not rankle in thine heart, that thy messenger hath Cf. 1 Sam. 5. 6, 7. abode three years in my country; for the hand of Nergal is on my country, and in my house my youngest wife lies dead (lit. is my young wife † who hath died). Now, my brother, with all care and speed despatch thine own messenger and mine together; and I will send thee my brother's (i.e. thy) present.

Next, my brother, the silver that I desired of thee, my brother will send exceeding much; and the goods which I have asked of thee, my brother, despatch; and whatever things I have said, my brother will do; and whatever things thou, on thy part, shalt say to me, I will do.

With the king of the **Hittites** and with the king of **Shinar** ‡—with them have thou no dealings; whatever present they have sent unto me, I have rendered unto thee double.

(Brit. Mus. Collection, No. 70.)

To the King my Lord as follows. TAGI is thy bondservant; at the feet of the King my Lord seven times and seven I fall. Behold, I am the bondservant of the King, and I have sought (or desired) to muster the caravans || by the hand of my brother; but he is sore wounded (lit. full of wounds); he is unable to conduct my caravans unto the King my Lord. And ask thine officers whether my brother be not sore wounded.

Next, behold, as for us, mine eyes are toward thee! if we ascend up to heaven, if we go down into the earth, our head is in thine hand.

THE PHARAOHS IN SYRIA.

The Hittites.

The Hittites, the Khittim, or Bene Kheth of the Hebrews, and the Khetta of the Egyptians, were a powerful confederation of tribes in North Syria and Asia Minor. Their original home seems to have been in the Taurus,

HITTITE KING (WITH PIGTAIL).

north of the gulf of Antioch, whence they pushed northward and westward as far as the neighbourhood of Smyrna. Southward they overran Syria and Palestine, having an advanced post at **Hebron** in the time of **Abram** (Gen. 23. 2, 3).

After the expulsion of the Hyksos or Shepherd Kings, completed by Ahmes (Amosis), the founder of the 18th dynasty, Egypt—under Thothmes III., the greatest king of that dynasty—estab-

lished once more its suzerainty over all the petty principalities of Canaan and Aram (A.V. *Syria*), as far as the **Euphrates**, and even beyond it, for the Tell el-Amarna tablets contain despatches to the reigning Pharaoh (cf. page 86) from Mesopotamian princes. But as the dynasty became weakened by internal dissensions (apparently the cause of the periodical fall of Egyptian dynasties), the Khetta appear in the Orontes Valley (their

advance is recorded in the Tell el-Amarna tablets) as a power able to oppose Egypt, and even to ally itself with Pharaoh on equal terms (cf. page 104). Their power from the 17th to the 14th centuries B.C. was very great in Western Asia. In the Tell el-Amarna tablets, we find them during the latter part of the 18th Egyptian dynasty advancing through the Orontes Valley, and gradually obtaining possession of the regions

of North Syria and the upper part of the valley of the Euphrates. Their chief centres, Carchemish, on the principal ford of the Euphrates, and

Kadesh, in the valley of the upper Orontes, were not only commanding military posts, but also great emporia of trade.

On the rise of the 19th Egyptian dynasty about B.C. 1370, Seti I., its founder, found that towards the close of the previous dynasty, almost all the Asiatic provinces had been lost. Then commenced a series of annual campaigns conducted with unceasing vigour, and conspicuously by Rameses II. (pages 103–105; cp. 2 Kings 23. 29). In the north of **Syria**, the Egyptians had to encounter the opposition of a powerful Hittite confederacy. Among the allies were Lycians, Teucrians, Dardanians, and other peoples who had come eastward during the period of Egypt's

weakness. In the end, the offensive power of the **Hittites** was broken by the great battle of Kadesh, in which Rameses II. defeated the confederation and their allies from Asia Minor (see pages 104 sq.).

The Old Testament allusions to this warlike and commercial people are few. The expedition of **Hadadezer** (2 Sam. 8. 3) may have been directed against the other Hittite centre, **Carchemish**, for he had had wars with **Toi**, king of **Hamath**, which

seems, from its monuments, to have been (at any rate in later times), a Hittite city.

The confederacy may be meant by the Kings of the Hittites, and evidently these Hittites were celebrated for their horses and chariots (I Kings 10. 28, 29); and the introduction

of the horse and chariot into Egypt, which appears from the monuments to have taken place during the Hyksos rule, was perhaps due to them. Relics of the southern branch round **Hebron** were among the bondservants of **Solomon** (I Kings 9. 20), and some Hittite princesses became his wives (ibid. II. I).

Later, the **Hittites** reappear upon the monuments as barring the westward advance of Assyria as they had formerly resisted the northward advance of Egypt.

Evidently they successfully resisted Tiglath-pileser I., but, by 35 years of war (commemorated on the Black Obelisk, cf. pages 164-68) Shalmaneser II.

Damascus, Hamath, and others, and penetrated to the Orontes, and in his 18th year he defeated Hazael, king of Syria-Damascus and other confederates at Senir or Shenir (Mount Hermon, cf. Deut. 3. 9), and penetrated to the Mediterranean, near Beyrout, by the old road from Damascus along the Dog River (Nahr el Kelb), where he recorded his successes by inscribing his likeness on the rocks, as Rameses II. had done long before him.

The Khetta had successfully resisted Egypt; but Assyria proved to be more persistent and better organised, and the Hittite confederacy

was gradually shattered, stronghold after stronghold falling before Assyria. In B.C. 745, Pul, i.e. Tiglath-pileser II. (III., see page 170), the founder of the new Assyrian empire, captured Arpad, having overrun the kingdom of Hamath (cf. Isa. 10. 9, & 36. 19).

With the capture of **Carchemish** in B.C. 717 by **Sargon** II. (cf. page 185), the Hittites disappear from history. Prior to this, as shown by the inscription of Panammû, many of their strongholds had passed into the possession of the Arameans (Syrians). (See page 181.)

A Hittite Portrait.

(Circ. B.C. 1300.)

This head, from an inlaid tile from the palace of Rameses III. at *Tell el-Yahûdeh*, in Lower Egypt, gives us clearly the type of the race. The type of face is distinct from that presented by any other of the races of Western Asia. The principal characteristics are the straight nose and the receding forehead and chin; while the plaiting of the hair in pigtails, Tartar fashion, is distinctly shown (cf. No. I., page 95). The Egyptian

artists depict the **Hittites** as beardless and black-haired, and of yellowish-white complexion, with a thin wirelike moustache (cf. Nos. II., III., pages 95, 96) and brown eyes, and with features, low stature, and thick limbs resembling those of the warriors upon the Monuments of *Hamah* (**Hamath**) and *Gerābis* (**Carchemish**); their dress comprises a high conical cap, with the brim turned up in horn-shaped points, surmounted by the crescent moon and the solar disk (apparently the emblems of the Hittite Ashtoreth), and boots with upturned toes and long fingerless gloves. Such boots and gloves are still worn by the mountaineers of **Cappadocia**, and indeed of Asia Minor and **Greece**, for protection against snow

and frost. From such data it is inferred that the original home of the Khetta was in some lofty mountain range, such as the Taurus. Archaic sculptures and inscriptions scattered throughout Asia Minor are now usually termed "Hittite," even including the famous figure on Mount Sipylus, which the Greeks popularly identified with the Niobe of their mythology, but which Herodotus supposed to be a monument of the great Egyptian conqueror Sesostris (*i.e.* Rameses II.). Many of the so-called Hittite inscriptions are found in silver mines of the Taurus and Asia Minor; a sign that the authors of these hieroglyphics worked these mines.

A ROYAL HITTITE.

Amun of Thebes.

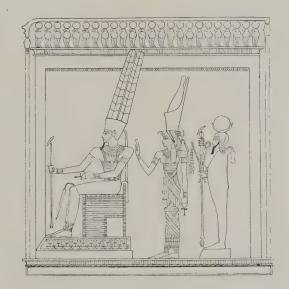

THE god Amen, or Amun,* i.e. the hidden one, was the chief god of the Theban pantheon, and, from the rise of the 18th dynasty, about 1800 B.C.,

was regarded as the national god of Egypt. Hence the denunciations of the Prophets Nahum and Jeremiah against the god and his city. Amun, or Amun Rā, as he is also called, along with his consort Māt, or Mūt (i.e. mother), and Chonsu (= Sumerian Enzu, from Ganzu, Gunzu; a title of the Moon-

god), formed the divine Triad of Thebes, to which the magnificent temples of that city were erected.

The hymns to Amun, of which there are many in the British Museum and other collections, have a very high character, and approach very closely to the language of Monotheism. The following is an extract from one translated by the late Sir P. Le Page Renouf:—

"The ONE, Maker of all that is; the One, the only one, the Maker of beings; from whose eyes mankind issued, from whose mouth are the gods; maker of grass for the cattle

AMUN, $M\overline{U}T$, AND CHONSU, the Triad of Thebes.

(oxen, goats, asses, swine and sheep), (and) of fruitful trees for men of future generations; causing fish to live in the river, birds to fill the air; giving breath to those in the egg; feeding the bird that flies; giving food to the bird that perches, to the creeping thing and the flying thing alike; providing food for the rats in their holes; feeding the flying things on every tree.

"Hail to Thee for all these things—the One, alone with many hands, lying awake while all men sleep, to seek out the good of His creatures—Amun, sustainer of all things!" (Cf. Pss. 104 and 121.)

^{*} There is no vowel between the M and N in the Egyptian writing; but cf. the Greek Zeus Ammon, and perhaps the Biblical **Amon** (2 Kings 21. 18).

Ruins of Thebes.

This capital of the Egyptian empire was known to the Hebrew writers by the name of No* or No-Amon, the Ni'u of the Assyrian inscriptions. The city rose to grandeur during the period of the 18th and 19th dynasties, especially under Thothmes III. and Rameses II., who made lavish gifts and extensive additions to the great buildings of the temple of Amun. The passages in Scripture referring to this city are of importance, as showing the interest with which the Hebrew prophets followed the political movements of the time. Nahum (3.8), in his warning to

Nineveh, Art thou better than No-Amon (marg.; A.V. populous No), &c., refers to the capture of Thebes by Assur-bani-pal, about B.C. 665, and the sack of the city; while Jeremiah (46. 25), in the menace I will punish Amon (marg.; A.V. the multitude) of No, and Pharaoh, and Egypt, points to the invasion of Egypt by Nebuchadnezzar, when the Chaldean troops advanced as far as Syene (Cheyne, Feremiah, page 198). The site of Thebes is now represented by the great ruins of Karnak and Luxor in Upper Egypt.†

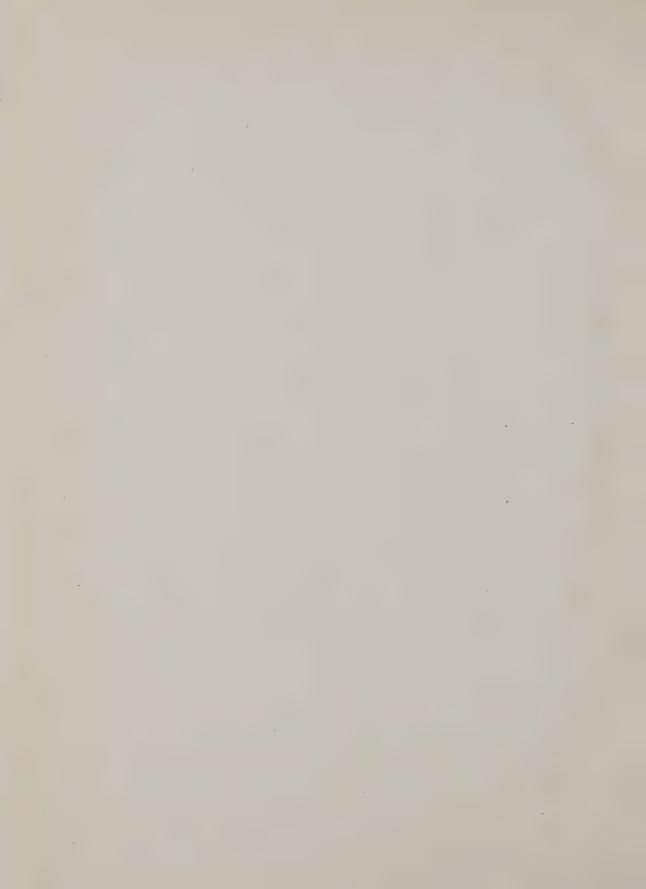

^{* &}quot;No" = the Egyptian nut, i.e. city; No-Amon therefore means City of Amon.

[†] Ancient Thebes stood on both banks of the Nile; Luxor and Karnak are on the E. bank; Medînet Habû, the Memnonium, Deir el-Bahari, etc., on the W. bank. During the Hyksos rule in the Delta the native Egyptian kings made Thebes their capital.

Seti I. Fighting against the Asiatics.

(Circ. 1370 B.C.)

SETI I., the first notable king of the 19th dynasty, waged many wars in Syria and Palestine, and especially against the **Hittites**. His especial

object was to capture the city of Kadesh (cf. pages 104, 105), the Hittite stronghold in the upper valley of the Orontes. In the illustration we see him in his chariot with his favourite pair of horses called "Big with victory," upon a campaign which is described as—

"the going up of Pharaoh to conquer the land of Kadesh in the territory of the Amorites."

In another inscription it is stated that—

"he has struck down the Asiatics, he has overthrown the Khetta (i.e. Hittites), he has slain their princes."

The campaigns of Seti I. paved the way for the great victories of Rameses II. in Syria and the humbling of the **Hittites**.

says the head, of which there is a cast in the Egyptian gallery of the British Museum, "is modelled with a grandeur which one never tires of admiring." It was raised and turned over by Major Bagnold in 1887, and a shed built over it for its protection.

Great Hittite Campaign of Rameses II. (The Battle of Kadesh.)

RAMESES II. was a valiant and able warrior, his greatest achievement being the victory over the strong Hittite confederacy, which he won in the battle of Kadesh, on the Orontes. This decisive engagement had great influence on the fortunes of **Egypt**, and for a long period gave the Egyptians complete command over the rich provinces of **Syria**.

The armies met in the narrowest part of the valley, near the city. Here, after a hard-fought battle, the allies were defeated; but so strong was their power that the Egyptian king was glad to conclude a treaty of peace with the king of the **Hittites**, and to take his daughter to wife as part of the bargain. This treaty, which was engraved on a plate of silver, is the oldest whose terms are on record; and the spirited poem of Pentaur, describing the battle, inscribed on the walls of the temple of Karnak and elsewhere, is considered one of the most valuable historical memorials of the Egyptians.

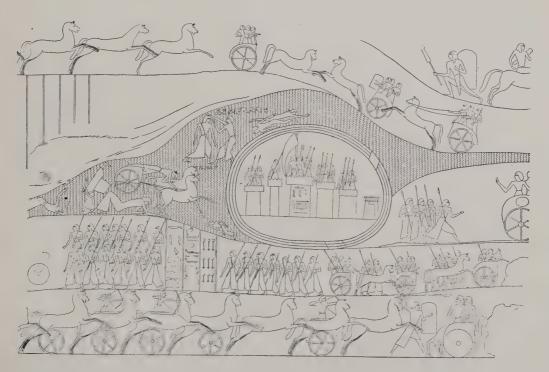

THE BATTLE OF KADESH.

Rameses II. engaging the chariots of the Hittites and their allies before the city.

In the first part of the great battle-scene, depicted on the temple wall at Karnak, we see the giant form of the King of North and South, USER-MAĀT-RĀ (i.e. Potent by the Law of Ra), SOTEP-EN-RĀ (Chosen of Ra), RĀ-MESSU MERI AMUN (i.e. Rameses beloved of Amun), driving the chariots of the foe pell-mell into the river. The town of KADESH with its garrison stands on a island in the stream, its name being written in hieroglyphs on the central tower. To the left, the king of KHIRBU (Aleppo) is being helped out of the water; 9,000 foot-soldiers, "smiting the foe," are marching on the right bank. An inscription on the wall thus describes the scene:—

"When his Majesty halted, he encamped on the north-west of Kadesh. He had come up with the hostile forces of the Hittites, being quite alone, no other was with him. There were thousands and hundreds of chariots all around him on every side. He dashed them down in heaps of dead before his horses. He slew all the kings of all the nations who were allies of the Hittite king, with his princes and elders, his soldiers, and his horses. He threw them one upon another, head over heels, into the Orontes. Then the king of the Hittites turned and lifted up his hands to supplicate the Divine Benefactor (i.e. the Egyptian monarch) for grace."

THE BATTLE OF KADESH (continued).

A Letter in the Ancient Egyptian Hieratic Writing.

This document, written on papyrus with a reed, shows how hieroglyphics were abridged and rounded off, under the influence of handwriting. So far as the script alone is concerned, it might well belong to the times of the 19th dynasty, to which Chabas, Dr. Lincke, and M. Kminek-Szedlo, who was the first to publish it in English, assigned it. In his opinion, the papyrus was written in the third year of Meneptah II., the Pharaoh of the Exodus. Other scholars, however, think it must belong to a much later period, on the ground of certain expressions which occur in it, and which are not found in documents of that age. The translation is from the pen of the well-known Egyptologist Mr. F. Llewellyn Griffith.

TRANSLATION.

The Address on the outside:—

"The scribe of the drink-offerings, Bakenamen, unto Ramesu, the priest in the temple of Thoth."

The Letter:—

"The scribe of the drink-offerings, Bakenamen, saluteth * his father Rames, priest in the temple of Thoth, being of happy heart continually, in life, prosperity, health, by the favour of Amen Ra, King of the gods.

"I pray unto Ra Harmakhis in his rising and his setting, unto Amen, Ra, Ptah, unto Ramesu-Mery-Amen (i.e. the dead King Rameses II.), and to all the gods and goddesses of the house of Ramesu-Mery-Amen, the great Double of Ra Harmakhis, that thou mayest have health, mayest have life, mayest have prosperity, that I may see thee in health; and I fill my heart with thee.

"Another matter. I have heard thy despatch which thou madest in saluting me \ be it Ra and Ptah that salute thee ! I know not whether my boy will reach thee, but lo \ I am sending him to Sekhemp-ehti, and I will have a letter taken to thee by his hand. In the same way, do not thou abstain from sending unto me frequently, that I may hear thy doings.

"I have made enquiry as to the Syrian of the temple of Thoth, about whom thou sentest unto me. I found that he was assigned as a labourer of the temple of Thoth, under thy command, on the 10th day of Payni, year 3, being from amongst the slaves that serve on the ships brought to the governor of the fortress. To tell thee his Syrian name:—(it is) Naqary (Nekariah?), son of Saru-ra-za, his mother being a Phœnician woman of the city of Aradus, (he being) a slave in the crew of a ship of this temple (?), on the boat of the captain Kenura. His overseer said: 'It is the chief military inspector of Pharaoh's—

^{*} The phrase for "salutation" = "to consider or ask about a person's affairs:"

L.P.H,—troops, Khaemapt, that will receive him and cause him to be taken (to his place). I hurry off to the chief military inspector of Pharaoh's—L.P.H.—troops, Khaemapt, and he is deaf to me, saying to me deliberately (?): 'It is the wazîr Mery-Sekhemt that will receive

him, and cause him to be taken (to his place). I hasten to the wazîr Mery-Sekhemt; he is deaf (to me), he and his scribes, saying: 'It is not we who see to it.' I seek out the chief of the boatmen, M——, saying: 'Let the Syrian labourer be taken to the temple of Thoth: do thou undertake that he be delivered to its priest.' I speak with him in the great tribunal.

"Likewise I have heark-ened to the matter of the spell (magic formula) of Thoth, concerning which thou sentest unto me, saying: 'It bringeth not unto me guidance, when I cause it to be followed.' Trouble not thy heart concerning it; for it is good that thou didst send it unto me, that I may cause it to be followed.

"Also, trouble not thy heart concerning the gathering? (arranging?) of corn. I have made enquiry into it, and have found that 3 men and 1 boy, in all 4, make 700 sacks. have conversed with the chief bookkeepers of the granary; I said unto them: 'Take the 3 labourers of the god for work this year.' They said to me, 'We will do it, behold us! We will do it. We will do it. We obey thy command.' Thus they spake unto me. And I am remaining watching them, until they send out to the fields the assessments of the returns (i.e. for taxation purposes). And thou comprehendest all that I shall cause to be done for thee. Now one man makes 200, the fair amount to be done: apply this to 2 men and 1 boy; it makes 500.

LETTER IN HIERATIC EGYPTIAN,

Supposed to belong to the period of Moses and the Exodus. Written by Bak-en-Amun, a scribe, to his master the prophet Rameses of Per-Tehuti (the House of Thoth).

"Now as to this Syrian labourer that is given unto thee, as he is given unto thee in the month of Harvest, thou wilt spoil his Harvest-season for thyself as long as he shall live."

Rameses II., the Pharaoh of the Oppression.

(B.C. 1340; Petrie, 1275-1208.)

A DISCOVERY made at *Deir-el-Bahari* in 1881 included the mummies of some of the greatest of the Pharaohs. Among them was the body of the most famous of them all, Rameses II., the supposed Pharaoh of **Moses**. This remarkable ruler held the throne of Egypt for a period of sixty-seven years, and died at an age of over ninety years. The face is of a highly intellectual type, and indicates great firmness; it is altogether such as might be expected of a man who conquered the whole of Western Asia, the famous "Sesostris" of Herodotus.

HEAD OF MUMMY OF RAMESES II.

Rameses II. was a lavish donor to the Egyptian temples, and especially to that of the Theban Amun at Karnak (pages 100, 101), the greater portion of which was built by him. In return for this support of the priesthood, the body of the old warrior was removed from its tomb and hidden in the cave at *Deir-el-Bahari*, when the priests of Amun fled from Thebes before the advance of the Susian kings of the 22nd dynasty, B.C. 900.

ISRAEL IN EGYPT.—SCENES FROM EGYPTIAN LIFE.

Pithom, the Store-City: Egyptian Granaries.

The Pharaoh who knew not Joseph oppressed the people of Israel, perhaps on account of their association in former times with the Hyksos invaders (cf. Gen. 46. 34), and imposed upon them the task of Ex. 1. 11.

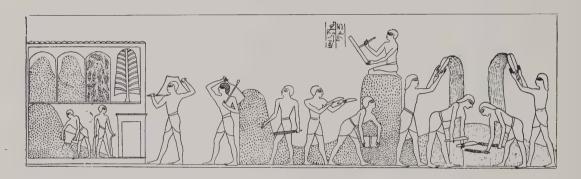

Cf. Gen. 41. 48, 56. building treasure-cities. Such cities were required by the two great kings of the 19th dynasty, Seti I. and Rameses II., for two purposes—to store the tribute brought home from the Asiatic wars, and to form commissariat stores for the large armies going to and returning from Syria. They are similar to the cities of store built by order of Solomon (I Kings 9. 19). The name of Rameses came into prominence with the 19th dynasty; but the monarch who made it celebrated by his long reign of sixty-seven years and his brilliant wars was Rameses II., and it is this monarch who is now generally identified with the Pharaoh of the Oppression.

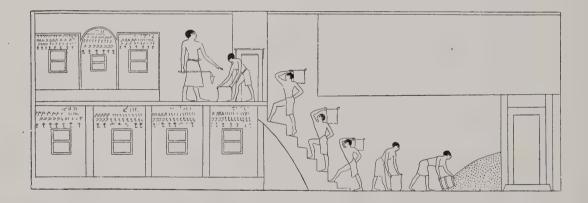

Such an identification was indicated by the fact of one of these storecities being named **Raamses**, *i.e.* Rameses, a designation unknown to the royal personages of an earlier period. In the *Wady Tumilat*, near to the famous site of *Tell el-Kebir*, excavations were conducted by M. Naville in the mound of *Tell el-Maskhuta*, which resulted in the recovery of bricks and inscriptions showing that this was the site of an ancient city whose name was **Pithom** or *Pa Tum*, *i.e.* "the City of Tum or Tmu" (the god of the setting sun), and that the city was founded by Rameses II. A Greek inscription testifies that the ancient name of this city was Heroopolis, or the city of Ero; a name perhaps derived from the old Egyptian Ar (Ari, Aru), "a store-house."

The exploration of the city area showed that it consisted almost entirely of store-houses, massive buildings with walls 22 feet thick. Like the Egyptian granaries represented in the paintings, the only opening

In these bricks without straw we may see the work of Israel in bondage, in accordance with the Biblical statement that the **Pharaoh** refused them straw.

The Egyptian name of the district in which **Pithom** was situated was *Thukut*, which exactly corresponds to the **Succoth** of Exodus.

In the lower scene the labourers are carrying the wheat in bushel measures up a staircase to the roof of the granaries, and pouring it into the chambers below, in the presence of the steward. The capacity of the chambers is marked in numerals on the walls. In the upper scene some are winnowing with wooden shovels, and a scribe sits on a great heap of grain, noting the number of bushels carried to the store-chambers. Before him is written, "The scribe of wheat measures, Tehuti-nefer."

Brick-Making in Egypt by Foreign Captives under Taskmasters.

(Temp. THOTHMES III. Circ. B.C. 1503-1449.)

The annual inundation of the Nile left behind it large quantities of mud admirably suited for the making of bricks, which, dried in the sun, formed a durable building material in the rainless climate of Egypt. The bricks made from Nile mud require straw to prevent cracking; which is not the case with those moulded from the clay of the torrent-beds on the edge of the desert. Kiln-burnt bricks were not used in Egypt until Roman times. Like those of Babylonia (see page 204), the bricks were larger than ours. The one figured below (page 113) measures about 15 inches by 7, and is a little over 5 inches thick; it is made with chopped straw.

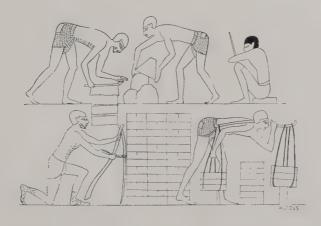

Our illustrations are taken from a series of wall-paintings in a tomb which represent the building of the Temple of Amun at Thebes by foreign captives of Thothmes III. (of the 18th dynasty), the great Egyptian conqueror of **Syria** and Phœnicia. Among the hieroglyphic inscriptions occur the words—

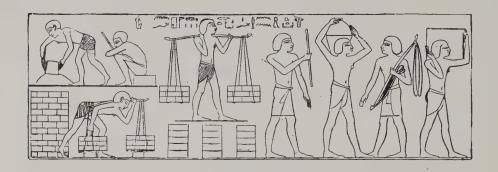

"The taskmaster saith to the labourers, 'The stick is in my hand, be not idle.'"

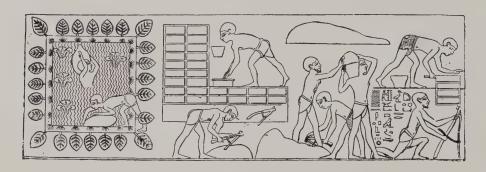

The inscription over the upper picture is—

"Captives whom his Majesty carried away, building the Temple of his father Amun."

On the right of the lower picture it is stated that the work is—
"For the new building of the store-house of the god Amun, of Apt, in Thebes."

Scene II.—Here we see two men fetching water in large jars from a pond full of water-lilies; two others cutting off portions of the clay; another carrying a load of it to the moulder, who is just turning a brick out of his wooden mould; another fixing his cutter; and another settling the bricks in rows to dry. The inscription states that the work is "for the new building of the storehouse of the god Amun of Apt in Thebes."

Captives Dragging a Colossus in Egypt.

(Temp. Usertesen II. Circ. B.C. 2366 (or 2716-2684).)

THAT the ancient Egyptians were well acquainted with practical mechanics, is evident from the vast masses of stone which they managed to transport to distances of hundreds of miles from the quarries. Thus the obelisks of Thebes and Heliopolis, measuring from 70 to 93 feet long, were dragged the whole way from Aswân on sledges by forced labour, in the manner shown in the illustration. The largest of these, which stands at Karnak, weighs about 300 tons, and traversed a distance of 138 miles; while those of Heliopolis (On) were conveyed 800 miles and more. The colossus of Rameses II. at the Memnonium, which when entire weighed over 887 tons, was also brought all the way from Aswân to Thebes. The elevation of obelisks, and of immense stones like the lintels of the doorways at Karnak and elsewhere, some of which are 40 feet 10 inches long and 5 feet 2 inches square, also indicates a marvellous knowledge of mechanical appliances; though we are left in the dark as to their precise nature, for in some instances the use of the inclined plane, which has been suggested, was impossible for want of space.

Our illustration exhibits the transport of a colossus of a grandee ("Tehuti-hotep, beloved of the king"). It is fastened on a sledge with double ropes, twisted together, and kept taut by inserted pegs. Compresses of leather or some other substance are placed between the ropes and the statue, to obviate damage from friction. Hieroglyphics state that the statue is 13 cubits, or 22 feet 21 inches high. It is being dragged by 172 men, in four rows of 43 each, some of whom are Egyptian convicts. others foreign captives, wearing their own distinctive dress. the fourth row are some carriers of grease for oiling the track. Behind these again three men carry a piece of cogged timber for placing, when necessary, under the sledge; and after these walk three taskmasters, stick in hand. The four rows of men at the back of the statue are mer or superintendents of the work. A man is pouring grease on the track from the plinth of the statue; and another, standing on its knees, is beating time to the chant of the labourers, to insure all pulling together. In front of the statue a priest is offering incense (arit sentra). A detachment of soldiers, unarmed, and carrying branches of trees, is seen marching towards the statue, beside the first row of labourers.

Transport of an Assyrian Colossus.

This picture supplies an admirable pendant to the preceding. It is taken from large fragments of sculptured alabaster, vividly representing the transport of one of those huge man-headed winged bulls which were set up as guardian powers in the doorways of Assyrian temples and palaces (see Plate facing page 28). These slabs were brought by Layard from the gallery of Sennacherib's palace at Kuyunjik, which was adorned with a series of similar sculptures. The method of transport is much the same as in the far more ancient Egyptian illustration, the colossus being mounted on a heavy wooden sledge, and dragged along by means of four stout cables attached to the car; but in the Assyrian instance we notice also the use of rollers and levers, which is strangely absent from the Egyptian scene. The men drawing the sledge appear to be captives; and certain differences of costume suggest that they belonged to different conquered peoples. Small ropes, passing over their shoulders, are attached to the four great cables, which are themselves fastened to projecting pins on the front and rear of the sledge. Taskmasters armed with swords and staves are driving them, and the ruthless cruelty of these is painfully illustrated. Behind the sledge, we see the working of the huge lever, used for starting it and helping it over broken ground.

A man, kneeling on one knee, is altering the height of the fulcrum by inserting wooden wedges of different sizes. Below, some are carrying the rollers, over which the sledge has already passed, from the rear to the front. On the colossus are four persons; the first kneeling on one knee and giving the time to the drawers by clapping his hands; the second, with outstretched arm, giving the word of command; the third with a trumpet at his mouth; the fourth bearing a mace. The last three, and four others who are walking before them, are evidently soldiers, as their weapons indicate. Behind the sledge are men drawing carts loaded with ropes and timber, and others carrying other appliances. On the river or canal, at the top of the picture, we see a boat and raft laden with stone, like those still used in the country, and a man swimming on a skin, after the manner described by Xenophon.

Egyptian Musicians and Dancers.

In these scenes we have examples of the guitar, the double **pipe**, the lyre (the **harp** of Gen. 4. 21; Ps. 43. 4), and the square tambourine or **tabret**. They afford some idea of the character of the instruments so frequently mentioned by the writers of the Old Testament, and help us to realize in some degree the state of musical knowledge in the ancient world. Besides the large and elaborately ornamented

harps, four or five other instruments are shown, including the double flute or pipe, the upper part of which is defaced in the third row of figures, but which is perfect in the first. Those who wish to know more about the music of the Bible may be referred to the article by Sir John Stainer, in the Queen's Printers' Aids, revised by the present writer (1897).

Funeral Processions of the Egyptians.

In the lower scene, the richly decorated hearse, with the sarcophagus laid on a bier inside it, stands in the sacred boat, which rests on a sledge; and the whole is being drawn by four oxen down to the sacred lake (cf. page 100) of the nome, or to the Nile, on the western side of

On the prow of the boat is painted the mystic Eye of Osiris; and the hearse is adorned with the hieroglyphs for *Life* and *Permanence*, painted in pairs.

THE first illustration represents the cover of the second coffin of a priest of Amun and Mât (cf. page 99), and prophet of the double heart of Amun. It is painted, as usual, with figures of gods connected with the world of the dead. The other gives the side view of the mummy in its case.

The bodies of **Jacob** and **Joseph** were *embalmed* in Egypt, carried up into **Canaan**, and buried there; see Gen. 50. 2, 26; Exod. 13. 19; Josh. 24. 32.

A RICHLY DECORATED EGYPTIAN MUMMY-CASE.

Anubis, the Egyptian Hermes, tending a Mummy on its Bier.

THE guardian goddesses Nebhātand Asit (Nephthys and Isis) stand in a posture of reverence at the head and feet of the body. The four canopic vases (with the heads of the gods or

genii of Amenti, Amset, Hāpi, Tua-māutef, Qebhsennuf) contain the intestines of the deceased.

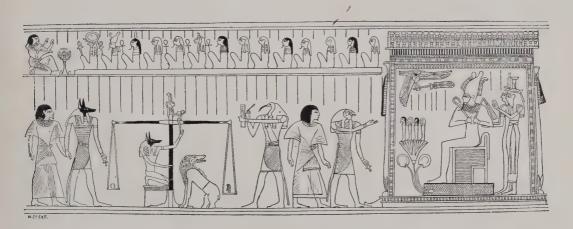

The Soul Reanimating the Body in the Tomb.

THE mummy lies on its lion-shaped bier, tended by Anepu or Anubis, the jackal-headed god who was the Conductor of the Dead. Over it hovers the soul of the departed, symbolized by a human-headed bird, applying the emblem of *breath* to the nostrils of the mummy.

"After Death the Judgment."

Though differing in some details, the general representation of this subject is identical in the Egyptian tombs and papyri. In our two examples, Anepu (Anūbis), the jackal-headed god, is seen weighing the dead man's heart (Egyptian ab, of which the hieroglyph is a two-handled vase) against the ostrich feather, the hieroglyph for Truth and Right (Shu, Maāt), in the other scale. Tehuti or Thoth, the ibis-headed god of letters, is registering the result with reed and writing-palette. Amemt, i.e. the Devourer (of the wicked), a triform monster compounded of crocodile, lion, and riverhorse, keenly watches the recording god, waiting to devour the heart if it should fail to counterbalance the feather exactly.

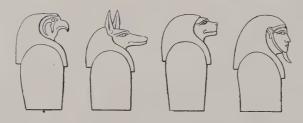

TWO PICTURES OF THE JUDGMENT AFTER DEATH IN AMENTI, THE EGYPTIAN HADES.

The heart of the deceased is weighed against Truth in the Great Balance; and the justified dead is conducted into the presence of Osiris, "the Lord of Eternity." (See Renouf's Book of the Dead, chap. cxxy.)

The bust of Maat, goddess of Truth, rests on the standard of the "Great Balance," in the upper scene; in the lower, a Cynocephalus or dog-headed ape, an emblem of Thoth, occupies the same position (see frontispiece). In the one case fourteen, in the other twelve gods appear, sitting above as assessors of the trial, with a table of offerings before them, by which, in the upper picture, the deceased kneels in prayer (Diodorus gives 42 as the full number of divine Assessors; and this number is actually represented in the Ptolemaic temple of Deir-el-Medineh, Thebes). Another point of difference is that in the upper picture Anepu is seen, on the extreme left, leading the dead man by the hand into the Judgment Hall (the "Hall of Twofold Truth"); in the lower, the deceased and his wife are apparently watching the trial. (The two small female figures which stand in front of the deceased in the lower picture are Meschenit and Renenit, the goddesses of birth and babyhood. The man-headed bird above them is the soul of the deceased man (cf. page 122). Under the beam of the balance stands a figure symbolizing his fate or fortune; above which is a small sphinx.)

To the right of the balance in both pictures, the result of the trial being supposed favourable, the justified person is presented by Hâru or Horus, the hawk-headed god, to his father UASARI or Osiris, the "Lord of Eternity," who sits enthroned in his palace, holding the crook, sceptre, and flail, the symbols of sovereignty, power, and chastisement, and attended by his sister-goddesses Asit and Nebhāt (Isis and Nephthys). From the waters under his feet springs a lotus, supporting the four genii of Amenti, the Egyptian Hades, above whom, in the upper picture, floats the winged Eye of Osiris, holding a flabellum or fly-flap. In the lower scene, the deceased kneels at a table of offerings before the great god.

When found righteous, the deceased Egyptian received the title of "Osiris," being in some sense identified with the god, into whose presence he was admitted. Henceforth he was believed to enjoy plenteous fare, and an abode in the Sechet hotept or Elysian Fields.

THE FOUR GENII OF AMENTI.

The Goddess of the Sacred Fig-Sycamore Tree presenting Fruit and Drink to a Deceased Pair.

A SCENE often repeated in the wall-paintings of the Egyptian tombs. Sir Gardner Wilkinson describes it as follows:—

"The goddesses Athor and Netpe [Ḥat-ḥart and Nut] in their respective trees, the Persea and Sycamore-fig, frequently presented the virtuous after death with the fruit and drink of heaven; which call to mind the ambrosia and nectar of Greek fable."

Dr. Birch, in his notes to Wilkinson's Egyptians (Vol. IV., page 119), writes:—

"Athor, in fact, was identified with Nut, as the goddess of the celestial water or ether, and as such gives the bread and water of life out of the sycamore, to the soul which thirstily drinks the living waters flowing from her vase."

"The Persea was sacred to her, as the sycamore to Nut; and in the funeral subjects of the Theban tombs she is seen performing the same office to the deceased and his friends as that goddess—giving them the fruit and drink of heaven."

The representation also reminds us of the Hebrew "Tree of Life" (Gen. 2. 9; 3. 22; Prov. 3. 18; 11. 30), and of the similar supernatural trees of Prophetic and Apocalyptic vision (Ezek. 47. 12; Rev. 22. 2).

THE EXODUS.

RAMESES II., after his long reign, was succeeded by his son Meneptah, or Mer-en-Ptah, *i.e.* beloved of Ptah, who had lately been associated with him on the throne. His father's enormous expenditure and costly magnifi-

cence had impoverished the realm, and left him an embarrassed heritage (cf. in Judah, the case of Solomon and Rehoboam some centuries later). Of Meneptah's reign we know but little; but an inscription in the Temple of Amun, at Thebes (page 99) seems to imply by the phrase "Put away the dejected heart from thee," that he was lacking in energy. During his reign the Libyan tribes invaded the western portion of Lower Egypt. Probably it was then that the watch over the Israelites was

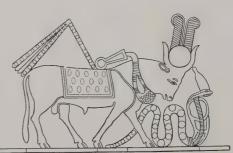

removed. On returning from this expedition the Egyptian army pursued the Israelites. It is not to be expected that we should find any Egyptian account of the disastrous result. The Biblical narrative (cf. Ex. 14. 23, 28) does not state that the Pharaoh himself perished in the Red Sea.

At the close of this dynasty, the Egyptian power once more became weak; and probably this weakness enabled the Hebrew people to conquer the Canaanites, who had been disabled by the terrible chastisements of Rameses II., and were disunited among themselves.

In February 1896 Petrie explored the funeral temple of Meneptah at Thebes, and had the great good fortune to unearth both the statue and also the inscribed stele, of which we give copies, pages 128–130.

and indeed "the earliest certain allusion to any historical connexion with them on any monument or record outside of the Old Testament" (Petrie). Some think that it offers a striking parallel to the narrative of Exod. 1. 10-22; but this opinion rests on misinterpretation of the text.

Shishak or Shashank I., the Invader of Judah in the Time of Rehoboam.

(Circ. B, c. 960.)

On the southern external wall of the great temple of Amun at Karnak (Thebes), Shashank I., the **Shishak** of the Bible, who was the first king of the 22nd dynasty, has recorded in characteristic Egyptian fashion the results of his expedition against Judah, which, according to the brief

account of I Kings 14. 25–28, took place in the fifth year of **Rehoboam**, the son and successor of **Solomon**, and which was probably instigated by **Jeroboam**, king of Israel, who had been a refugee at his court from the tyranny of Solomon (I Kings II. 26–40). The Biblical writer gives

no details of the campaign, except the plunder of the Temple treasury; but **Shishak** has left us a lengthy list of about a hundred captured cities, mostly Judean, though some of them belong to the northern kingdom. Among the names are the Egyptian equivalents of **Abel**, **Adullam**, **Ajalon**, **Beth-anoth**, **Beth-horon**, **Beth-tappuah**, **Gibeon**, Jud-hamālek (cf. page 138), **Megiddo**, **Shunem**, **Taanach**, etc.

In the sculpture, the giant-form of the conqueror, Shashank Meri-Amun, is seen grasping with left hand the ends of the ropes passed round the necks of long rows of captives, whose arms are tied behind their backs; and with his right threatening with blows the suppliants who kneel before him with uplifted hands. The names of the conquered cities and districts are graven in the ovals attached to each prisoner. Many of these names have unfortunately been much damaged, as will be seen from the enlargement below. (Yud-hamālek is the third name in the third row from the top.)

Sword of Rammanu-Nirari I., King of Assyria.

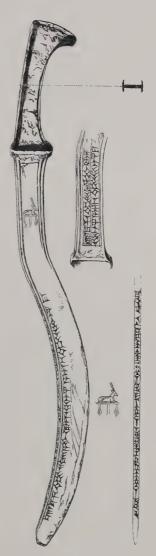

(Circ. 1300 B.C.)

This interesting weapon is of bronze, and the hilt was originally inlaid with ivory and jewelled. It is sickle-shaped, like the sword of Bêl in the Babylonian sculptures, and is $21\frac{1}{8}$ inches by about $1\frac{1}{8}$ inches broad.

It is inscribed: Ekal Rammânu-nirāri shar kishshati abil Budu-ili shar Ashshur abil Bêlnirāri shar Ashshur-ma, "Palace of Rimmonnirari, king of the world, son of Budu-il, king of Assyria, son of Bel-nirari, king of Assyria." These three sovereigns reigned from about B.C. 1375 to 1300. Rimmonnirari was one of the greatest of the early Assyrian kings. He vanquished Nazi-Murudash, the king of Babylonia, and annexed part of his territory. The sword seems to have been found by Arabs at Kileh-Sherkat, the site of Ashshur, the old capital of Assyria. It belongs to Col. Hanbury, and an account of it was given some years ago by Mr. Boscawen, in the Transactions of the Society of Biblical Archæology. In shape it bears no likeness to the straight two-edged sword so often represented in the Assyrian bas-reliefs,

some examples of which are figured on p. 199, but it more nearly resembles the falchion-shaped weapons of the Egyptians, as annexed. The one with the figure of Anubis is of bronze.

OLD TESTAMENT ETHNOGRAPHY.

Ancient Chaldeans or Accadians (better Sumerians).

The two heads here reproduced were unearthed by M. de Sarzec at *Tell Loh*. They are life-size, and are of the same material and workmanship as the statues of Gudea, discovered at the same time and place (see page 54). Very discrepant accounts have been given of them. Menant and others have fancied that a distinct racial type, viz., that of the primitive

non-Semitic (Turanian, or even Tartar) Chaldean people, was plainly to be recognised in them. But the unusually large eyes and exaggerated eyebrows, the strongly defined chin, and the nose, which, when unbroken, was probably not flat but somewhat arched, like those of the other heads of the same period, can hardly be considered distinctively

Tartar features; and while it is natural to suppose that these and the other heads found by De Sarzec represent average specimens of the

Chaldeans of their period, so far as the sculptors had skill to pourtray them, it is well to remember M. Heuzey's caution, when we are looking for special indications of race in sculptured remains so ancient as these: "It is only subject to the greatest reserve that we can venture to say anything as to the ethnography of the types created by sculpture, especially when those types are archaic, and therefore exposed more than all others to the influence of school conventions. It is a common habit with antique sculptors to allow traces of their work in its rough shape to subsist in the finished creation. In all countries the march of art has been from square and angular to round and

flowing shapes, from short and thick-set to graceful and slender proportions."

Typical Heads of the Nations of Canaan and the Adjacent Countries.

THE walls of the great temples of **Egypt** are adorned with representations of the mighty victories of the Pharaohs; and, owing to their habit of recording conquests by typical portraits of the races against whom the armies of Egypt fought, from these sculptured tableaux we are able to obtain a valuable series of racial illustrations. The sculptures of the great temple of Karnak, dedicated to the god Amun, supply us with portraits of most of the races of **Canaan** against whom Thothmes III., of the 18th, and Rameses II., of the 19th dynasty, waged war. This valuable collection of ethnographic representations has been photographed by Professor Petrie, and his casts of them are preserved in the British Museum, from which some of the illustrations here given have been made. (The rest are from the pencil of the Rev. H. G. Tomkins.)

dynasties, presents a high type of features.

It is now believed that the dynastic Egyptians were members of a white race, which entered Egypt from Pûnt or South-west Arabia and the opposite coast of Somâli-land, at a very remote period.

During the later dynasties the Egyptian type became much changed by intermixture with Asiatics and negroes.

The Philistines were called by the Egyptians the Pulsata or Pulista. The type of the face is very remarkable; so singular,

indeed, that it is extremely difficult to class them with other races. There is, however, a resemblance to the early inhabitants of **Cyprus** and of the coasts of Asia Minor, which enables us to recognise in the **Philistines** another of the numerous bands of wandering pirate tribes of the Eastern Mediterranean, which had first obtained a settlement in Lower Egypt, and then on the coasts of **Syria**.

representations of this powerful people. The **Amorites** are a handsome type, of fair reddish complexion, with blue eyes, red beard and eyebrows, but black hair. The opinion of ethnologists is almost unanimous in regarding them as belonging to an old white race inhabiting the shores of the Mediterranean, of which the only existing type may be preserved in the Kabyles of North Africa. In early times they were the

THE SO-CALLED MONUMENTS OF THE HITTITES.

The system of hieroglyphic writing exemplified by these remarkable monuments has not yet been deciphered, although many scholars have, from time to time, proposed their own solutions of the problem, among the latest Professor Jensen, of Marburg, who calls the inscriptions "Cilician." His theory, however, has been ably criticized by Professor Hommel, who connects the Hittites with the Scythians, and the first appearance of the Iranians in history; professedly starting from a paper published by myself in the Proceedings of the Society of Biblical Archaeology ten years ago, entitled Iranian names among the Hetta-Hattê: see his monograph Hethither und Scythen, reprinted from the Sitzungsberichte der königlichen böhmischen Gesellschaft der Wissenschaften (Prag, 1898). The system of writing is probably not altogether unconnected with the original pictorial script of Babylonia.*

The sculptured stones represented below are some of the fruits of the late George Smith's excavations at *Gerâbîs* on the Euphrates, the

site of the ancient **Carchemish** (Jer. 46. 2), which was taken and destroyed by **Sargon**, king of Assyria, B.C. 717. The first (page 141) apparently presents the figure of a king, holding a sceptre; and though much defaced, the work is obviously Assyrian in style, and need not be much older than the 8th or 9th cent. B.C.

The same remarks apply to the one on this page the subject of which we recognize at once from its likeness to the familiar Assyrian sculptures (page 33); while of the third, little more can be said than is indicated in the title.

FRAGMENT OF BAS-RELIEF FROM GERABIS, THE ANCIENT CARCHEMISH.

A cherubic figure in Assyrian style. Hittite characters in four lines in front.

PORTION OF ONE SIDE OF A STONE DOORWAY, WITH SUPPOSED HITTITE INSCRIPTION.

[From Carchemish on the Euphrates, the chief Hittite capital and commercial emporium.]

The stone is a piece of basalt, $39\frac{1}{2}$ inches in height, cut into vertical steps, each 22 inches, $8\frac{3}{4}$ inches, $8\frac{1}{2}$ inches, and 7 inches wide. The steps are here separated, and arranged as it may be supposed the lines of the inscription were intended to be read, from right to left and from left to right alternately (i.e. always towards the animal faces). The longest panel, which was probably within the doorway, is 22 inches wide in the longest line. In this, as in most of the other inscriptions, the characters are cut in relief. The Stone Bowl (page 140) and the Boss of Tarkondemos (page 145) are the principal exceptions, the symbols and figures on these being incised. It seems probable that the group with the bird (an eagle?), which occurs near the beginning of the second line, and again towards the end of the fourth, contains the name of Carchemish.

Rock Sculpture of a Local Baal, a God of Corn and Wine, with supposed Hittite Inscriptions.

This fine sculpture is carved on the chiselled surface of the red limestone rock, which rises about 40 feet from the water's edge of the river of *Ibrîz*, a place about three hours S.E. of *Eregli*, in **Lycaonia**. A king or satrap is praying to a god (perhaps the god of the stream)

whose hands are laden with the bearded wheat and grapes which the neighbourhood still yields in abundance. The design of the figures is good, and stronglysuggestive of Assyrian influence, like the sculptures from Carchemish. The god is about 20 feet high, the worshipper about 12 feet.

The existence of this highly curious memorial of the past was first discovered by the Rev. E. J. Davies, M.A., and published by him in the Transactions of the

Society of Biblical Archaeology, Vol. IV. part 2, 1876. The horned cap of the god should be noticed as an Assyrian feature (see page 30). "He wears boots turned up in front, and bound round the leg above

the ankle by thongs, and a piece of leather reaching half-way up the shin, exactly as it is worn to this day by the peasants of the plain of **Cilicia** round Adana" (*Davies*). The hieroglyphs between the head and arm of the god, and those behind the king, no doubt conceal the names and titles of each. There is another inscription in the same character below the figures, just above the water's edge.

The Bilingual ("Hittite" and Assyrian) Boss of Tarkondemos.

A THIN concave circular silver boss, with an incised figure of a king or warrior holding a lance or staff, and an identical "Hittite" inscription before and behind, surrounded by an inscription in the cuneiform cha-

racter. This object, which perhaps originally covered a knob of a staff or dagger, was in the possession of M. Alexander Jovanoff, a numismatist of Constantinople, some 40 years ago. The late Dr. Mordtmann published a facsimile of it in 1863. It has since disappeared, but not before an electrotype of it had been taken at the British Museum, where it was offered for sale, but rejected as a possible forgery. The cuneiform legend has been usually read: Tarquimme king of the Land of Erme.

SUPPOSED BILINGUAL HITTITE AND ASSYRIAN INSCRIPTION.

Now, however, Hilprecht, with whom Hommel agrees, would read Mitan (= Middanni) as the name of the country. Sayce thinks it belongs to the age of **Sargon**, circ. B.C. 721. The name of "Tarqutimme" seems to be identical with that of Tarkondimotos (*Dio Cassius*) or Tarkondēmos (*Plutarch*), a Cicilian prince in the time of Augustus.

Terra-cotta Seals and Seal-Impressions.

(Cf. Job 38. 14; Cant. 8. 6.)

THE interest of these objects lies in the fact that the inscriptions on them are obviously in the strange and still undeciphered character known as Hittite. The eight smaller ones, arranged in the two rows

at the bottom, are seal-impressions, and were discovered in September 1851 by Sir A. H. Layard in the Record Chamber of the Palace of Assur-

bani-pal at Kuyunjik. The last three of them bear the same legend. which Professor Savce has identified with the name of Sanda-sarmê, a king of Cilicia, who visited Nineveh in the time of Assur-bani-pal, and gave his daughter to that monarch. Savce thinks these seals were attached to the marriage-contracts (P.S.B.A., June 1882).Their date would thus be about the middle of the 7th cent. B.c. But this ingenious conjecture is still unverified. These eight objects are now in the British Museum.

The others are in the collection of M. Schlumberger of Paris, who bought them of a dealer in Constantinople, about 1879, to whom they had been brought from Asia Minor. Most of them are conical in shape, with a hole near the point, and are inscribed at the larger

end. M. George Perrot published an account of them in the *Revue Archéologique*, December 1882. See also *Proc. Soc. Bibl. Arch.*, Vol. VI., page 111, and *Transactions*, pages 422-424.

glyphs, from the Turkish castle of *Merash* or *Marash* in the Taurus, about 100 miles N. of Aleppo. Drawn by Mr. Rylands from a cast in the library of the Society of Biblical Archæology. The original has been moved to Constantinople.

For the sake of comparison, I add a drawing of an Assyrian lion by

the same hand. It will be immediately evident, even to an untrained eye, how far the model surpasses the diminutive copy in boldness and freedom of design, in power of execution, and, in spite of certain con-

ventional features characteristic of Assyrian art, in the truthful delineation of nature.

Babylonian Boundary Stones or Landmarks.

(Circ. B.C. 1150-1100.)

The boundary stone or landmark was one of the most ancient institutions in **Chaldea**, no estate being considered safe without one or more such being placed upon it. The stones were always boulders or natural stones, of which the surface was sufficiently smooth for the inscription. The title-deeds to the land, with particulars and dimensions of the ground, were inscribed on the stone; and all the gods of the pantheon, especially those of the household of the owner of the land, are invoked to curse any person who injures or removes the landmark. (With this compare

Deut. 27. 17;

the Biblical curse against such a one as removed his neighbour's landmark.) The stones are often mentioned in deeds, and are analogous to the Hebrew

"Stones of Witness."

The stones set up did not always relate to private ownership; e.g. the first of the two here figured contains the charter of freedom granted to a certain territory called BIT-KARZIYABKU, by Nebuchadnezzar I., king of Babylon, about B.C.II50.

The other records the sale of a piece of ground by AMEL-BEL to MARDUG-NĀṢIR, in the time of Mardug-nādin-aḥi, Nebuchad-

The Religion of Babylon and Assyria, as Illustrated by the Seal-Engravings.

I.—THE MOON-GOD.

Ur, the original home of Abram, was the seat of the worship of Sin, the Moon-god, called by the old Sumerians En-zu, "Lord of Knowledge"; a name which Hommel has identified with the Egyptian Chon-su. The great temple of Ur was built by Ur-ba'u, about B.C. 2800 (see page 63). The same god had a famous temple at Harran, the place where **Terah** and **Abram** settled after leaving **Ur** (Gen. 11. 31).

Sin was naturally the god of nomadic tribes, whose journeys are usually made by night; and it is generally held that mount Sinai was so called, as being an ancient "high-place" of Sin. The antiquity of the worship of Sin, and the reverence in which he was held, are indicated by the fact that the great goddess Ishtar, universally adored by the Semitic peoples, is called "the daughter of the Moon-god."

The first of the two small Seals here given shows Sin seated on his throne, holding a cup of wine in his right hand (Bel and Dragon, vv. 3, 6 sqq.). A priest stands praying with uplifted hands before him;

and, behind the priest, a worshipper whom he has brought into the god's presence. The symbol of the

No. II.—WORSHIP OF SIN AND SHAMASH.

crescent moon attached to an inverted tree, suggesting the waxing or monthly growth of the moon's disk, establishes the identity of the god.

The second Seal shows Sin, the moon, and Shamash, the sun, enthroned opposite each other, and each holding a bowl of food or wine in the right hand. A king, holding a sceptre in one hand, and stretching forth the other towards Shamash, stands between. The symbols of the star and the crescent indicate the sun and moon respectively. Behind the

Sun-god is a tree with seven branches, suggesting perhaps the week of seven

days, regulated by these deities (Fifth Tablet of Creation series; Gen. 1. 14–18). See also SACRED TREES.

The third Seal (of lapis lazuli) exhibits the worship of two eagle-headed deities, wearing feathered kirtles, and attended by priests in the like strange garb. An antelope and sacred tree fill up the picture.

No. III.—WORSHIP OF EAGLE-HEADED DEITIES.

[An old Babylonian seal of lapis-lazuli, in Mr. Ball's collection.]

II.—THE SUN-GOD.

The worship of the sun is well illustrated by these three Seals. Most happily for the identification of the subject, on the first Seal the god, who reappears on the second without a name, is designated DIMMER UTU (or

No. I.—THE GOD OF THE MOUNTAINS (Il Shadde),

BABAR), DIMMER SATUM, the Sungod, the god Shaddai.

SATUM is a Babylonian pronunciation of shadim or shadde, "mountains"; and is equivalent also to SATI, which is

explained bâmâtu, "highplaces, hill-tops" (= Heb. bâmôth). There can be little doubt that this old Babylonian title is the origin of the enigmatical Hebrew **Shaddai**, rendered "Almighty" in our version. El Shaddai, Gen.

17. I (A.V. the Almighty God), Exod. 6. 3 (A.V. God Almighty), exactly corresponds to the Sumerian DIMMER SATUM, Assyrian il shaddê. According to Amos 4. 13, God walks on "the bâmôth (A.V. high-places) of the earth."

No. II.—RUDER TREATMENT OF THE SAME SUBJECT AS No. I.

The great doors of heaven, surmounted by lions (representing perhaps, as in Egyptian mythology, Yesterday and To-day), are held open by attendant deities; and the morning sun is seen climbing over the mountains. Rays of light rise from his shoulders, and

he grasps a recurved sword; details which are also present in No.III. His royal sceptre, with a head like the one dedicated to the Sun-god of Sippara by Sargon I. (see page 51),

stands by the door on the left in No. I.; in No. II. he holds it in his left hand.

(It is possible that the scene above described represents two priests opening the doors of a shrine, within which the Sun-god was thus exhibited as rising over the mountains at day-break. The figure with folded arms on the right in No. I. would then be a worshipper.)

No. III. shows the same god, apparently ascending a temple-tower in four stages. Before him stands a sceptred king, in an attitude of rever-

ence. Behind the god is an altar, on which is the linear symbol of grain repeated. Two tall figures, wearing shaggy hides—like the leopard-skins of the Egyptian priests—stand with raised arms, about to strike at the neck of a half-naked man who kneels between them. On one side of the victim is a bird of prey, ready to devour his flesh; on the other, a small antelope—a symbol of sacrifice. Above him is a trace of the winged solar disk. Clearly the scene represents a human sacrifice, either actual or symbolical (cf. Jer. 7. 31; 19. 5; 2 Kings 3. 27; 16. 3; 21. 6).

No. III. IN THE ROUND. (Actual size.)

III.—THE GODDESS ISHTAR (Ashtoreth).

The great Oriental Venus, under one or other of her names—Ishtar in Assyria, **Ashtōreth** in Canaan, and Aphrodite amongst the Greeks—was common to all the religions of Western Asia; it is, however, from Babylonia and Assyria that we obtain most information regarding this widely prevalent form of worship.

The cultus of the goddess Ishtar is extremely complex in its character, owing to the fact that in Assyria especially she was the goddess par excellence, and absorbed the attributes and epithets of many other goddesses of the older creeds.

The various forms in which she appears there may, however, be thus distinguished: she was the celestial goddess, the goddess of love, and the goddess of war.

In her celestial character the goddess represents, first, the crescent moon, and is called the "Daughter of the Moon-god." In this character she appears in the legend of the descent of Ishtar into the under-world in

search of her lover **Tammuz**, or Adonis; in this character, as *Queen of Heaven*, we find her worship practised by the

Ezek. 8. 14; Jer. 7. 18 & 44. 15-28. as Queen of Heaven, we find her worship practised by the Hebrew women and rebuked by Ezekiel and Jeremiah.

The weeping for Tammuz, the Dumuzi of the Babylonians, was a great festival in Phœnicia, especially in later times in the glen of Abaka, "the vale of weeping," at the source of the Adonis river in the Lebanon. Tammuz was the youthful summer sun, the lover of the youthful moon, Ishtar, who was killed by the cruel tusk of winter. It was in this celestial character that Ishtar appeared as the "two-horned Ashtōreth" (cf. the name Ashteroth-Karnaim, i.e. the Ashtoreths of the two horns, Gen. 14. 5) with a crescent moon on her head like the Egyptian

goddess Isis. The cakes offered to the Queen of Heaven are often mentioned in the Babylonian religious texts. She was also the goddess of the planet Venus.

The second character of Ishtar, as the goddess of love and lust, is one of which we

ISHTAR, THE GODDESS OF LOVE.

have many examples in the Assyrian inscriptions. It was her special character as the Ishtar of Erech. The story of her amours is told in the sixth tablet of the Epic of Nimrod, where, like the Greek Circe, Ishtar changes her lovers into animals, by way of punishing them. Her temptation of Anu's gardener may contain the germ of the story of the Fall. Gilgamesh reproaches her thus:—

"Thou didst love Ishullanu, the gardener of thy Sire,
Who constantly brought thee precious things (dainties),
Daily adorning thy table.
But when he lay down to sleep, thou wouldst bind (ensnare) him:—
'My Ishullanu! come, let us eat (enjoy) thy manly strength,
And let thy hand * come forth, and touch thou our middle!'
Ishullanu answered thee:—
'Me—what askest thou of me?
Mother, thou hast not baked; I eat not!
The food I shall eat is bad † and bitter;
Cold, numbness, darkness!'"—(Epic of Nimrod, Tab. VI., Col. II., 20 ff.)

In her character of goddess of war, Ishtar is but little met with in the Scriptures, being a distinctly Assyrian goddess, whose chief seat of

ISHTAR, THE GODDESS OF WAR.

worship was in the city of Arbela. In this form she is represented as armed with the bow.

^{*} An euphemism: cf. Isa. 57. 8.

A Stone Tablet pourtraying the Worship of the Sungod, and bearing an Inscription of Nabû-apla-iddina, King of Babylon.

(Circ. B.c. 879-853.)

ABÛ-HABBAH, where this monument and other important remains of antiquity were found by the veteran explorer, Mr. Hormuzd Rassam, lies about 16 miles S.E. of Bagdad, and is the site of the old Babylonian city called SIPPAR in the inscriptions, the Sipphara of the Greek writers. The stone is about II½ inches high by 7 inches broad and 2 inches thick. A grey terracotta box, inscribed on each side with words meaning Image of Shamash, the great Lord, Who dwelleth in E-Barra, some clay moulds of the upper portion of the stone, and two inscribed cylinders of Nabonidus were found along with it, buried beneath the asphalt pavement of the ruined temple.

In the inscription, Nabû-apla-iddina, or Nebo-baladan, as the Israelites would have called him, relates the former destruction of the sanctuary by the Sutû, who are thought to be the **Shoa** of Ezek. 23. 23, and his own restoration of it and of the services and sacrifices. The vestments to be worn by the god on special days, e.g. the 7th Nisan, are enumerated, ending with the statement, Total: six splendid robes of costly material, the King's Gift (Col. VI. 5, 6).

About 620 B.C., NABOPOLASSAR, the father of Nebuchadnezzar, again restored the temple of Sippar, and by his orders the box was made for this stone, and also the moulds of the obverse, on the back of one of which he recorded his work. Finally, NABONIDUS, the last king of Babylon, also repaired the temple, depositing his two cylinders as a memorial of the fact.

This inscription is far from easy. I have translated the portion shown in the illustration from the text as published in *The Cuneiform Inscriptions of Western Asia*, Vol. V., Plates 60, 61. Mr. Pinches was the first to describe the stone: see *T.S.B.A.*, Vol. VIII., Part 2.

Translation.

SHAMASH, the great Lord, Who dwelleth in E-BARRA which is in SIPPAR, which owing to the troubles and confusions of the land of ACCAD the SUTÛ-folk, an ill foe, destroyed, wrecking the sculptures: His laws were forgotten, and His figure and His ornaments disappeared (lit. fled out of hands), and none was seen anymore. SIMMAS-SHICHU, king of Babylon, purposed to rebuild it, but He (the god) gave him not His countenance: His image and His ornaments he found (lit. saw) not; but the . . . of the Lord's Presence he . . . , and reestablished His Continual Offering. E.Kur-shûma-ibashshî, the Pontiff of Sippar, the Elder (?), he appointed to worship (?) in Bît-Ḥu.SHUL.ḤI (?). Under KASHSHÛ-NADIN-AHI the king, that Continual Offering was cut off, and the Incenseoffering ceased. Under E-ULBAR-SHÂKIN-SHÛMI the king, E.Kur-shûma-ibashshî, the Pontiff of Sippar, the Elder, [Col. II.—] went before the king his lord: "The perpetual offering of Shamash hath ceased!" said he.—One cab of food, one cab of sesame wine, the victual of the SAG-ZAL (Chief Anointer?) of E-Sag-gil, out of the perpetual offering of Bel, for Shamash he (the king) appointed; and unto E.Kur-shûma-ibashshî, the Pontiff of Sippar, the Elder, he showed favour. The left portion of the garden-land on the border (?) of Gibilki (New Town?) which is within Babylon, unto Shamash he gave, and put E.Kur-shûma-ibashshî, the Priest of Sippar, the Elder, in charge of it.

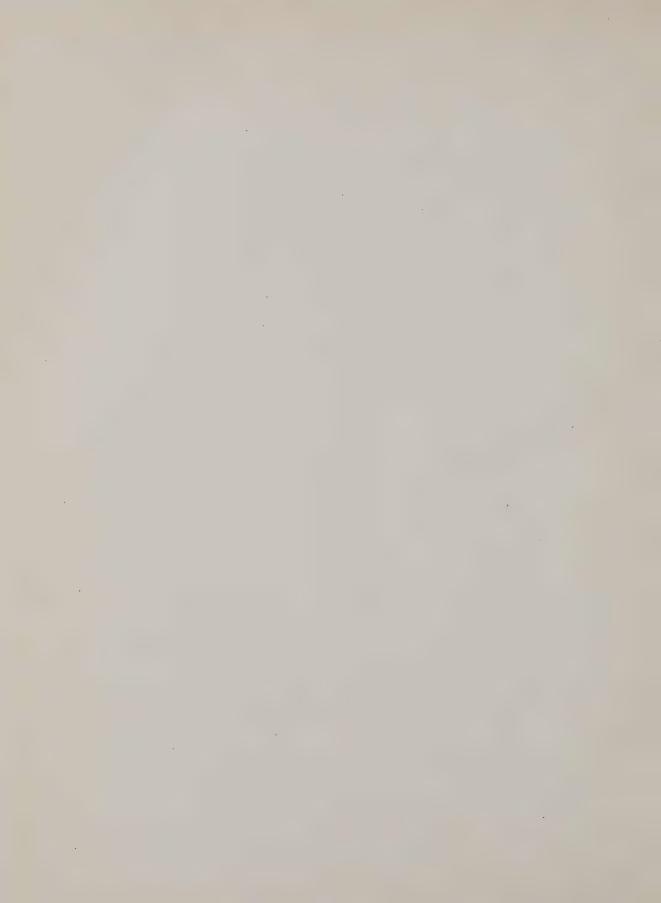

Afterwards, Nabû-apla-iddina, king of Babylon, the called of Merodach, the beloved of Anu and Anatu, the rejoicer of the heart of Erua (Zêrbânitu), the brave hero, who came (?) to the kingdom, the bearer of the strong bow, the overthrower of the wicked foe the Sutû-folk whose sin was heinous; whom—that he might avenge the land of Accad, make the towns inhabited, [Col. III.—] found the sanctuaries, carve the carven work, fulfil the divine laws and the statutes, reestablish the Continual offering, make splendid the Freewill-offerings,—the great Lord Merodach invested with a righteous sceptre to execute the shepherding of the people:—Shamash the great Lord, Who had long been angry with the land of Accad (and) had turned away His neck, in the reign of Nabû-apla-iddina king of Babylon did show compassion, and turned His face ağain. A sculpture (or model) of His image in tinted clay (?), His make and His ornaments, was found on the bank of the Euphrates, on the western side. Nabû-nadin-shûmā the Pontiff

Cf. 2 Kings 22. 8. of Sippar, the Elder, of the seed of E.Kur-ibashshî, the Pontiff of Sippar, the Elder, the sculpture (or model) of that image [Col. IV.—] unto Nabû-apla-iddina, the king his lord, showed; and Nabû-apla-iddina king of Babylon commanded him to make that image.

In the sculpture, as will be seen, the Sun-god sits on a carven throne, in a shrine or Holy of Holies. In his right hand he holds a symbol indicating the straight course of the sun across the heavens. (But cf. the Egyptian Q shen, circle.) Above are the symbols of the sun, moon, and the planet Venus, under which, and opposite the horned tiara of the god, is written, "Tiara of Shamash the Lofty of Eyes" (cf. Isa. 3. 8). The first line of inscription, above the symbols of the heavenly bodies, reads: "Sin, Shamash, and Ishtar, who dwell in Ocean (Zu.AB)." The two little figures under the throne are composite, and may be human-headed apes; cf. the Egyptian ape-attendants of the Sun. Before the shrine is an altar with a large solar disk, connected by ropes with two small figures on the top of the shrine (perhaps the genii who guide the sun along his celestial path). A priest is presenting the king to the god. Behind

stands a third person, with hands uplifted in prayer. Over them we read: ŞALAM SHAMSHI BELI RABI ASHIB E-BARRA SHA KIRIB SIPAR, i.e. "Image of the Sun-god, the mighty Lord, Who dwelleth in E-BARRA (= Bît-shamshi, the House of the Sun; cf. Beth-shemesh) which is in Sippar."

SYMBOLS OF THE SUN, THE PLANET VENUS, AND THE MOON

Seal of Arad-Nabium.

As pointed out by Lenormant and Mr. Tomkins, this fine Seal seems to offer a striking parallel to some of the principal details of

Ezek. 1. the imagery of Ezek. 1. It represents a god, like the Sungod in the preceding illustra-

tion, sitting on a throne which is supported by four winged man-headed bulls or **cherubim** (though only two are visible), on the deck of a boat, beneath which appear the waters of the ocean. This recalls the expression of the Sun-tablet from Sippar: "Sin, Shamash, and Ishtar, who

BOAT-GOD.

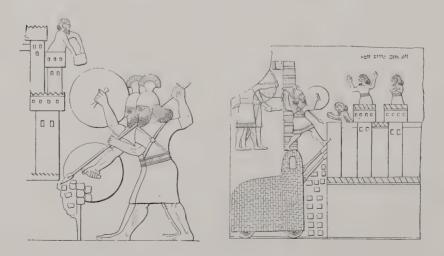

dwell in the Ocean." The heavenly bodies appear to rise out of the ocean, and to descend into it again. Hence, Ocean and the Deep (Apsû and Tiâmat; page 2) are the parents of the gods of light. Hence also the classical myth of Venus rising from the sea, to which the subject of this Seal may present a parallel; for the planetary symbol is seen on each side of the throned god, and the terminal figures of the boat and the two emerging from the waves remind us of the Tritons of Greek sculpture, and may be supposed to be lifting the god and his ark above the water. Behind the seated god stands a small figure, who perhaps represents his divine messenger. A larger figure on either side appears to be making offerings. The boat terminates in human half-figures, and two others are seen in the water below. Possibly, the former pair are intended for oarsmen. The Seal belonged, as the inscription indicates, to Arad-Nabium son of , the servant (i.e. worshipper) of Nin-si-anna (i.e. Ishtar).

ASSYRIAN WARFARE AND MILITARY ENGINES.

The wheeled tower, from within which the battering-ram is worked, also carries bowmen and shield-bearers. Bricks or stones are falling from the breach in the wall of the beleagured place. The king leads the assault in person, attended by his **Tartan** or Commander-in-Chief, his **Rabshakeh** or chief of the officers, and his **Rabsaris** or chief eunuch.

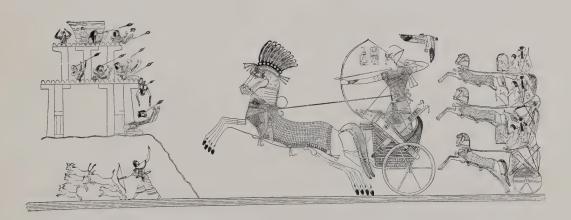

With this fine specimen of Assyrian sculpture compare the Egyptian wall-painting below it of "Ramessu Meri-Amun, User-Maāt-Rā, sotepen-En-Rā," i.e. Rameses, beloved of Amun, Potent by the Law of Ra, Chosen of Ra (= Rameses II., see page 105), and his three sons assaulting a city in chariots (Isa. 31. 1) some 400 years earlier.

Limestone Monolith of Assur-nāṣir-pal II., King of Assyria.

(Circ. B.C. 885-860.)

LAYARD found this fine monument in the ruins of the N.W. palace at Nimrūd, standing on a plain square pedestal, apart from the wall, with

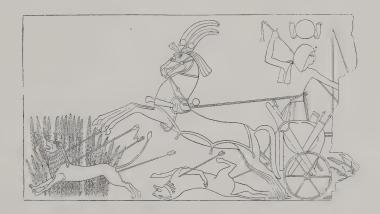

the altar before it. The altar, which has lion's feet and is much like a Greek tripod, may have been used for the worship of the royal image.

Within the arched frame incised in the stone the king is seen, clad in his sacrificial robes. Round his neck he wears the four sacred symbols of the crescent, the star, the trident, and the cross. A knotted cord girdles his waist, above which are shown the hilts of three daggers. In his left hand he holds a mace or sceptre, while his right is raised, with the forefinger extended. The position of the hand is probably a form of worship not unlike that used by some of the human figures when near the sacred tree. He seems to be adoring the symbols of the five planets which are sculptured between the head and the right hand.

The block is entirely covered, except on the sculptured parts, with well-graven inscriptions relating the history of the king.

Royal Hunting Scenes.

THE old Egyptian and Assyrian kings were as proud of their feats in the chase as in the battlefield. In Gen. 10. 9 the legendary founder of the Babylonian monarchy is called a mighty hunter before the Lord (cf. page 44, supra).

AN EGYPTIAN LION HUNT.

The superior truth of the Assyrian portraiture of the royal beast becomes manifest at a glance. It is evident that the Assyrian sculptors

ASSUR-NASIR-PAL HUNTING THE LION.

were familiar with lions. The artists may have been permitted to witness some of the royal hunts; they may also have made their sketches from captive specimens (see opposite). The lions of Assyria were gradually thinned down, and perhaps became extinct in the country. Individual kings killed great numbers of them; thus, Tiglath-pileser I. (B.C. II20), boasts of having slain as many as nine hundred and twenty lions. The passage is worth translating, as it informs us what other large game the old kings hunted.

"NINIB and NERGAL gave into the hands of my lordship their own mighty weapons and august bow. At the bidding of NINIB, who loveth me, four wild bulls (rîmâni=Heb. re'ēmîm, Ps. 29. 6, etc.), strong, enormous, in the wilderness, in the land of MîTâNI, and at ARAZIQI which is east of the land of the Hittites, with my strong bow, iron lance, and my pointed spears, I put an end to their life. Their skins, their horns, to my city ASSHUR

I brought. Ten strong bull elephants, in the land of Harran and the basin of the Habor, I slew. Four elephants I took alive. Their hides, their ivory, along with the living elephants, to my city Asshur I brought. At the bidding of Ninib who loveth me, 120 lions, in my daring courage, with the assault of my prowess, on my feet I slew; and 800 lions from my chariot I laid low. All kinds of wild beasts and winged birds, the prize (e-im, cst. of immu?) of my catching, I heaped up." (Prism-Inscription, Col. VI., 58-84.)

Lions seem to have become so scarce in Assyria that, by the time of Assur-bani-pal, they had to be imported and kept in cages for the royal hunting-days. They are still found in the basin of the $H\hat{a}b\hat{u}r$, and have been seen among the ruins of **Babylon**.

SCENES FROM THE BRONZE GATES OF SHALMANESER II.

Compare with this epitome the fuller narrative of the stele of the same monarch, found at *Kurkh*, S. of *Diarbekir*, and now in the British Museum (W.A.I. III. 8. 78 sqq.):—

"In the eponym-year of Daian-Asshur (B.C. 854), in the month Iyar, on the 14th day, I set out from Nineveh, crossed the Tigris, approached the cities of Giammu, on the Balich. They were afraid of the terror of my lordship, the glancing of my strong weapons, and with their own weapons killed Giammu their lord. I entered Lillala and Til-sha-Balachi. I brought my gods into his palaces; a feast in his palaces I made. The treasury I opened, his hoard I found, his goods and substance I spoiled, to my city of Ashur brought them. From Lillala I set out, approached Kar-Shulmanuasharid; in boats of sheepskin I crossed the Euphrates in full flood a second time. The tribute of the kings of that side of the Euphrates, Sangar (Shamgar) of Carchemish, Kundashpi of Kumuch (Commagene), Aramé son of Gusi, Lalli of Melidi (Melitene), Chayani son of Gabari, Garparuda of Patin, Garparuda of Gurgum, silver, gold, tin, copper, vessels of copper, at Asshur-uttir-asbat on that side of the Euphrates, above the Sagur (Sajur), which the Hittites call Pitru (Pethor), I there received. Setting out from the Euphrates, I approached Ḥalman (Aleppo); they dreaded battle, clasped my feet. Silver, gold, their tribute, I received; offerings before Rimmon of Halman I made.

"Setting out from Halman, I approached the cities of Irchulêni of Hamath: Adennu, Bargâ, Arganâ, his royal city, I took; his spoil, his substance, the goods of his palaces, I fetched out; I set fire to his palaces. Setting out from Arganâ, I came to Qarqara: Qarqara, his royal city, I wrecked, razed, burnt with fire. 1,200 chariots, 1,200 saddlehorses, 20,000 men of Addu-'idri of Damascus, 700 chariots, 700 saddle-horses, 10,000 men of Irchulêni of Hamath, 2,000 chariots, 10,000 men, of Ahab of Israel (A. ha. ab. bu mât Sir. 'i. la. aa), 500 men of Guê, 1,000 of the land of Muzri (in Cappadocia), 10 chariots, 10,000 men of Irqanat, 200 men belonging to Matinu-Ba'li (Mattan-Baal; cf. Mattan, 2 Kings 11. 18), of Aryad, 200 men of Samsanata, 30 chariots, 10,000 men of Adunu-Ba'li (Adoni-Baal) of Shiânu (the Sinite, Gen. 10, 17), 1,000 camels of Gindibu'u the Arabian, 1,000 men of Ba'sa (Baasha) son of Ruchubi (Rehob) the Ammonite,—these twelve kings he took to help him; to make war and battle they came to meet me. With the august forces which Ashur the Lord bestowed, with the strong weapons which Nergal who marcheth before me conferred, I fought with them; from Qarqara to Gilzau I routed them. 14,000 of their fighting men with the sword I laid low; like Rimmon, I rained a storm upon them, spread their carcases far and wide, covered the ruins with their numerous troops, shed their blood with the sword: the low ground (mushpalu) was narrow, the field too confined (?) for the slaughtering of them; the broad plain was used up for burying them by their people. I reached the Arantu (Orontes) before turning back. In that engagement I took from them their chariots, their saddle-horses, their horses harnessed to the yoke."

In the eighteenth year of his reign, that is B.C. 842, the king made war against **Hazael**, king of Damascus. The record of this on the obelisk

is very short; but a longer account is given on one of the pavement slabs from Calah. It reads as follows:—

"In the eighteenth year of my reign for the sixteenth time I crossed the **Euphrates**; Hazael of Damascus trusted to the strength of his armies, and mustered his troops in full

force. **Senir** (*Hermon*), a mountain summit which is in front of **Lebanon**, he made his stronghold. I fought with him, his defeat I accomplished, 6000 of his soldiers with weapons I laid low; 1121 of his chariots, 470 of his horses, with his camp, I took from him. To save his life, he retreated; I pursued him; in **Damascus** his royal city I shut him up. His plantations I cut down. As far as the mountains of the Hauran I marched. Cities without number I wrecked, razed, burnt with fire. Their spoil beyond count I carried away. As far as the mountains of Baal-Rosh, which is a headland of the sea (at the mouth of the Nahr el Kelb, i.e. Dog River), I marched; my royal likeness I there set up. At that

time I received the tribute of the **Tyrians** and **Sidonians**, and of Yahua (*Jehu*) the son of Khumri (*Omri*)."

Scenes from the Black Obelisk.

THE bas-reliefs on the obelisk represent the tributes received by **Shal-maneser** II. from the various nations, whose submission is recorded by the inscription.

1. Tribute of Zua, king of Gozan (2 Kin. 17. 6).

2. Of Jehu, "son of Omri," king of Israel.

In the illustration on the opposite page the upper relief records the payment of tribute by ZuA, king of **Gozan** (2 Kings 17.6); the lower relief represents the embassy of **Jehu**, humbly offering to the great king

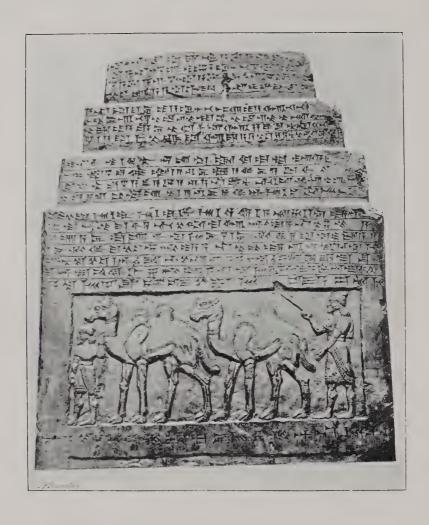

"the tribute of Yahua (*Jehu*) the son of Khumri (*Omri*), bars of silver, of gold, basons of gold, bowls of gold, cups of gold, flagons (*lit*. buckets) of gold, bars of lead, a royal sceptre, and spearshafts (?)."

Indian elephant and apes, the tribute of the Armenian Muzri (cf. 1 Kings 10. 22).

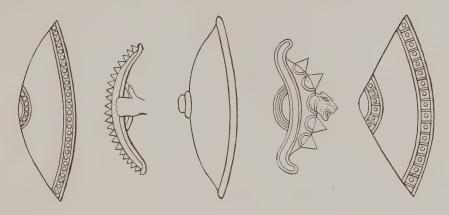

In the above picture is represented the tribute of the Muzri, comprising an elephant and apes of various kinds (cf. I Kings 10. 22). It is important to notice that the Assyrians knew of a northern as well as a southern Muzri (Egypt). The former lay in N. Syria, between the Orontes and the Taurus range; and it is this country which seems to be intended in I Kings 10. 28; 2 Kings 7. 6. See Winckler, Alttestamentliche Untersuchungen, page 172.

Inscribed Statue of Nebo, the Babylonian God of Letters.

NEBO or Nabû, i.e. the Prophet, was the Babylonian god of learning and the special patron of the scribes.

His great sanctuary was the temple called E-ZIDDA at Borsippa, the principal seat of learning in Babylonia (see pages 201, 203, 219, 221). In the prophecy (Isa. 46. 1) Nebo represents the scribe and priest caste, as Bel represents the civil powers.

The statue in the illustration was erected by the governor of **Calah**, named Bel-tarzi-iluma, for the preservation of the life of the Assyrian king Rimmon-nirari III. (B.C. 812–783) and his wife Sammuramat (Semiramis), who were contemporary with **Jeroboam** II.

The titles of Nebo are interesting. In this inscription he is called the master of devices or skilled in (artistic) designs; the All-knowing; the broad-eared, i.e. widely receptive, intelligent (elsewhere the open-eared); the wielder of the writing-reed; holder of the measuring-rod; He whose it is to make to know and to divine (aright); without whom no counsel is taken in heaven. The close is remarkable: Man of the future! in NEBO trust! in another god trust not! The wife of Nebo was TASMIT, "hearing," evidently in the sense of the "pupil" or "student."

Tiglath-Pileser II. (III.).

(B.C. 745-727.)

This monarch, who usurped the throne of Assyria in B.C. 745, was a Babylonian prince formerly known by the name of Pūlu, the Pul of 2 Kings 15. 19, and the Porus of the Canon of Ptolemy. In his annals, now preserved in the British Museum, he mentions Rezin, king of Damascus, Menahem, and Pekah, kings of Israel, and Azariah (or Uzziah), king of Judah. It was this very king who first introduced the system of the deportation of the inhabitants of conquered lands; a precedent afterwards followed by Sargon II. (B.C. 721) in the case of Samaria, and by Nebuchadnezzar in the case of Judah and Jerusalem.

Chronological Table of Events of the Reign of Tiglath-Pileser II.

THE following extract from the Assyrian Eponym Canon gives a chronological summary of the events of the reign of **Tiglath-pileser** II. I translate from *The Cuneiform Inscriptions of Western Asia*, Vol. II., Plate 52, l. 26 sqq. See also Schrader, KAT², page 468 f.; Delitzsch, Lesestücke², page 94; and Rost's *Tiglath-pileser*.

[B.C. 727.] To the city of Shalmanu-asharid (= Shalmaneser IV.), seated himself on the throne.

The cuneiform text of the sculptured slab represented in the plate is part of a fragment of the annals of Tiglath-pileser II. The preceding lines may be rendered as follows:—

"The tribute of Kushtashpi of the city of Kummuch, Raṣunnu (Rezon) of the land of Damascus, Meniḥimme (Menahem) of the city of Samerina (Samaria), Hirummu (Hiram) of the city of Ṣurru (Heb. Ṣôr; Tyre), Sibitti-Bi'li of the city of Gublu (Gebal), Urikki of the land of Quê (Koa), Pisiris of the city of Gargamis (Carchemish), Eniel of the city of Hamath, Panammû of the city of Sam'al, Tarchulara of the land of Gurgum, Sulumal of the land of Melid, Dadiel of Kaskâa-city, Uassurme of the land of Tabal (Tubal), Uschitti of Tunâa-land, Urballâ of Tuchanâa-land, Tuchamme of the city of Ishtundi, Urimme of Churnâa-city, Zabibê queen of the land of Aribi (Arabia)—gold, silver, tin, iron, elephant hides, ivory, particoloured cloth, linen cloth, blue-purple stuffs, red-purple stuffs, ushâ-wood, boxwood, all that is costly, the treasure of royalty."

Then follows what we read here, though in a more or less mutilated shape, viz:—

Official Records of Tiglath-Pileser II.

(A LARGE clay tablet inscribed on both sides, found in the ruins of the king's palace at Nimrûd, the ancient Calah, and now in the British Museum.) In this tablet, which is most unhappily broken across the middle, the king relates the course of events to the seventeenth year of his reign (B.C. 729). The original text is published as Plate 67 of the second volume of the Cuneiform Inscriptions of Western Asia. In translating from this, I have not thought it necessary to note the lacunæ supplied from a duplicate (see Schrader's Keilschriftliche Bibliothek, Band II., pages 8 sqq.), but only my own conjectures, which are not very numerous.

Since writing the above, I have had the advantage of comparing my text and translation with those of Dr. Paul Rost in his special edition of the inscriptions of this monarch.

33, 34; Isa. 10. 11. A later Assyrian king, Assur-bani-pal, has recorded that when he conquered **Elam** and took Susa, he recovered the image of the goddess Nanā, which had been carried off from her temple in **Erech** by Kudur-Nanhundi, king of Elam, 1635 years previously (*i.e.* about B.C. 2280). Assur-bani-pal also carried off the principal Elamite gods.

We do not know from which of the cities taken by **Tiglath-pileser** II. (III.) the gods pourtrayed (see page 173) were borne away; nor can we certainly say what gods are represented in the sculpture. The standing figures with four horns (a symbol of the sun's rays; cf. Hab. 3. 4), and holding an axe (Baruch 6. 15) and thunderbolt (see page 9), is probably Bel-Merodach. The throned goddesses may be Ishtar and Zêrpânit, wife of **Merodach**, or Beltis, the wife of the elder **Bel**, i.e. the great mother, or mother of the gods. The figure within the covered throne seems also to be a goddess.

ASSYRIAN SOLDIERS BEARING GODS OF THE CONQUERED.

The Old Aramean Inscription of Panammû.

(8th century B.C.)

This and other relics of ancient Aramean culture, including a large statue of the god **Hadad** erected by Panammû I., and an inscribed bas-relief of Bar-Rekûb, who erected the present memorial stele in honour of his deceased father, Panammû II., were found by Dr. von Luschan in the course of his excavations in the neighbourhood of <code>Zengirli</code> in Northern Syria in 1888–1891, and are now in the Berlin Museum. These monuments are of the highest value, as proving that the old Aramaic tongue resembled the Hebrew far more nearly than its modern forms in the books of Ezra, Daniel, and the Targums would indicate; while the written characters are, as a whole, practically identical with those of the Moabite Stone and the oldest Phænician inscriptions. An interesting feature is that the letters are cut in relief, like the so-called **Hittite** inscriptions, instead of being incised on the stones.

Sham'al or Sam'al is often mentioned in the Assyrian historical inscriptions, from B.C. 859 downwards. The country lay in the N.W. corner of **Syria**, between the lake of **Antioch** and *Marash*. Tiglath-pileser III. twice mentions Panammû (II.) of Sam'al, among the tributary princes of the West; firstly, in a list of those who paid him tribute in B.C. 738, which includes Kushtashpi of Kummuḥ or Commagene, **Rezin of Damascus**, **Menahem of Samaria**, **Hirom of Tyre**, Pisiris of **Carchemish**, Eniel of **Hamath**, Tarḥulara of Gurgum, and others; and secondly, in another list recording the tributes (B.C. 734) of Mattan-baal of **Arvad**, Sanibu of **Ammon**, Salamanu of **Moab**, Mitinti of **Askalon**, **Jehoahaz** (= Ahaz) of **Judah**, Qaushmalaka of **Edom**, Hanun of **Gaza**, and other kings.

The inscription on the stele of Panammû is unhappily too much injured for consecutive translation. It seems to give some details of the family history of the royal house of Sham'al before the Assyrians appeared

^{*} See Professor Sachau's Die Altaramäische Inschrift Panammå's. Berlin, 1894. Die Altsemitischen Inschriften von Sendschirli, by Professor Dr. D. H. Müller, of Vienna, has reached me unfortunately too late for comparison here.

on the scene—a story of confusion and bloody usurpation (cf. 2 Kings 9 & 10), followed by a period of order and prosperity under Panammû. It then goes on to tell how Panammû, as a trusty vassal, helped **Tiglath-pileser** in his wars, and was rewarded by the gift of some towns in the adjacent country of Gurgum; dying afterwards, apparently in the camp before **Damascus**, which the Great King was besieging (B.C. 733). His death was mourned by the whole army. The author of the inscription adds that because of his own and his father's "righteousness" the king of Assyria seated him on his father's throne; whereupon he erected this monument as a memorial of his father.

THE INSCRIPTION.

The following selections will give some idea of the general tenor of the inscription:—

"This statue Bar-Rekûb set up for his father Panammû, son of Bar-Şûr

As for his father, the gods of Ja'dî delivered him out of his dungeon [For . . his younger brother had conspired?] in his father's house, and slain Bar-Şûr, his father; and he slew seventy of his father's brethren (?)

And the remnant thereof died, filling the prisons. And he made the wasted cities more numerous than the inhabited cities"

The parricide seems to have issued in civil war, followed by dearth and famine.

Then (line 7)—

"The king of Assyria" is mentioned who, apparently, "made him (Panammû) king over all the house of his father; and he slew [the conspirators?], and destroyed out of his father's house

And opened the prisons, and loosed the captives of Ja'dî [and rebuilt] the house of his father, and made it fairer than aforetime. And the wheat and the barley and the spelt and the millet were multiplied in his days; and at that time food [was abundant]. and he exalted (?) my father Panammû among the kings of Chebar.

And my father, though he was an owner of silver and an owner of gold, in his wisdom and in his righteousness he held mouth to the skirt (*i.e.* kissed it) of the Lord, the king of Assyria . . ."

(The "righteousness" of Panammû and his son may be contrasted with **Zedekiah's** breach of fealty, 2 Kings 36. 13, which was solemnly condemned by the prophets, Ezek. 17.

".... and the Lord, the king of Assyria, suffered him to make war against the kings of Chebar.... [And he ran]

By the chariot-wheel of the Lord, **Tiglath-pileser**, king of Assyria (cf. I Sam. 8. II; 2 Sam. I5. I; I Kings I. 5), who made war(?) from the rising of the sun to the setting thereof, [and became lord?]

Of the four quarters of the earth; and the produce of the East was the tribute of the West, and the produce of the West the tribute of the East. And as for my father,

His corpse (?), and appointed a mourning (?) for him on the way, and conveyed my father from **Damascus** to (his own) place

And all his house [wept] for him. And as for me, Bar-Rekûb, son of Panammû, because of my father's righteousness and because of my own righteousness the Lord, the king of Assyria, made me to sit [on the throne]

Of my father Panammû, son of Bar-Şûr; and I set up this statue [for a memorial of my father], for Panammû, son of Bar-Şûr, and built [a chapel?]...."

^{*} Shamrag, fell sick, is from a root marag = maraq = maraq; cf. Assyrian maraqu, to be ill.

The close affinity of the language here to that of the historical books of the Old Testament must strike every reader. There is also an affinity of religious ideas; and it is especially interesting to observe that these old Aramean kinsfolk of the Hebrews worshipped not only Hadad, the god of Damascus, and Shemesh, the Sun (cf. Beth-shemesh), but **El**, "the mighty," and Sûr, "the Rock," both of which are well known Biblical designations of God, Resheph, too, was one of their deities (cf. Hab. 3, 5; Ps. 76, 3; and page 247); but perhaps the most noteworthy of all the Divine names in these inscriptions is Rekûb-El, "God's Chariot," i.e. evidently, the cherubic bearer of the Deity (cf. Ps. 18. 10: "He rode on the Cherub," where the Hebrew combines rakab, to ride, and kerub, cherub; also Ps. 68. 17). The god Rekûb-El is called "lord of the house," as guardian of the palace, like the Assyrian cherubim which guarded the king's doors (see Cherubin). The notion of a winged bearer of deity travelled further east, and is found in the Garuda, the winged and beaked bearer of Vishnu, of which we give a characteristic representation.

Broken Cylinder of Sargon II., King of Assyria.

(B.C. 722-705.)

THESE fragments were found in that great store-house of Assyrian literature, the Library or Record Chamber of Assur-bani-pal (see page 200), the great-grandson of **Sargon** II., one of whose campaigns they chronicle.

BROKEN CYLINDER, WITH INSCRIPTION OF SARGON, KING OF ASSYRIA (B.C. 722-705).

king, and set Yamani on the throne of **Ashdod**. (**Judah, Edom**, and **Moab** were in treasonable correspondence with "*Pharaoh*, the king of Egypt, a prince who could not deliver them," as **Sargon** himself says, in language vividly reminding us of Isa. 30. 5, 7.) Without waiting to muster his entire forces, Sargon at once marched against Ashdod. Apprized of his

coming, Yamani fled to the south borders of Egypt, and "appeared no more." Ashdod, Gath, and Ashdodim were besieged and cf. 2 Kin. 17. 24. taken; and Yamani's gods, wife, sons, daughters, treasures, and people became the victor's booty. Sargon repeopled the towns with foreigners from other conquered places and appointed a governor. Afterwards the king of Ethiopia, overawed by the might of the Great King, sent Yamani in chains to Assyria.

SENNACHERIB.

(B.C. 705-681.)

Record of the Invasion of Judah and the Siege of Jerusalem.

THE famous Cylinder of **Sennacherib** is a six-sided cylinder of terra cotta which was found at Nineveh. Before its acquisition by the British Museum, it was in the possession of Mr. Taylor; and it is known as the "Taylor Cylinder" among Assyriologists. It contains a record of eight years of **Sennacherib**, including his third expedition, B.C. 701, which was directed against the kings of Phœnicia and Palestine,

2 Kin. 19. 9. who had been incited to revolt by Tirhakah, king of Ethiopia. The Phænician cities surrendered to the invader, while the king of **Sidon** fled to **Cyprus**, then largely colonised by Phœnicians; Judah and Philistia, being nearer Egypt and expecting help from thence, held out. Askelon was first captured, and Zedekiah its king taken prisoner and sent to Assyria, while the Philistine towns of Beth-Dagon, Joppa, Bene-berak, and Azur, also fell. The people of Ekron had revolted against Padi their king, because he had sided with the Assyrians, and had dethroned him and sent him in chains to A pitched battle, in which the allies were aided by the Hezekiah. chariots of the kings of Egypt and their overlord, the king of Ethiopia, was fought at Eltekeh, and terminated in a victory for the Assyrians. The turn of Judah now came, and this is best described in the words of the inscription:—

"But as for **Hezekiah** of Judah, who had not submitted to my yoke, forty-six of his strong cities, together with numberless fortresses and small towns in their neighbourhood, I invested and took by means of the battering of rams and the assault of scaling-ladders (? or

siege-towers), the attack of the foot-soldiers, mines, bills, and axes. I brought out from the midst of them, and counted as spoil 200,150 persons, young and old, male and female, horses, mules, asses, camels, oxen, and sheep, without number. As for himself, I shut him up like a bird in a cage in his royal city of **Jerusalem**. I built a line of forts about him, and whoever came forth from the gate of his city, I punished. His cities which I had plundered I severed from his territory, and gave them to Mitinti king of **Ashdod**, Padi king of **Ekron**, and Zil-baal king of **Gaza**; and so I diminished his territory. To their former annual tribute I added an impost of presents to my Lordship, and laid it upon them. Him, **Hezekiah**, the fear of my august Lordship cast down; and the Arabians (?) and his trusty warriors whom he had brought in for the defence of **Jerusalem** his royal city, fell away. Along with 30 talents of gold (and) 800 talents of silver, he caused to be brought after me precious stones, carbuncles, *kassû* stones, great pieces of lapis lazuli, ivory beds, ivory thrones, elephant hides (and) tusks, *ushu* wood, box-wood, all sorts of things, a huge treasure, and

his own daughters, the women-folk of his palace, men-singers, women-singers, to **Nine-veh** the city of my Lordship; and he despatched his envoy to pay the tribute and do homage" (cf. Isa. 36 & 37).

The Scriptural and monumental accounts complete and supplement each other. Sennacherib makes no mention of the disaster which befell the Assyrian host; but it is evident that he did not take Jerusalem, for the tribute was sent after him to Nineveh, not, as in the case of the captured city of Lachish, brought to him before the city. Besides, had he done so, he certainly would not have omitted to state the fact. There may at first appear to be a contradiction in the amount of the tribute. In 2 Kings 18. 14 the

2 Kin. 18. 14. tribute is given as "three hundred ta-

lents of silver and thirty talents of gold"; while in the inscription it is "eight hundred talents of silver and thirty talents of gold." The difference is possibly to be accounted for by the Assyrians and Jews using two

different silver tariffs, but more probably by corruption of the Hebrew text. There is no difference in the gold standard.

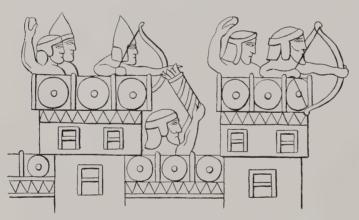

ASSYRIAN MILITARY ENGINES, ROYAL STANDARD, MOVABLE SCREENS, AND TENT.

The Storming of Lachish in Judah, with Sennacherib Receiving the Spoils and Captives.

This fine series of sculptures from the ruins of **Sennacherib's** palace at **Nineveh**, now in the British Museum, represents the assault and surrender of **Lachish** (2 Kings 18. 13, 14 & 19. 8); a stronghold of the ancient Amorites (Josh. 10. 3), which retained or regained its importance in the times of the Judean monarchy, having been fortified by Rehoboam (2 Chron. 11. 9; cf. 2 Kings 14. 19, Mic. 1. 13). It was one of the sites reoccupied by the restored exiles after the Babylonian captivity (Neh. 11. 30).

In the first portion of the bas-reliefs (page 191) we see the *fenced* city on its heap $(t\bar{e}l; cf. \text{ Jer. } 30. \text{ 18}, \text{ and page 194})$, its towers filled

INHABITANT OF LACHISH HURLING A LIGHTED TORCH FROM THE WALL, $\ .$

with archers, and others who rain lighted torches upon the wooden cars under cover of which the battering-rams are worked, * and upon the tall wicker screens behind which bowmen and spearmen and slingers are assailing the de-

fenders. Here and there scaling-ladders are reared against the walls. From the principal gate captives are issuing; and in the immediate foreground two soldiers are in the act of impaling a youthful prisoner, side by side with his father and brother—an atrociously cruel mode of execution, practised by the Assyrian kings on important captives (see page 173, l. 16), and still in vogue among the Turks until quite recently.

^{*} Note the discharge of water from within the cars upon the battering-rams, apparently to prevent them from catching fire.

THE STORMING OF LACHISH BY THE TROOPS OF SENNACHERIB, KING OF ASSYRIA (2 Kings 18, 13, 14, 17; 19. 8). [Sculpture from the ruins of Sennacherib's palace at Nineveh.]

Herodotus relates that when Darius took Babylon, he impaled about 3,000 of the chief men of the city (iii. 159).

In the second portion of the sculptures (page 193), **Sennacherib** sits on his splendid throne of bronze and carven ivories, while his great officers present the prisoners from the fallen city. Above is the inscription:—

"Sennacherib, king of the world, king of Assyria, sate on a throne, and caused the spoil of Lachish to pass before him."

The victorious monarch grasps bow and arrows, the speaking symbols of his warlike prowess and recent success (cf. Gen. 48. 22; Isa. 5. 28; 2 Kings 19. 32; and see the plate facing page 200, where Assur-banipal holds his bow and arrows over the lions he has killed in the hunt). Behind the throne stand two eunuchs, holding fly-flaps over the king's head; and behind them is a large tent, over which we read:

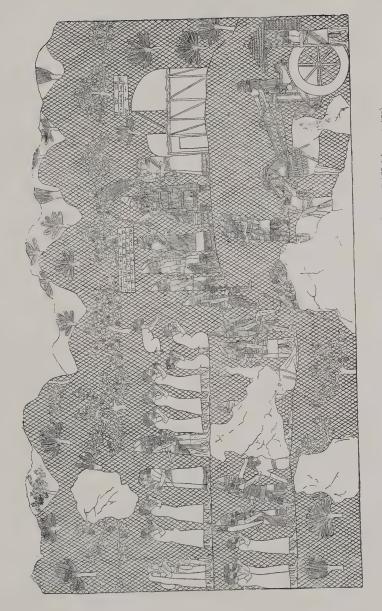

"Tent of Sennacherib, king of Assyria,"

Below is the great king's chariot with its attendants, one of whom carries a state umbrella; and on the left, some captives are being despatched. Palms, vines, and olives adorn the landscape. The distinctly Jewish type of face of the inhabitants of **Lachish** should be noticed. During his explorations at *Tell el-Hesy* (page 194), Professor Petrie discovered the steps and guard-house of the great gate of **Lachish**, through which the prisoners are represented as passing to surrender (see the Plate, page 191).

SUBMISSION OF THE PEOPLE OF LACHISH.

Upon the whole, in spite of the total absence of perspective in the design, it will be recognised that these relics of ancient art convey a powerfully realistic impression of the incidents they were intended to commemorate.

SENNACHERIB RECEIVING THE CAPTIVES OF LACHISH IN JUDAH (circ. B.c. 701). [Continuation of sculpture on page 191.]

Mound of Tell el-Hesy, the Site of the Ancient Lachish.

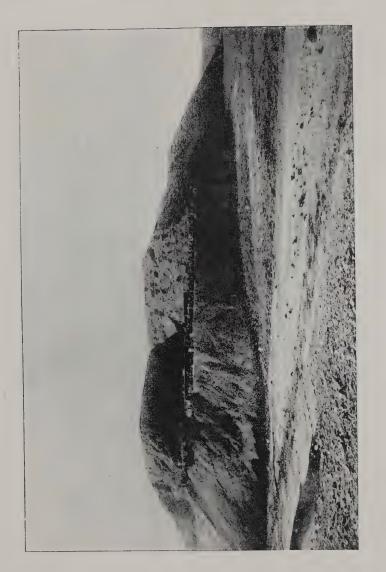

THE mound of *Tell el-Hesy* is situated a short distance north-east of Gaza. In 1888 digging was commenced here by Dr. Flinders Petrie on behalf of the Palestine Exploration Fund, and has been subsequently continued by Mr. W. Bliss, who named it "a mound of many cities." The exploration led to the identification of the site as that of **Lachish**, and this has been subsequently confirmed by the discovery of a cuneiform letter which mentions Zimrida, a governor of Lachish (see page 90).

The excavations, carried downwards 60 feet from the top of the Tell, *i.e. heap*, to the rocky platform of the original site (60 feet above the stream), revealed a regular series of ruined cities one above the other, eight or nine in number. The uppermost of these ruined cities belongs to the later Jewish period, representing the city destroyed by **Nebuchadnezzar**, below which were the ruins of the city besieged by **Sennacherib** in B.C. 701. Below this, again, were the ruins of an older town, probably of the age of the Judges; and at a still greater depth the yet older settle-

ment of the pre-Israelite age of the Amorites. The ruins of this portion were very carefully explored, and show that the Amorite city was a fortress of great strength, walled up to heaven. The walls were over 20 feet thick and built of mudbricks sun-dried. When such buildings fell into ruins the roofs and upper portions of the walls resolved themselves into a mass of crumbling earth, which effectually protected and preserved the lower portion of the houses, as well as all but the most fragile of their contents. On these "heaps" (cf. Jer. 30. 18) of rubbish the subsequent inhabitants built their new city; and so as city after city fell into decay it made a foundation for its successor, and buried its own records, to be unearthed by explorers.* In the centre of this portion Mr. Bliss found the remains of the residence of the governor, with a kind of primitive barrack before it.

In one of the excavated chambers of this building was found a small clay tablet, in shape and style of writing resembling those found at Tell el-Amarna (see page 86, supra). This tablet is most important, as it shows that the cuneiform writing was in common use in Palestine about B.C. 1400; a century before the conquest by the Israelites.

^{*} Petrie estimated the average rate of accumulation on this site at five feet per century.

Phænician Ships in the Service of Sennacherib.

(End of 8th cent. B.C.)

FROM the remotest antiquity the Phænicians have been the maritime people of the Oriental world. The earliest Biblical reference is that in the blessing of Jacob—"Zebulun shall dwell at the haven of the sea and he shall sojourn in ships; and his border shall be unto Zidon."

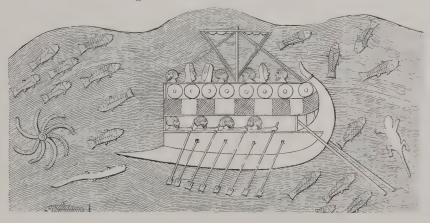

WAR GALLEY IN THE SERVICE OF SENNACHERIB, KING OF ASSYRIA

Phænician trade is, however, much earlier than this; and it was probably in ships from Phænicia that Sargon I., about B.C. 3800, crossed to the "land in the midst of the sea of the setting sun," that is to **Cyprus.** One of the earliest records of Phænician ships is in the tablets from Tell el-Amarna, in one of which RIB-ADDA, the vassal-prince of **Gebal**, writes to the Egyptian king Amenophis IV., that "the ships of the men of Zemar, Beyrout, and **Zidon**, all who are in the land of the Amorites, are attacking me."

It was by Phœnician agency that the ships of **Solomon** were built and manned, sailing from **Ezion-Geber**, in the gulf of *Akabah*, to **Ophir**; and it was with the Phœnician traders that the vessels of Solomon sailed for **Tarshish**. The great

protection of the Phænicians was their ships. On the approach of the armies of Assyria against Tyre or Zidon, the kings at once took to their ships and fled to Cyprus. The wealth of Tyre truly lay in her ships, as so graphically described by Ezekiel. The Assyrians were not a maritime people; but in order to finally crush Ezek. 27. the Chaldean tribes supporting Merodach-Baladan, who lived on the shores of the Persian Gulf, near the mouth of the Karûn, Sennacherib employed Phænicians and Yavnana'a (Cypriote Greeks) to build ships for him. We give, page 196, a representation of one of these vessels of war. It bears a close resemblance to the Phœnician and Greek vessels figured on coins. Like the other sculptures of Sennacherib, the slab is unhappily much injured; but enough remains to show that the vessel is a bireme with two decks, on the upper of which are the warriors, with their shields hanging over the side, while the oarsmen sit on the lower, eight on a

side. The crab catching the fish is a humorous touch.

ENEMIES OF THE ASSYRIANS IN THEIR SHIPS. $[From\ Kuyunjik.]$

On the Taylor cylinder (see page 187), Sennacherib has thus described the campaign in which these vessels were employed:—

"In my sixth expedition, the remnant of the men of Beth-Jakin, who had run like wild asses before my strong weapons, took all the gods of their country out of their sanctuaries, and crossed the Great Sea of the Sunrising (the Persian Gulf), and took up their abode in the town of Nagitu in Elam. On ships of Ḥatti-land I crossed the sea; I took Nagitu [and] Nagitudi'bina, besides Ḥilmu, Pillatu, and Ḥupapanu, districts of Elam; the men of Beth-Jakin, with their gods, and the men of the king of Elam I carried off and left not one escaped. I embarked them in the ships, and took them over to the other shore, and made them take the road to Assyria. The towns in those districts I wrecked, razed, consumed with fire, turned into mounds and rubbish-heaps." (Taylor Cyl., col. iv. 21 sqq.)

Monolith with Sculptured Portrait of Esarhaddon, King of Assyria.

(Circ. 681-668 B.C.)

This monument was discovered in the ruins of *Singirli*, north of **Antioch**, in the Taurus range, which represents the ancient city Sam'āl, the capital of a Hittite, and afterwards of an Aramean, kingdom. Upon the front of the monolith we have a representation of **Esarhaddon** in his royal robes, with two figures at his feet. The first of these is a negro, whose hands and feet are bound with fetters, and who kneels in a suppliant attitude before the king. This, the inscription informs us, is

2 Kin. 19. 9. Tirhakah, king of Egypt and Ethiopia, while the standing figure is probably the king of Sam'āl. In front of the king's head are a number of figures of the gods invoked in the inscription—Bel, Rimmon, Merodach, and the goddess Ishtar (Ashtoreth cf. pages 153, 154), represented as standing on the backs of animals.

The inscription is of great importance, as it relates the defeat of **Tirhakah** by the Assyrians, and the siege and capture of **Memphis** (Hos.

9. 6, Heb. Moph, Isa. 19. 13, Noph), and enables us to identify Esarhaddon with the cruel lord and fierce king of Isaiah's prophecy. The description which the king gives of the campaign is short but graphic:—

"As for **Tirhakah**, king of Egypt and Ethiopia, the favourite (*lit. protégé*) of their great deity, from Iskhupru to Memphis his royal city, a march of fifteen days, daily without ceasing great numbers of his warriors I slew; and himself five times with arrow [and] spear I struck with deadly stroke. Memphis, his royal city, in half a day with war engines I besieged, captured, wrecked, razed, burned with fire."

The Babylonian Chronicle informs us that the capture of Memphis took place on the 12th Tammuz (June-July), in the 10th year (i.e. B.C. 670).

In this inscription Esarhaddon styles himself Isa. 11. 11. king of Egypt (Muzur; cf. the Hebrew's Mizraim), Pathros (Patu-risi, "the South Land," Egyptian Peto-res), and Cush $(K\bar{u}su)$.

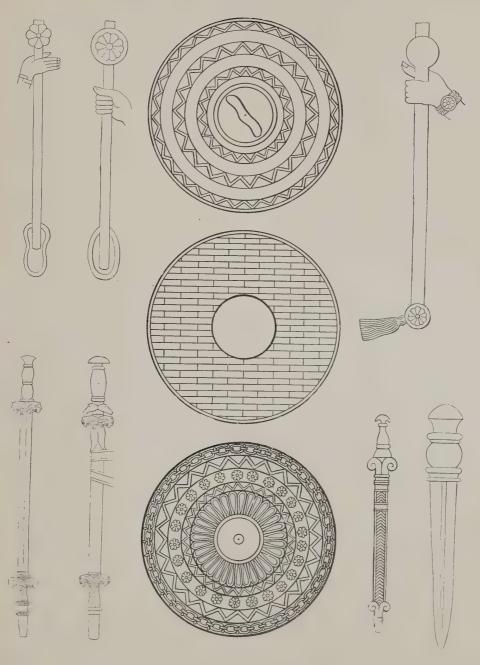

The monument supplies an interesting illustration of the custom referred to in Isaiah—Therefore will I put my ring in thy

Isa. 37. 29. nose, and my bridle in thy lips. This cruelty to captives of distinction was much practised by the Assyrian kings, especially Sargon, Sennacherib, and Esarhaddon.

Assur-bani-pal, King of Assyria.

(Circ. 668-626 B.C.)

THE great and noble Asnapper of Ezra 4. 10 is certainly to be identified with Assur-bani-pal, the son of Esarhaddon, who reigned over Assyria with great splendour from B.C. 668-626. He probably, after the example of his grandfather, Sargon II. (B.C. 722), had transplanted rebels from Shushan, Elam, Babylonia, and other places to dwell in the cities of

Samaria. The expression used here, "great and noble," is a very remarkable one; as this monarch was certainly the most powerful and magnificent of the kings of Assyria. In the early part of his reign he conquered Egypt, capturing Memphis and Thebes; while in subsequent wars he reduced Elam to a tributary state, and reconquered Babylonia after the revolt of his brother Shamas-shum-ukin.

But Assur-bani-pal derives most honour as founder of the royal library which has preserved to us so valuable a collection of the best Babylonian and Assyrian inscriptions. This library contained many thousands of tablets, a great number of which have been recovered by the

explorations of Layard, Rassam, and Smith, and are now among the treasures of the British Museum. The foundation of this library was due, not so much to any love of literature on the part of the king, as to a political motive; that, namely, of preventing the young Assyrians from going down to **Babylon** to be educated, where treasonable ideas would be instilled into their minds by the priests of Babylon, who were always in patriotic opposition to **Assyria** (cf. I Kin. 12. 27). The library was a direct copy of the great library in the temple of **Nebo**, E-Zidda, at Borsippa (see pages 169, 203, 219, 221), and was dedicated to that god. The king, however, claimed to be the founder of it; and placed this colophon, as a sort of book-plate, on all the tablets:—

"Palace of Assur-bani-pal, king of the world, king of Assyria, to whom **Nebo** and Tasmit have given a broad ear (*intelligence*); who hath gotten a clear eye [and] the jewel of the scribe's mystery, an art which none among the kings who preceded me had acquired. The wisdom of **Nebo**, even the contents of the inscriptions, as many as had been made, on clay tablets I wrote, graved, examined (*or*, united, divided), and for my own reading laid up in my palace."

The inscription in the field of the second sculpture (see Plate facing page 200) reads:—

"I am Assur-bani-pal, king of the world, king of Assyria, on whom Assur and Belit have conferred exalted power. The lions that I killed—the strong bow of Ishtar, Lady of Battle, I held upright over them; a drink-offering over them I poured; wine I offered over them."

The mention of "the Bow of Ishtar, Lady of Battle," is of con-

siderable interest, as tending to confirm my conjecture (page 40, note) that the jewelled collar which Ishtar lifts up in heaven after the Flood is the rainbow. According to one myth, the rainbow is the necklace of Ishtar, the goddess of love and motherhood; according to the other, it is the war-bow of Ishtar, the goddess of battle. Iris, the goddess of the rainbow, is associated with Aphrodite (Ishtar) in Homer (Il. 5. 353 sqq.). On the other hand, in the old Aryan mythology, the rainbow is the warstorm-demons.

bow of Indra, which he hangs up in heaven after vanquishing the

Assur-bani-pal and his Queen Banqueting in the Garden.

This fine sculpture, from the palace of Assur-bani-pal at Nineveh, illustrates in a remarkable manner the banquets given to Ahasuerus by Esther. The discoveries of M. Botta at Khorsábád, the palace of

ASSUR-BANI-PAL AND HIS QUEEN BANQUETING IN THE GARDEN.

Sargon II. (B.C. 722, cf. page 185), have shown that to each of the three houses of the queens were attached gardens; and we may infer the same in the case of the harem of the palace of Assur-bani-pal at Nineveh. In one of these gardens the queen is giving a banquet to the king. The king has laid aside his arms, perhaps having just returned from a lion hunt, and is resting upon a couch. Eunuchs and a harper are in attendance; and the head of the slain king of Elam hangs from one of the trees. Like those of the Book of Esther, this is a "banquet of wine" (Esth. 5. 4; 7. 1).

(Whatever may be thought of the historical character of the Book of Esther, it is certain that, as Professor Driver has remarked, "the writer shows himself well informed on Persian manners and institutions." It is, therefore, quite open, even to a critic who regards the story as a romance rather than a history, to make comparisons of the kind here suggested.)

ANCIENT MONUMENTS OF THE PERIOD OF THE CAPTIVITY OF JUDAH.

India House Inscription of Nebuchadnezzar II. (the Great), King of Babylon.

(B.C. 605-561.)

This inscription, which was found among the ruins of Babylon, is now in the India Office. It consists of six columns of archaic writing in excellent preservation. It contains the name and titles of Nebuchadnezzar II., the son of Nabopolassar, and a record of all the great public works he undertook during his long reign for the improvement of Babylon. It gives an account of the rebuilding of more than twenty temples in Babylon and Borsippa, of the strengthening of the fortifications of the city, and of the making of the great quays beside the river.

The inscription thus shows us that the question of the Babylonian king, Is not this great **Babylon** that I have built? involves no exaggeration:

for the king certainly rebuilt not only the city of Babylon, but almost every great temple and public building in Babylonia. Hardly a single mound throughout the whole of the land has been opened in which bricks bearing the name of this great king have not been found. They are mostly cemented with bitumen (kupru), the "slime" of Gen. 11. 3.

Among the works recorded here the principal is the restoration of the two great national temples—that of **Nebo** at Borsippa, called E-ZIDDA, i.e. The lasting house, and the great temple of Bel Merodach

in Babylon, called E-SAGILLA, i.e. The house of the lofty head (pages 219, 220). On the bricks of this great builder, of which we give a specimen,

Nebuchadnezzar is styled the patron of both these temples. The inscription, like others of the same pious monarch, closes with a prayer:—

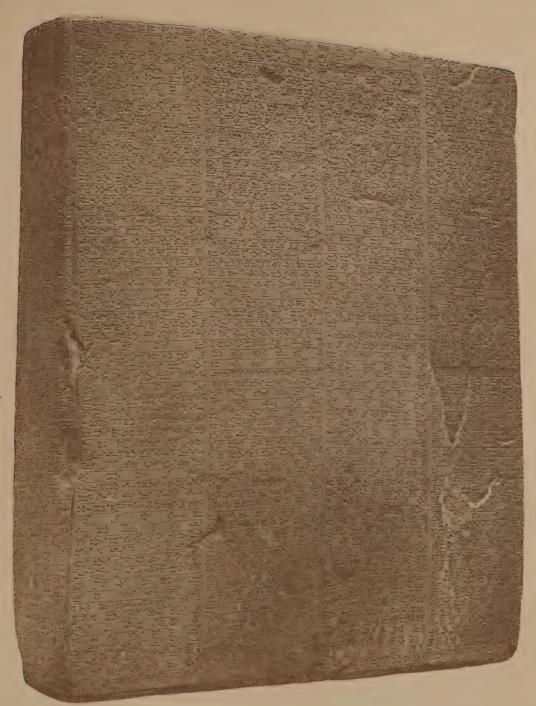

"To Merodach, my Lord, I prayed, I lifted up my hands. 'Merodach, Lord, wisest of gods, glorious prince! Thou it was who madest me, and with the sovereignty of all mankind didst invest me! Like dear life I love thy lofty image; above thine own city Babylon, I have adorned no town in any place. Like as I love the fear of Thy Godhead, [and] regard Thy Lordship, favour Thou the lifting up of my hands; hear my prayer! I am the patron king that rejoiceth Thine heart; the prudent minister, the patron of all thy cities. By Thy command, O merciful Merodach! may the house I have built endure for ever! may I be satisfied with the fulness of it; and therein may I come to gray hairs, [and] be satisfied with children! May I receive therein the rich tribute of the kings of the regions of all mankind! from horizon to zenith—the places of the rising sun—may I own no enemy, have none to make me afraid! Let my offspring therein rule the black-headed folk for evermore!'"

INDIA-HOUSE INSCRIPTION OF NEBUCHADNEZZAR II.,

The King of Babylon who destroyed Jerusalem and deported the Jews to Babylonia, B.C. 588.

Cylinder with Inscription of Nebuchadnezzar II. (the Great).

This finely moulded and well-written cylinder, which is now in my own collection, records the restoration of E-Barra, the Temple of the Sun at the ancient Sippara (see page 155). It is the most perfect of several which were disinterred from the ruins at $Ab\hat{u}\ Habbah$; and duplicates of it exist in the New York Museum of Art and in the British Museum. The script is archaic Babylonian. It was customary to bury such documents in the foundations of temples; much as we deposit newspapers and other articles under the foundation stones of public buildings at the present day (see pages 207, 210, 211).

The large space occupied by accounts of building and rebuilding temples and palaces in the inscriptions of this great king illustrates the narrative of the similar works of Solomon. Here, also, the completion of the temple is followed by the king's prayer, as in the case of the Israelitish monarch.

CYLINDER WITH INSCRIPTION OF NEBUCHADNEZZAR II., THE GREAT.

The following is a version of the text, which, as will be seen, presents many striking parallels to the phraseology of Scripture:—

"Nebuchadnezzar, the king of righteousness, the humble, the lowly, who hath knowledge of the fear (= worship) of the gods, who loveth justice and righteousness, who seeketh after life, who putteth in the mouth of the people the fear of the mighty gods; who setteth in order the temples of the gods; who keepeth up E-SAGILLA and E-ZIDDA (see pages 169, 201, 203, 219, 221), the true son of Nabopolassar, king of Babylon, am I.

When Merodach, the mighty Lord, to the lordship of the land lifted me up, and called me an exalted name that I might keep up the cities and renew his temples—at that time, E-BARRA, the House of the Sun in Sippara, which had fallen into decay long before my time, was like unto a ruinous heap; SHAMASH, the mighty Lord, to no former king had shown favour and bidden him to rebuild it. I, the prayerful, the wise, the suppliant, the worshipper of His Godhead,—of the building up of that House my heart bethought itself. I waited for Shamash, I lifted up my hands, I prayed to Shamash, for the building up of that House E-BARRA I besought Him; and Shamash, the mighty Lord, accepted the lifting up of my hands and hearkened unto my prayers. To build up that House, the shrine of Shamash, Rimmon, and Merodach, I decreed; Shamash, Rimmon, and Merodach, for the building up of the House E-BARRA, implanted abiding grace in my mind. For Shamash the Lord, the Judge supreme of heaven and earth, the mighty warrior, the glorious hero, the Lord who ordereth aright the decisions of justice, the mighty Lord, my Lord, His House E-BARRA in Sippara with gladness and shouting for joy I rebuilt.

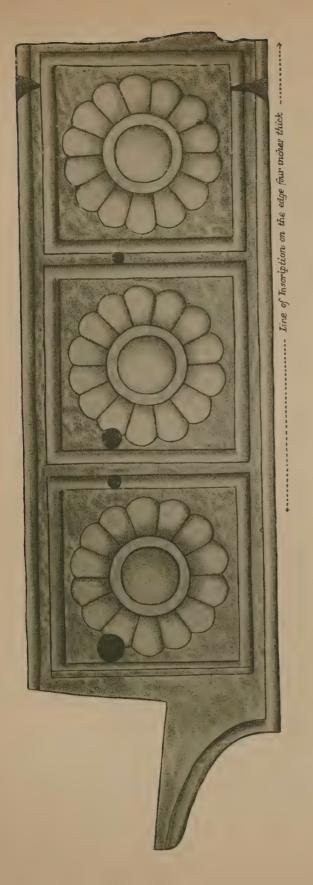

'O Shamash, mighty Lord, when Thou joyfully enterest E-Barra, Thy shining House, rightly regard the costly work of my hands, and let blessings for me be on Thy lips! by Thy just command let me be satisfied with offspring! life unto far off days [and] a sure throne be granted me! my shepherding be long, lengthening out for ever! A righteous sceptre, a good shepherding, a just staff of rule, prospering the people, adorn my kingdom for ever! Amid the fierce weapons, the onset of battle, overshadow Thou my people! Do Thou, O Shamash, by judgment and vision rightly answer me! by Thy glorious Word, which cannot be made void, may my weapons attack [and] strike home; [and] the weapons of my foes may they dash in pieces!'"

Cameo Portrait of Nebuchadnezzar II.

THIS Greek-looking head is engraved on a black stone. The circular inscription in Babylonian characters reads: Ana Mardug Belishu Nabû-kudurri-uşur shar Babili ana balatishu iqish: To Merodach, his Lord, Nebuchadnezzar, king of Babylon, for his own life gave [this]. The cameo was thus a votive offering, probably

presented in the great temple of E-Sagilla at Babylon.

[†] Assyrian Ha-ma-na

[‡] Assyrian zaḥalû is probably from Sumerian za-Ġal, "glistening stone" (za = abnu; Ġal = Ġash = Ġush, "flashing," "glancing," etc., ef. pap-Ġal and za-Ġash, "glance" (?); Gushkin, "gold"; Ġal-Bi, "ice"). The same root may be involved in Ġash-mar = Heb. בפא. I. 4, 27, whence Assyrian eshmarû, "electrum," or some other bright metal.

Gen. 28. 18.

The Mu-sar (i.e. name-writing), the writing of the name of Assur-BANIPAL king of Assyria, I discovered and altered not; with oil I anointed it, sacrifices of lambs I offered; with my own MUSAR I put it and restored it to its place.

For Shamash, the Judge of Heaven and Earth, E-Barra His House, which is within SIPPARA, which Nebuchadnezzar a former king rebuilt, after searching for its old foundation-record without finding it;—that House he rebuilt indeed, but in 45 years that House's walls had fallen. I felt uneasy, was fearful, took alarm, and my countenance was disturbed. When I had brought out Shamash from within it and made Him dwell in another House, that House I pulled down, and I made search for its old foundation-record; and I dug to a depth of 18 cubits, and the foundation-record of NARAM-SIN the son of SARGON, which for 3,200 years no king that preceded me had discovered, SHAMASH the great Lord of E-BARRA,

the House of the dwelling of His heart's delight, permitted me, even me, **1 Kings 6.1, 37, 38.** to behold. In the month Tisri, in a favourable month, on an auspicious

day, which Shamash and Rimmon appointed me in a vision, with silver, gold, precious stones, forest growths, even fragrant plants and cedar, with rejoicings and festivities, over the foundation-record of NARAM-SIN the son of SARGON, neither exceeding nor falling short by a finger's breadth, I laid its flooring (or platform). 5,000 stout cedars for its roofing I laid on; lofty doors of cedar, thresholds, and door-sockets, in its gates I fastened; E-BARRA, along with Bît-ilu-Azagga (the Bethel of the God Azagga; or transcribe E-I.DIB-AZAGGA) its step-tower, newly I built and finished the work of it: the hand of the God Shamash my Lord I took, and with rejoicings and festivities I caused Him to inhabit the dwelling of heart's delight within it. The writing of the name of NARAM-SIN the son of SARGON I saw, and altered not: with oil I anointed it; offerings of lambs I made; with my own name-inscription I deposited it, and restored it to its place.

O SHAMASH, mighty Lord of Heaven and Earth, the Light of the Gods His Fathers. Issue of the bowels of SIN and NIN-GAL! when thou enterest into E-BARRA Thy beloved House, when Thou settlest in Thine eternal Sanctuary, me, Nabonidus, king of Babylon, the Prince Thy Supporter, the gladdener of Thine heart, the maker of Thy lofty dwelling-

place,-my good works joyfully behold, and daily at Thy rising and Isa. 7. 11. setting make my tokens good in Heaven and on Earth (lit, on the ground)! receive my supplications and hearken unto my praying! the righteous sceptre and staff of rule which Thou hast placed in my hands, let me carry eternally!

For Anunitu the Lady of Battle, That beareth bow and quiver, That fulfilleth the command of Bel (EN-LIL) Her Father, That overwhelmeth the foe, That destroyeth the wicked, That marcheth before the Gods, Who at sunrise and sunset maketh my tokens good, E-DU-BAR Her House which is in Sippara of Anunitu, -which for 800 years since SHAGA-SHALTI-BURIASH king of Babylon, son of KUDUR-EN.LIL (or Kudur-Bêli), no king had rebuilt,—its old foundation-record I dug for and discovered; I found it, and over the

foundation-record of Shaga-shalti-Buriash son of Kudur-En.lil I laid its foundation and fixed its flooring (or platform). That House I built anew, I finished the work of it. Anunitu the Lady of Battle, That fulfilleth the command of **Bel** Her Father, that overwhelmeth the foe, that destroyeth the wicked, that marcheth before the Gods, I settled in the dwelling thereof. The continual offerings and the freewill offerings I made larger than heretofore, and established them before Her.

Do Thou, O Anunitu, mighty Dame! when Thou joyfully enterest into that House, with joy behold my good works, and every month at sunrise and sunset unto Sin the Father That begot Thee present Thou the good (as an offering)!

Whosoever thou art whom the Gods and Shamash shall call to the kingdom, and in whose reign that House decayeth, and who will build it anew,—the Mu-sar, the writing of my name, let him look at and alter not: with oil let him anoint it: offerings of lambs let him offer: along with the Mu-sar, the writing of his own name, let him deposit it, and restore it to its place! May Shamash and Anunitu hear his prayers, hearken unto his word, walk beside him, overthrow his enemies! daily unto Sin, the Father That formed Them, may They speak for his good (or tell of his goodness)!

Note on the Date of Hammurabi, the Amraphel of Gen. 14.

In another inscription (Br. Mus. 85, 4–30, 2; published by Bezold, P.S.B.A., 1889), after stating that **Nebuchadnezzar**, son of Nabopolassar (Nabû-ap-lu-u-sur), in the course of his restoration of the temple of the Sun (E-Barra) at Larsav (now *Senkereh*), had found the foundation-record or memorial-cylinder (*temenna*) of his ancient predecessor Burna-Buriash, but had failed to find the corresponding record of "the ancient king who was before Burna-Buriash," Nabonidus adds that in the tenth year of his own reign Shamash commanded him to restore His Sanctuary again. Winds and storms had wrecked the old clay walls and exposed the old foundations; in consequence of which, Nabonidus states, "The writing of the name of Ḥammurabi, the ancient king, who 700 years before Burna-Buriash had built E-Barra and the step-tower over the ancient foundation-record, within it I beheld" (col. II. 10–26).

Burna-Buriash is identical with Burra-Buriash, king of Karduniash or Babylonia, whose date is determined by his correspondence with Amenophis IV. or Chu-en-aten, king of Egypt, circ. 1450 B.C., one of whose daughters was married to the son of Burna-Buriash. (Cf. page 83). The father of Burna-Buriash, Kuri-galzu, is mentioned by Nabonidus in a cylinder-inscription from **Ur**, now in the British Museum (col. III. 32; see W.A.I. 1. 69), and by Burra-Buriash in one of the Tell el-Amarna letters to Amenophis IV., also in the British Museum. Hence we arrive at 2150 B.C. (1450 + 700) as the approximate date for Ḥammurabi, the **Amraphel** of Gen. 14.

Inscription of Nabonidus.

Found at the Mound called the MUJELIBEH, near HILLAH, and now in the Museum at Constantinople.

(Published by V. Scheil, Recueil de Travaux, etc., Vol. XVIII., Liv. 1 et 2. Paris, 1896.)

In this valuable inscription, which is sculptured on a semicircular stele of basalt, Nabonidus has given us some historical notices of the highest interest, which will be found translated below. Although the upper part of the stele is unfortunately broken away, we know that the Assyrian king, whose destruction of **Babylon** is related in Col. I., must be **Sennacherib**; for we are told that **Merodach**, *i.e.* the image of the god which had been carried off by the conqueror, abode in **Assyria** twenty-one years. Now **Sennacherib** took **Babylon** in the year B.C. 689; and if we subtract 21 from this date, we get 668, the first year of Shamash-shûm-ukîn (Sammughes, Saosduchinus), which, according to the Babylonian Chronicle B. IV. 34, was the year of Merodach's return from **Assyria** to **Babylon**. And further, Col. I. concludes with the statement that the king of Assyria was slain by his own son, which agrees with what the Babylonian Chron. B., the Bible, and Berosus, relate of **Sennacherib's** end.

This inscription also enables us to determine precisely the date of the fall of **Nineveh**. In Col. X., it is said that 54 years had elapsed since the ruin of the temple of Sin at Harran (**Charran**, Carrhae) by the Umman-Manda or Medes, when Nabonidus set about restoring it. As he relates elsewhere (see page 208), he was divinely bidden to undertake this work in the first year of his reign (*i.e.* in B.C. 556), but was only able to do it three years later, when **Cyrus** had broken the power of the Umman-Manda, *i.e.* in 553. Adding 54 to this date, we get B.C. 607 as the year of the fall of **Nineveh**, and the final ruin of **Assyria**.

The king of the UMMAN-MANDA, the fearless, ruined all the temples of the god(s) of the land of **Assyria**; and the cities on the border of the land of **Accad**, which had revolted against the king of **Accad**, and had not gone to his assistance, he destroyed, and of their sanctuaries (walls?) he left not any; he laid waste their cities. The king of **Babylon**, like a flood, carried beyond bounds the work

We can only guess the sequel of Nabonidus' dream, owing to the loss of the upper portion of Col. XI. Doubtless, he found Asshurbanipal's votive seal, if not also the image of Sin, under the guidance of the "signs" revealed in his dream.

Head of a Sceptre from Babylon.

(Circ. B.C. 600.)

This fine specimen, which is in several respects unique, is a piece of semi-transparent blue chalcedony, beautifully cut and polished, and engraved with three lines of neo-Babylonian characters. Part of the original bronze rod of the sceptre still runs through the centre of it, though not shown in the illustration. The inscription is:

- (1) Ana Nabium bêli si-ri bêli-shu Nabû-mukîn-abli abil Nûr-Sîn

This may be rendered:

Annals of Nabonidus (Nabû-nâ'id).

The inscription, of which the chief remaining portions are translated below, is written in Babylonian cuneiform on a much-broken tablet of unbaked clay, which was acquired by the British Museum in 1879, and published in the following year by Mr. T. G. Pinches in the Transactions of the Society of Biblical Archaeology, Vol. VII. Part I. The size of the tablet is only about 4 in. by $3\frac{1}{2}$ in. The inscription is arranged in two columns on each side of it; but unhappily little is left of the first and fourth. Nabonidus reigned seventeen years (B.C. 555–538). The fragments of Col. I., which covers a period of between five and six years, show that in the beginning of his reign he made expeditions westward, **Hamath** and "the land of the Amorites" being mentioned.

Then follows in Col. II. the history of the overthrow of ASTYAGES the Mede (called *Ishtuwegu*) by **Cyrus** (*Kurash*), "king of Anshan." Nabonidus' neglect of the great Babylonian Festival of New Year and the religious ceremonies connected with it, is noted over and over again in the inscription; the suggestion being, no doubt, that to this fatal omission, repeated year after year, the various misfortunes and ultimate fall of the king were due.

There is a great gap between Col. II. of the Obverse and Col. I. of the Reverse. The former ends with the eleventh year of Nabonidus (Nabû-nâ'id); the latter describes the final events of the reign—the revolt of the subject-peoples, the king's attempt to conciliate his alienated gods, Cyrus' invasion of Accad, or North Babylonia, where "the king's son," i.e. Belshazzar (Bêlu-šarra-uṣur), as we know from another inscription, was permanently quartered with the troops, apparently waiting for the invader's approach; the surrender of Sippara (which was some fifty miles N.W. of Babylon) and the flight thence of Nabonidus to Babylon, the entry of Cyrus into the capital, and his appointment of Gobryas (Ugbaru, Gubaru) as governor of the city. The narrative is evidently of priestly origin, and in all probability was written in Babylon shortly after the establishment of the Persian rule.

Birs Nimrûd. The Ruins of E-Zidda, the Great Temple of Nebo at Barsib or Borsippa.

This huge pile of ruins is situated about ten miles south-west of the mounds of **Babylon**. Local tradition has long made it the site of the Tower of **Babel**. Explorations have proved that it marks the Ziggurrat or observatory tower of the great Temple of **Nebo**, the god of letters

(page 169), in the city of Borsippa, the sister city of Babylon. This temple was called E-Zidda, i.e. the lasting house. Borsippa was celebrated as early as B.C. 2000 for its priestly college, where doubtless every branch of the wisdom of the Chaldeans was taught. The Birs marks the site of a great seven-staged tower of considerable height, for even

Gen. 11. 1-9. now it rises 253 feet above the plain. In the British

Museum is the bronze door-step of this temple, bearing
an inscription which reads (see plate, page 206):—

"Nebuchadnezzar, the king of Babylon, supporter of the temples of E-SAGILLA and E-ZIDDA, the eldest son of Nabopolassar, king of Babylon, am I. For Nebo, the supreme lord, prolonger of the time of my life, E-ZIDDA his house in Borsippa anew I built."

All the bricks from this site are inscribed with the name and titles of Nebuchadnezzar II., who restored the temple with great splendour. The cement in which they are embedded is so hard that it is almost impossible to detach a perfect specimen from the mass (Layard).

This temple was the great educational centre of Babylonia, and some suppose that hence the story of linguistic confusion was associated with it. Assur-bani-pal copied its great library (see page 200).

the ruins of the ancient Pasargadae, which Cyrus made his royal residence after the conquest of Asia Minor and Ba-The age bylonia. of the remains at this site is determined by the inscriptions of Cyrus engraved upon them . in Persian, Median, and Babylonian cuneiform: the last indicating that Cyrus had already added Babylonia to his dominions (circ. B.C. 538).

It will be noticed that the features are distinctively European, and quite unlike the Assyrian and Egyptian types. Yet the ornamentation of the figure is entirely borrowed from Egypt and Assyria. The

triple crown with *uraeus* snakes is Egyptian (the small figure held in the right hand is also topped by a *uraeus*); the four cherubic wings, and the fringed and embroidered border of the dress are Assyrian.

Inscription of the Broken Cylinder of Cyrus.

(From Babylon.)

In this inscription the great Conqueror of Babylon and Liberator of the Jews evidently speaks for himself. In spite of the large fracture affecting the beginning and the end of it, the general import is perfectly clear; and the ideas and language present a very instructive parallel to those of the Biblical books of Kings, and the latter half of Isaiah. The religious tone of the whole is as sincere as that which characterises the inscriptions of Nebuchadnezzar himself. Cyrus ascribes the ruin of NABONIDUS to the anger of Merodach, "Lord of the gods," which was excited by innovations and omissions in the sphere of religion (lines 5-10, 33). The opening lines, after relating Nabonidus' elevation to the throne, appear to have described the various measures of the new king, which were hostile to the local temples of Babylonia and their timehonoured rights. Nabonidus appears to have aimed at enforcing the universal worship of Merodach, the tutelar god of Babylon, by the suppression of the old local worships—a decided step in the direction of Monotheism. His policy thus resembled that of Hezekiah (2 Kings 18. 4, 22), and **Josiah** (2 Kings 23. 5, 8, 9, 15, 19). It is unfortunate that his proceedings, which were detailed in lines 5-8 of the inscription, can no longer be precisely determined; but it is evident that the king attempted to centralize the national religion in his capital by withholding the wonted supplies from the great local sanctuaries, and by removing their gods to Babylon (lines 10, 33); abolishing "the continual offering" in each case, and instituting the worship of Merodach throughout the country (line 7). MERODACH himself resented the invasion of his own domain by the intruding gods, and chose Cyrus as his minister of reparation, to restore the gods of Babylonia to their proper abodes, and the gods and peoples of other lands and cities, who had been expatriated by the Babylonian sovereigns, "to their own dwelling-places" (line 32). We thus see that the permission given to the Jews to return to their own country, and the surrender to them of the sacred vessels of their Temple (in default of any image of their God), was no act of isolated elemency. but a part of the general policy of the Persian conqueror towards the foreign populations who had been deported to Babylonia by NABOPO-LASSAR and his successors.

I have translated the inscription from the original text as published in Vol. V. of The Cuneiform Inscriptions of Western Asia, Plate XXXV.

BROKEN CYLINDER OF CYRUS.

10 In wrath because he brought them into SHU-ANNA (i.e. Babylon), Merodach He turned towards all the districts whose dwellings were thrown down.

And (to) the people of Shinar and Accad, who were become Isa. 26. 19; Ezek, 37, 1-14. as dead, He turned [His regard?]; He showed compassion upon all the lands together. He looked for, He found him,

Isa. 45. 1, 2; Yea, He sought out an upright Prince, after His own heart, whom 46, 11, He took by his hand, Cyrus, king of the city of ANSHAN; He named his name; to the kingdom of the whole world He called him by na[me].

The land of Qutû (and) all the Umman-Manda he humbled to his feet; the Blackheaded folk, whom his hands subdued,-

In faithfulness and righteousness he looked after them. MERODACH, the great Lord, the Guardian of His people, joyfully beheld his good deeds and his upright heart.

15 To His own city Babylon his march He commanded; He put him on the road to TIN-TIR (i.e. Babylon); like a comrade and helper He marched at his side.

His great hosts, whose number like the waters of a river could not be known, with their weapons girded on, advanced beside him.

Without skirmish or battle He made him enter Shu-Anna. His own city Babylon He spared from distress; NABONIDUS the king, who feared Him not, He delivered up to him.

- The people of TIN-TIR in a body, the entire land of **Shinar** and **Accad**, the nobles and grandees, bowed down before him, kissed his feet, rejoiced at his accession; their faces brightened.
- The lord who by his power had revived the dead,* who from strait and stress had exempted all,—they gladly did him homage, heeded his word.
- Ezra 1. 2. I am Cyrus, the King of the World, the Great King, the King of TIN-TIR, the King of the land of Shinar and Accad, the King of the Four Ouarters (i.e., of the world);
 - The son of CAMBYSES, the Great King, King of the city of ANSHAN; the grandson of CYRUS the Great King, King of the city of ANSHAN; the great-grandson of TEISPES the Great King, King of the city of ANSHAN;
 - The enduring seed of royalty, whose reign **Bel** and **Nebo** loved, whose lordship for their hearts' delight they longed for. When I [into the mid]st of TIN-TIR had entered peacefully,
 - With rejoicings and festal shouts in the king's palace I occupied the seat of sovereignty. Merodach, the great Lord, [turned towards?] me the open heart of the sons of TIN-TIR; and daily I sought His fear.
 - My great hosts in the midst of Tin-tir went about harmlessly; the whole la[nd of Shin]ar and Accad I suffered to have no ter[rifi]ers.
- 25 Within Babylon and all its cities in peace I looked after the sons of Tin-tir and the yoke of their dishonour I removed (?);
 - Ezra 1. 2; Isa, Their sighing I stilled, I relieved their sorrow. To [execute] works 44. 28; 45. 13. Merodach the great Lord [upon me] laid command.
 - To me, Cyrus, the king that feareth Him, and to CAMBYSES the son, the issue of [my] body . . . [and to] the who[le] of my army
 - He graciously inclined, and in peace before it kindly All the kings who abode in royal halls,
 - Who in all the Quarters (of the world) from the Upper Sea unto the Lower Sea abode on the dry [land, together with the whole of] the kings of the Amoriteland who abode in tents, all of them,
- 30 Their rich tribute brought, and within SHU-ANNA did kiss my feet. From[the cities of Nine]veh, Assur, and Nanna-erin (?),
 - Accad, the land of Abnunag, the city of Zamban, the city of Me-Ṭurnu, Dûr-ili, unto the border of Qutû, the ci[ties beyon]d the Tigris whose settlements were founded from of old,—
 - Cf. Ezra 1. 3, 7. The Gods that abode in them I restored to their place, and settled in an eternal abode; all their populations I gathered together and restored to their own dwelling-places.
 - And the Gods of the land of **Shinar** and **Accad** whom NABONIDUS, to the anger of the Lord of the Gods, had brought into Shu-Anna, by the command of Merodach the great Lord in peace (or safely)
 - In their own shrines I made inhabit (again) a dwelling of heart's delight. May all the Gods, whom I brought (again) into their own cities,
- 35 Daily before **Bel** and **Nebo** speak of length of days for me! may they utter words in my favour, and to Merodach, my Lord, let them say: "Cyrus, the king that feareth Thee, and Cambyses his son,

. made them all dwell in a quiet habitation."

[The remainder of the inscription, lines 37-45, is broken away, only the ends of the lines being preserved.]

^{*} Perhaps this line refers to Merodach, "the Reviver of the Dead," rather than to Cyrus, as most understand. Cf. line 17.

The Tomb of Cyrus at Meshed-Murghâb

is still in a relatively perfect state. The style is neither Assyrian nor Egyptian, but archaic Greek; and it was probably designed by some Ionic architect. Formerly it bore in cuneiform characters the inscription: I am Cyrus the king, the Achamenide; but the stone has since been broken away. The sepulchral chamber, which is only 21 ft. by

THE TOMB OF CYRUS THE GREAT, AT MESHED-MURGHÂB.

r6 ft. 5 in. on the outside, and is built of great blocks of marble beautifully fitted together without cement, stands on seven white marble steps, of which the lowest measures 43 ft. by 37 ft. It has a sloping marble roof, with triangular pediments and mouldings at each end. It was once surrounded by a colonnade or portico of twenty-four columns. It is now called *Gabr-i-Madar-i-Soleimân*, "the tomb of Solomon's mother," and some think it was the tomb of Mandane, the mother of **Cyrus**.

Darius, King of Persia.

(B.C. 521-468.)

There are three kings of this name mentioned in the Old Testament. Of the first, **Darius** the Median, the monuments know nothing. On the capture of Babylon in B.C. 538 by **Cyrus**, the government of the city was assigned to Gobryas, the governor of Kurdistan; and by most scholars he is regarded as the person intended by **Darius the Mede**.

TRILINGUAL CYLINDER-SEAL, ENGRAVED WITH THE NAME OF DARIUS.

The king is hunting lions, under the protecting presence of Ahuramazda his god.

The second was Darius the son of Hystaspes (B.C. 521), who is the **Darius** of the Book of Ezra. On the death of Cambyses, the Persian empire was for a time disintegrated; and after the death **Ezra 5.5**; **6.1.** of the Magian Gaumata (Pseudo-Smerdis), a revolt (B.C. 520-519) broke out in **Babylon** under Nidinta-Bel, who claimed to be Nebuchadnezzar son of Nabonidus (cf. page 208). This revolt, like those which followed it in other parts of the empire, was put down with great severity, as described by **Darius** himself in his inscription

on the rock of Behistun.* Darius the son of Hystaspes was descended from the same Achæmenian family as Cyrus, but by a different branch. The family of Darius was more purely Persian; that of Cyrus having Median or Elamite (Anzanian) affinities. The former retained the older Iranian creed and the worship of Ahura-Mazda, or Ormuzd; and it is to this one god, the maker of heaven and earth, the creator of men, that Darius Hystaspis dedicates all his works. Although a monotheist, Darius, like Cyrus and Cambyses, found it necessary to be tolerant, even to conformity with the creeds of the nations he ruled. We thus find him in Egypt lavishly endowing the temple of Amun (cf. page 99) in the oasis of El-Kargeh; and the same tolerant spirit explains the restoration to the Jews of the privileges granted to them by Cyrus. Although ruling over Babylon, he does not seem to have restored the temples or to have taken any prominent part in the worship of that city.

The illustration, page 227, shows the trilingual seal of the second Darius (Hystaspis) inscribed in Old Persian, Scythian, or Proto-Medic, and Babylonian, "I am Darius the great king." It is now one of the treasures of the British Museum. The king is represented hunting lions under the protecting presence of Ahura-Mazda, or Ormuzd, his god: compare Seal, page 31, Illustrations, pages 5, 161, 162, 166, and Plate facing page 200.

The third, **Darius the Persian** of the Book of Nehemiah has been identified with Darius II., called Nothus (B.C. 424-405); **Neh. 12. 22.** but is more probably Darius III., Codomannus, who was

conquered by Alexander the Great, B.C. 330.

GOLD DARIC.

^{*} The trilingual inscription on the rock of Behistun, in three forms of the cuneiform writing, of which the Semitic version furnished a key to the decipherment of the monuments of Assyria and Babylonia, much as the Rosetta Stone has done to those of Egypt, records the victories of Darius the son of Hystaspes over the revolted provinces of the kingdom of Cyrus. Besides elaborate sculptures of Darius and his two attendants, and ruder representations of the ro defeated chiefs, it comprises nearly 1,000 lines of cuneiform writing. Unfortunately, owing to the comparative inaccessibility of the rock, no worthy reproduction of this most important inscription is possible.

A Babylonian Deed of Sale, dated in the Third Year of Darius (518 B.C.).

This document is given as a good specimen of the so-called Contract Tablets, which have been found in such quantities in the mounds of Babylonia and Assyria. They have their own interest, as records of the legal business of Oriental antiquity. The tablet, which I acquired some years ago, is well-preserved, only the last two or three characters of the first line being much defaced. The text relates to the sale of a field (cf. Gen. 23; Jer. 32), and of the crop of grain and dates standing upon it. The seller is Bêl-êţir, the buyer, Mardug-nâşir-abil, whose own land abuts on the north side of the field.

The longer sides are adorned with impressions of engraved seals, thus:

The symbol of the crescent moon, before which the two men, presumably the two principals in the transaction of which the tablet is the legal instrument, are lifting up their hands in attestation of good faith (Gen. 14. 22; Exod. 6. 8), is suggestive in relation to that verse

in the psalm where the moon is called "the Faithful Witness in Heaven"; probably an ancient title of the Moon-god used by the psalmist for the sake of poetic ornament (Ps. 89, 37).

Above the seals, on both sides of the tablet, is written:

KISHIB ERI-MARDUG DUB-SAR. Seal of Arad-Mardug, Scribe.

On the short ends of the tablet appear impressions of the thumb-nail (supru) of Bêl-êtir, as stated in the text (l. 45).

The Phœnicio-Hebrew Alphabet, showing its Origin from the Old Linear and Primarily Pictorial Script of Shumir or Shinar, rather than from the Egyptian Hieratic Character.

[Since De Rougé started the theory, many scholars have held that the Egyptian hieratic writing (see page 107) is the real basis of the Phænician alphabet. It is, however, impossible to see any likeness between some of the letters and their supposed Egyptian prototypes; and the theory leaves the names of the letters—Aleph, Beth, Gimel, &c.—totally unaccounted for. The late Dr. Mordtmann suggested, but was unable to establish the rival view, which is now held by Prof. Hommel and others. For completeness' sake, our table gives both the Babylonian and the Egyptian hieratic forms.]

It is not so likely that the great monumental systems of hieroglyphic writing originated independently, as that they are offshoots from one original stock. In all branches of research, science looks for ultimate unity in the apparent multiplicity of actual phenomena, and the present case is not to be assumed without reason as an exception to the general rule. If, however, people want a priori grounds for a provisional theory of connexion, such may be found at once in the contiguity of Babylonia, Syria, Egypt, and their immemorial intercourse with each other. But, further, this theory is strongly corroborated by two considerations. The first is that of the still accumulating evidence for the Babylonian origin of the vast system of the Chinese characters; the second, that of the probable derivation of the Egyptian writing and even language from the same ultimate source. It is probable that alphabetic writing is based on a simplification of the same primitive system.

Levy indeed denies the hieroglyphic origin of the Phænician alphabet. And Von Gutschmid affirms, "That the Semitic alphabet did not come from cuneiform writing may be taken as certain; but also it is not probable that it came from the hieratic character of the Egyptians" (Encycl. Brit. s.v. Phænicia). Against such opinions it may be urged in limine (I) that the hieroglyphic or pictorial origin of writing in general is now almost universally recognised by those who have given special attention to the subject; (2) that the old Persian cuneiform writing supplies an actual instance of alphabetical development from the Assyrio-Babylonian syllabic system; (3) that the ancient Egyptian system, which probably started from a Babylonian basis, has already developed a set of some twenty-five strictly alphabetical signs, which it uses in combination with pictorial syllabic symbols and determinatives; (4) that the Cypriote syllabary obviously represents an intermediate stage between the pictorial or ideographic indication of entire words, and the alphabetic indication

of elementary sounds; and (5) that the Japanese alphabet or syllabary of seventy-two open syllables, with the vowels a, e, i, o, u, and the diphthongs ai, au, is historically known to have originated in abridgments and contractions of more or less complex Chinese ideographs.

To build an alphabet on the basis of other alphabets is doubtless no insuperable task. We have the historical examples of Mesrop, the Armenian, of the Gothic bishop Ulphilas, and those of many modern missionaries. The old Wigur script, which was the archetype of Mongolian and Manchau, was adapted from a form of the Semitic alphabet; and that splendid monument of the scientific analysis of articulate sounds, the Devanagari, appears to depend on another form of it. The one alphabet has gone the round of the world. It does not look as if men were much given to absolute originality in these matters.

We assume then that the writing of words preceded the writing of the phonetic elements of words. The first writing was pictorial and ideographic; then came the stage of phonetic spelling, partial or complete, in the case of ideograms likely to be misread owing to polyphony or other causes. In Sumerian the addition of the symbol \\\\gamma\) ga, to the symbol \(\pm\) \(\frac{a}{2}\) \(\frac{a}{2}\) \(\frac{a}{2}\), \(\frac{a} and excludes the other values of the character. And when the symbol (((, which might be read either es or ba or sin, is provided with the gloss | si-in, we understand that in this instance it is to be read sin, and not es or ba. Now this resolution of words which are closed syllables, like bad, gab, dug, sin, into the elements ba-ad, ga-ab, du-ug, si-in, is an important step towards the achievement of alphabetic writing. The same may be said of such resolutions as \text{YY} shid into shi-ta, shi-ti, or III lig into li-ki, or I (g)ud (also ĝis) into (g)u-tu, where shita, shiti, liki, etc., seem to be later developments of the original monosyllabic root. Before however the analysis of closed monosyllables like bad, gab, etc., into ba-ad, ga-ab, etc., was possible or likely to suggest itself, the existence of words consisting of a single open syllable was necessary. The strong tendency of Sumerian to drop final consonants when not followed by a vowel, gave rise, at a comparatively early period, to a number of words of this kind. Thus there can be little question that $\sum ba$, to divide, was originally identical with the root bad, to split, to open, Sb222; cp. also bar, ba, half, and bal, axe. This tendency prepared the way for phonetic spelling of the kind under consideration. The comparatively modern Chinese method which spells a word by writing two characters together, and taking the initial sound of the first with the final sound of the second, is similar in principle, if clumsier in effect. Thus the native

lexicographers spell 心 sim, heart, 昔林 sik-lim, s-im, the middle letters being disregarded.* The Sumerian and the Chinese modes have this in common, that both combine words to suggest the sound of another word. To return to one of our instances, the si, originally sig, and stime in, by which we spell (((sin, are by themselves as much significant words as the 昔 sik, si, and 林 lim, lin, of the Chinese example. And in both languages, when two monosyllables are thus combined to spell another word, they are absolutely as non-significant individually as alphabetic signs. The meanings of si(g) and in, si(k) and lim, have no bearing whatever on the meaning of sin, sim. This is surely a decided step in the direction of alphabetic writing, consisting as it does in the use of written symbols to suggest only sounds, not sense. The Chinese, it is true, got no further; but a quick-witted people like the Japanese could find out how to utilize simple open syllables for the purpose of constructing a scientific syllabary analogous to the ancient Cypriote.

The ordinary progress of phonetic change and of dialectic variation, by which the vowel of a syllable might fluctuate between a, i, u, would further tend to emphasize the consonantal sound as the constant element in a syllable. When it was observed that $\bowtie ba$ had also the value bi, that $\bowtie was ha$, and hi, that $\bowtie was both na$ and nu, the possibility of using a written symbol to suggest the constant sound directly and to imply the vowel required by the sense, may have presented itself to the unknown authors of so-called alphabetic writing. I say so-called, for it is evident that the Semitic alphabet and all its ancient offshoots are essentially syllabic. This is probably the true explanation of the fact that the Phænician alphabet is destitute of any special symbols for vowel sounds. They were not necessary while the language was still a living one, because each of the twenty-two symbols was itself of syllabic origin and thus implied the presence of a vowel, which was a, i, u, according to circumstances.

It would seem, then, that when a sufficient number of open syllabic sounds, like ba, ga, da, already find appropriate symbols in the script of a language, an alphabet virtually exists. The practical obstacle to the immediate perception or utilization of the fact will lie in the number of symbols, greater or less, with identical values. This and other difficulties in the way of alphabetic origination would not be overcome in a day. We have not to imagine a deliberate invention of the Semitic alphabet

by some reflective scribe. A hieroglyphic system like that of Babylonia, Egypt, or China, presenting a great number of homophonous symbols, is naturally an *embarras de richesse* to the first simplifiers of writing. The choice, therefore, does not immediately fall on a single sign as the fittest representative of a particular sound. Each simple sound will at first have several allowable symbols. For instance, the Japanese adapters of the enormously complex system of Chinese writing, bewildered by the

multitude of available symbols, at the outset naturally adopted too many characters for each of the sounds of their own language. This in turn caused much uncertainty and embarrassment to Japanese writers and readers, until things were reduced to order and uniformity by the introduction of printing from metal blocks, when the number of possible forms was greatly diminished, and fixity was given to the elements of writing (Hepburn). Such difficulties are natural in the attempt to pass from a vast pictorial system to the simpler methods of a syllabary. We may therefore suppose that analogous perplexities beset the primary adaptation of the Babylonian symbols to the purposes of alphabetic writing.

Since De Rougé, it has, no doubt, been a widely circulated opinion that the Phœnician characters were originally borrowed from the hieratic Egyptian. But almost every scholar who has given any particular attention to the subject has expressed himself dissatisfied with the comparisons suggested by De Rougé and his followers. In some instances the supposed resemblances are remote, in others altogether invisible. (See the Plate, and especially the letters Aleph, Beth, Teth, Nun, Ain, Pe.)

The complete sacrifice of the old traditional names of the letters has also been felt to be a difficulty in the way of the Egyptian theory; and it is plainly in favour of our own view that it, for the most part, retains and accounts for the names of the letters. To take a couple of instances, it will, I think, be generally recognized that \mathbf{b} bet is sufficiently like \mathbf{b} ba, bi, to split (Sumerian bad, bid, = Chinese pit).

The difference of shape between the Babylonian sign and the Phœnician \triangle is merely a variation for convenience of writing. The latter may be called a one-stroke adaptation of the former. As to the name, beth, b-t (Semitic Babylonian $b\bar{\imath}t$, $b\bar{\epsilon}t$) is the common Semitic term for house. The original sound of the symbol becomes its name in the Phœnician alphabet; the original meaning is naturally exchanged for a familiar Semitic one which happens to be that of the corresponding Semitic sound.

It will be noticed that more than one Sumerian prototype is given in the Table for many of the Phœnician letters; and, looking at all the facts, one might be inclined to think that the Phœnician characters represent the common element of Sumerian signs acrophonically similar in sound. Perhaps, however, we should rather say that for an indefinite period the various related Babylonian symbols were used indifferently as alphabetic representatives of the Semitic sounds indicated by the corresponding letters. This would be the first step; and it seems to account

for the varying forms of the Phœnician signs, which need not all be deduced from a single ancestor, but may preserve traces of several. One locality, even one individual scribe, might prefer one form of a letter, another another, until at last by the intercourse of commerce and diplomacy a form would result exhibiting a likeness to all, but not exactly identical with any of the prototypes.

The Baal Lebanon Inscription.

We unfortunately possess only fragments of this ancient and interesting inscription. It is engraved on portions of three bronze sacrificial bowls (paterae), and is at least contemporary with the inscription of Mesha (see page 239), if not older than that famous monument. Some would date it about B.C. 1000. The engraved portions of the three bowls are shown in the illustration, which is borrowed from the Corpus Inscriptionum Semiticarum. They are distinguished by slight differences in the writing. These fragments, which are very thin, were purchased at Limassol, in Cyprus, from a seller of old iron, by a dealer named Laniti; and were acquired in 1877 by the Bibliothéque Nationale of Paris. The bowls are supposed to have been dedicated originally by different donors at about the same time in a temple of Baal Lebanon, not far from Sidon. The remains of the inscription on the fragments of the first bowl may be rendered:—

.... governor of Qarthadasht, servant of Hiram, king of the Zidonians. Then he gave to Baal Lebanon, his Lord, as the choicest of the bronze (or in the best bronze)

The small fragment of the second bowl has only:—
.....tâb, governor of Qarthadasht.....

Here the syllable *ṭâb* appears to be a relic of the lost name of the "governor of Qarthadasht," who dedicated this bowl.

The small fragment of the third reads:—

. [to Ba]al Lebanon, his Lord

Both **Esarhaddon** and **Assurbanipal** mention a city of Qartihadasti in Cyprus. It is the same name as Carthage, and means New-town.

The Moabite Stone.

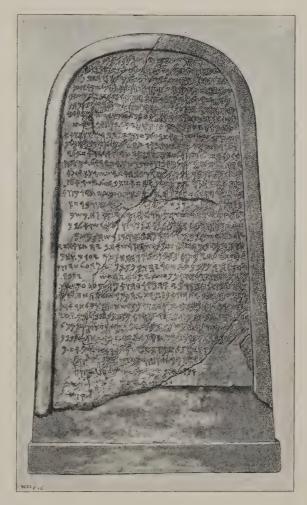

(9th cent. B.C.)

This remarkable Stele was discovered at Dîbân, the ancient **Dibon** (Isa. 15. 2), by the Rev. F. Klein, in August 1868, and is one of the most important historical and literary monuments in connexion with Hebrew history. The inscription is written in the Phænician character, of which it is one of the oldest specimens extant; the language approaches Hebrew nearer even than does the Phænician. Great light is thrown by this external record upon the history of the period of the reigns of **Omri, Ahab**,

Jehoram, and Jehoshaphat. At the end of the
reign of Ahab, Mesha,
king of Moab, who had
been obliged to pay Israel a tribute of the wool
of 100,000 lambs and
100,000 rams, revolted

and the allied kings of Israel, Judah, and Edom marched against him and compelled him to flee to Kir-haraseth, where Mesha offered his son in sacrifice. The monument was erected by this king Mesha, circ. B.C. 850, to his god Chemosh, and to commemorate his successful revolt from Israel, and furnishes many details in agreement with the Hebrew account, as shown by the following translation:-

STELE OF MESHA, KING OF MOAB (circ. B.C. 850).

I am Mesha, son of Chemosh-[Melech], king of Moab, the Dibonite;

My father reigned over Moab thirty years, and I reigned after my father;

And I made this $b\bar{a}m\bar{a}h$ (= "high-place") for **Chemosh** at Korkhah,

A $b[\overline{a}m\overline{a}h]$ of salvation, for he saved me from all the kings, and made me look on all my enemies.

Omri was king of Israel, and he oppressed Moab many days, for Chemosh was angry with his land.

His son succeeded him, and he also said, "I will oppress Moab."

In my days he said [thus]; but I looked on him and on his house, and Israel perished for ever.

Omri took [all] the land of Medeba and [Israel] dwelt in it during his days, and [half] the days of his son, even forty years;

But Chemosh [cap]tured it in my days.

And I rebuilt **Baal-Meon** and made therein the tank (or pool),

And I [rebuil]t Kirjathan. The men of Gad had dwelt in the land of **Ataroth** from of old, and the king of Israel rebuilt **Ataroth** for himself (or for them);

But I made war against the town and took it;

And I slew all [the people of] the town for the pleasure of **Chemosh** and **Moab**, and I carried off thence the altar of Dodah, and dragged it before Chemosh in the city. And I settled therein the men of **Sharon** and the men of Macharoth.

And Chemosh said to me, "Go, seize Nebo beside (?) Israel!" and I went in the night, and fought against it from the break of day until noon, and I took it;

And I slew in all seven thousand men and boys and women and girls and damsels; for unto Ashtor-Chemosh I had devoted them.

And I took thence the altars of Jehovah and dragged them before Chemosh.

And the king of Israel had built Jahaz; and he dwelt in it whilst he waged war against me;

But Chemosh drove him out before me.

And I took of Moab two hundred men, all its chiefs; and I carried them to Jahaz, which I took to add it to Dibon.

I it was who rebuilt Korkhah, the Wall of the Woods, and the Wall of the Mound (Ophel);

And I rebuilt her gates, and I rebuilt her towers.

And I built the king's house, and I made the conduits of the water-tanks within the city; But there was no cistern within the city, in Korkhah; so I commanded all the people, "Make you each one a cistern in his own house":

And I dug the channels for Korkhah by means of the prisoners from Israel.

I rebuilt **Aroer**, and I made the highway through (or to) the **Arnon** (ravine?), and I rebuilt Bethbamoth, for it was overthrown.

I rebuilt Bezer for all Dibon was subject [unto me].

And I reigned a hundred cities, which I had added unto the land.

And I rebuilt Medeba and Beth-Diblathan

And Beth-Baal-Meon; and I took there the sheepmaster . . . the flocks of the land. And Horonan (= Horonaim)—there dwelt in it the Dedanite. And Dedan said Chemosh said unto me, "Go down, war against Horonan!"

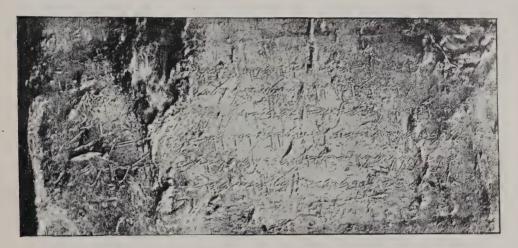

So I went down and warred [against it] Chemosh dwelt in it (or restored it) in my days

It is at once apparent how important a document this is to the Bible student. It affords an apparently independent contemporary record of the border-wars between **Moab** and **Israel**, and also throws considerable light upon topography.

The Siloam Inscription.

(Circ. 701 B.C.)

THE characters are Phœnicio-Hebrew, and give a tolerably early form of the alphabet used in common by the Phœnicians, Hebrews, Arameans, and Moabites. The language is Biblical Hebrew. These six lines, the oldest and longest inscription of the Hebrew Monarchy, are inscribed in the rock within a tunnel whose making they commemorate. This tunnel, which brings the water of **Enrogel**, or *Gihon*, the single spring at

THE SILOAM INSCRIPTION (circ. B.C. 701).

Jerusalem, through the solid rock from the valley of Jehoshaphat outside into the parallel valley within the walls (the later Tyropæon), is assumed to be the "conduit" of 2 Kings 20. 20; 2 Chron. 32. 30, and is consequently attributed to Hezekiah's reign. (But cf. a paper by E. J. Pilcher in P.S.B.A., May 1897, which refers both tunnel and inscription to the time of Herod the Great.) The inscription, though now illegible in many places, may be rendered somewhat thus:—

[Finished is] the boring! And this was the manner of the boring: [the hewers were plying the pick-]axe, each toward his fellow, and there were still three cubits to [finish; when there was heard] the voice of one calling to his fellow; for there was a rift in the rock on the right [.....] And on the day of the boring the hewers struck, each to meet his fellow, pick-axe to pick-axe; and the water ran from the source to the pool, two hundred and a thousand cubits. And a hundred cubits was the height of the rock above the heads of the hewers.

PHŒNICIAN MONUMENTS.

Limestone Stele of Jeḥaumelech, King of Gebal. (Byblus.)

A PHŒNICIAN monument of the 5th century B.C. The king stands in Persian garb before his goddess, whose crown and sceptre are of an Egyptian type, with a cup of wine for pouring a drink-Cf. Ps. 116. 13, 14. offering in his hand. The winged solar disk overshadows both. Below is inscribed in Phœnician:—

"I am Jehaumelech, king of Gebal, son of Jaharbaal, grandson of Adon-melech, king of Gebal, whom the Lady Baalath of Gebal made sovereign over Gebal. And I call upon my Lady Baalath of Gebal, for she heareth my voice. And I make for my Lady Baalath of Gebal this brazen altar which is in this [place], and this gilded graven figure, opposite my own figure, and the gilded [winged solar disk] in the [mid]dle of the stone, and this colonnade and its pillars and the capitals upon them and the roof thereof I made, even I, Jehaumelech, king of Gebal, for my Lady Baalath of Gebal; because as often as I have called upon my Lady Baalath of Gebal, she hath heard my voice and done me pleasure. May Baalath of Gebal bless Jehaumelech, king of Gebal, and make him live and prolong his days and his years in Gebal because he is a righteous king! and may the [Lady Ba alath of Gebal give him favour in the sight of the gods and in the sight of the people of this land, and the favour of the people of [other lands for ever]! Whatever sovereign or man shall fashion another work upon [this altar or upon] this gilded sculpture, or upon this colonnade, I, Jehaumelech, [king of Gebal set my face against] the maker of that work; and whether may the Lady Baalath of Gebal [curse] that man and his seed!"

It is hardly necessary to call attention to the close correspondence of the language and religious ideas of this inscription with those of the prophets and psalmists of the Old Testament. But the apposite words of the late Professor Robertson Smith may well be quoted here:—

"As the kings of Israel ascribe their sovereignty to the grant of Jehovah, so the king of **Gebal** declares that it was the divine queen of Byblus who set him as king over the city. As the psalmist of Ps. cxvi. says, 'I take up the cup of salvation, and call upon the name of Jehovah,' so this heathen king is figured standing before the goddess with a cup in his hand, and exclaiming, 'I call upon my lady the sovereign of Gebal, because she hath heard my voice, and dealt graciously with me.' And just as the prayer for life and blessing to the king of Israel in Ps. lxxii. is a prayer for a king judging in righteousness, the Phœnician goddess is invoked to bless Jeḥaumelech, king of Gebal, and give him life and prolong his days in Gebal, because he is a just king, and to give him favour in the eyes of gods and men." (*Prophets of Israel*, Lect. II., page 51.)

LIMESTONE STELE OF JEHAUMELECH, KING OF GEBAL (Byblus).

Inscription on the Sarcophagus of Eshmunazar II., King of the Zidonians.

ESHMUNAZAR, "Eshmun helpeth," is a name like **Eleazar**, "El helpeth." The touching language of the young king's epitaph offers many noteworthy parallels to Old Testament phraseology. Eshmunazar II., as we learn from this inscription, was still under the tutelage of his mother, the widowed queen Ammashtart ("handmaid of Ashtoreth"), when he died, circ. B.C. 400.

1 Kin. 6. 38. "In the month of Bul, in the fourteenth year of the reign of Eshmunazar, king of the Zidonians, the son of king Tabnith, king of the Eccl. 7. 17. Zidonians, spake king Eshmunazar, king of the Zidonians, saying:—I was rapt away before my time, during my state of tutelage, an orphan, the son of a widow; and I lie in this coffin and in this grave, in the place that I built. I adjure every prince and every man not to open this Job 3. 14. fore the Lord of Kings gave us **Dor** and **Japho**, the fine corn-land in the field of **Sharon** as a recompence (?) for the great things which I did, and added them to the bounds of the country, that they might belong to the **Zidonians** for ever.

I adjure every prince and every man, neither to open my chamber nor to dispoil my chamber, nor to build over this bed, nor to carry away the coffin of my bed; lest the holy gods deliver them up, and cut off that prince and those men and their seed for ever."

INSCRIPTION ON THE SARCOPHAGUS OF ESHMUNAZAR II., KING OF THE ZIDONIANS.

The Phœnicians were favoured by the Persian monarchs, on account of their fleet, and a common hostility to the Greeks. The "Lord of Kings" who gave **Dor** and **Joppa** to Eshmunazar was probably Artaxerxes II.

Bilingual Inscription, Phænician and Cypriote.

(Circ. B.C. 345.)

THE importance of bilingual inscriptions for the decipherment and interpretation of unknown languages and systems of writing is self-evident. It was a famous bilingual, the Rosetta Stone, that gave the clue to the

reading of Egyptian hieroglyphics; and it was by help of such inscriptions as the present that the late George Smith, Dr. Deecke, Dr. Birch, and others read and interpreted the Cypriote characters.

A BILINGUAL INSCRIPTION, PHŒNICIAN AND CYPRIOTE.

Dating from about B.C. 345.

It is a votive memorial on the part of Menahem, son of *Ben-hodesh*, to the God Resheph (=Apollo), "because he heard his voice"; and was found near the site of Tamassos in Cyprus.

The stone, originally a votive statue, was found by Col. F. Warren, in the course of his excavations at *Frangissa* in Cyprus, near the site of the ancient city of Tamassus. The Phœnician text may be rendered as follows:—

"This is the figure (cf. Deut. 4. 16) that Menahem, son of Ben-Hodesh son of Menahem son of 'Araq, gave and erected to his Lord Resheph Elyîth, in the month of **Ethanim** (cf. 1 Kings 8. 2), in the thirteenth year of king Milkiyathan, king of **Chittim**, and Idyal (= Kition and Idalion, Assyr. Edi'al); because He heard (his) voice. May He bless (him)!"

The Cypriote is briefer:—

"The statue which Manasses (\emph{sic}) Nõmeniön gave and dedicated to the god Apollo of Helos. With luck ! "

The interest of the Cypriote writing lies in the fact that it consists not of letters, but of syllables, although the Cypriote language is a dialect of Greek; *i.e.* the words ton andriantan, "the statue," are written in the Cypriote thus: TO-NA-TI-RI-A-TA-NE. The system thus occupies a middle position between pictorial and alphabetic writing.

Ben-Hodesh, "Son of (= born at) New Moon," answers to Nomenion, the Greek Noumenios, which has the same sense. Resheph, the Phænician and Cypriote Apollo, is also mentioned in the old Aramaic inscriptions of Sam'al. Milkiyathan began his reign circ. B.C. 375.

The Sacrificial Tablet of Marseilles.

(Corpus Inscriptionum Semiticarum, 165.)

This celebrated monument is a stone inscribed in the Phœnician language and writing. It defines in formal terms the priestly dues in money and portions of the victim, for every kind of sacrifice. The technical terms are much the same as those employed in the Mosaic Law. The tablet mentions the **Peace-offering** (shèlem), the Whole-offering (khālîl), and the **Meat-offering** (minchath); thus constituting an excellent commentary on the laws of sacrifice in the **Book of Leviticus**. It originally belonged to "the House of Baal (Zephon)" at Carthage, and was found at Marseilles in 1844–5 (see CIS. Pars. I. Tom. I. Fasc. 3). It may be assigned to the fourth or perhaps the fifth century B.C.

With the above inscription it will be instructive to compare a similar one, found by Nathan Davis in 1858, on the site of Carthage, and now in the British Museum. It will be noticed that in this second Table of

MARSEILLES TABLET OF OFFERINGS.

Sacrificial Dues the skins or fells of the victims are given to the Priests, as in Lev. 7. 8, instead of a fixed sum of money in each case.

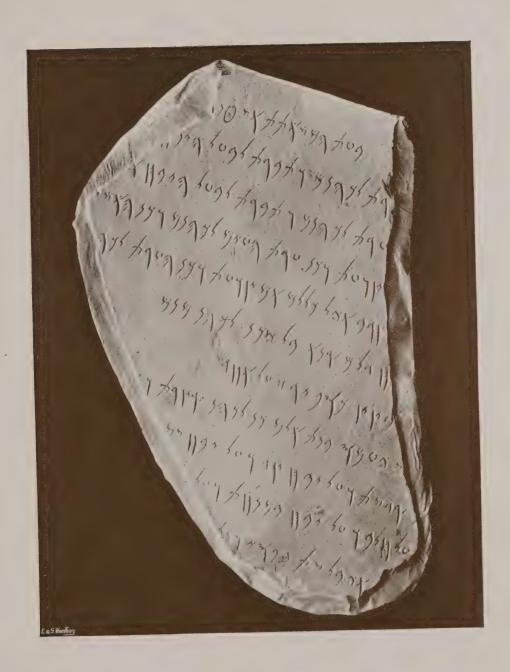

Portions of eleven lines remain, mostly broken off at both ends; but the general conformity of the inscription with the Marseilles Tablet is so close, that it may be partially restored from that source. (See CIS. 167.) The Translation is as follows:—

Notes to the Marseilles Inscription.—Line 1. The Tablet gives the Sacrificial Regulations for a particular temple, viz., that of **Baal-Zephon** (or some other **Baal**) at Carthage. These were naturally adopted in the corresponding temple at the Phænician settlement of Marseilles (Greek Massalia; from Phænician Mazzāl — Assyrian manzaltu, māzaltu, "station," "dwelling-place").

Zephon (Exod. 14. 2) is a probable restoration, both from the remains of the letters on the stone, and from the occurrence of the name עברצפן, Obed-Zephon or Abdi-Zephon, "servant of Zephon," in Punic inscriptions.

The close resemblance of the language of this Tablet to that of the Old Testament is evident from the outset. Baal's temple is his "house" (Judg. 9. 46; 16. 23; 1 Kings 16. 32, &c.); the "taxes" or contributions due to the priests are called nas'athôth, "gifts"—a plural of the very term used in the Hebrew of 2 Chron. 24. 6, 9, for the Temple-tax (A.V. "collection"); they are fixed by "the men who were over the taxes" (cf. 1 Kings 4. 6; 12. 18). Further, Carthage is governed, like

THE DAVIS PHŒNICIAN INSCRIPTION.

[Brit. Mus. Davis No. 90.]

Israel of old, by two "judges" (Phœnician and Hebrew, ששמשל, shôfetîm, whence Livy's Sūfĕtēs), assisted by various Boards or Committees, and a Senate, which is perhaps denoted in this Tablet by the term rendered "Associates" or "Colleagues" (בורנם); cf. the הבר "Association," of the Jews on the Maccabean coins). The names of these supreme magistrates have a Biblical cast: Halazbaal, "Baal delivereth," is like Helez (2 Sam. 23. 26) for Halaziah, "Jah delivereth"; Bod-Tanith and Bod-Eshmun, "servant of the goddess Tanith" and "servant of the god Eshmun," recall such names as Obadiah, Abdiel, Obed-Edom, etc.

Line 3. The inscription enumerates all the objects of sacrifice, viz., large and small cattle, birds, and the fruits of the soil, in very much the same order as Lev. 1—7; first, the Bloody, and then the Unbloody Offerings, the latter being called מלוחלה, as in Hebrew. And it is clear that the לכלים, kālîl, "whole-offering" or holocaust, answers to the Heb. לבלים, 'ôlā'h, A.V." burnt-offering" (cf. the use of kālîl in the Hebrew of I Sam. 7. 9; Deut. 13. 17; Ps. 51. 19; Lev. 6. 22, 23 = 15, 16 Heb., "wholly burnt"). The ṣaw'at (צועה) as clearly answers to the Levitical שלמים, zèbach shelāmîm (Lev. 3. 6), A.V. "peace-offering"; so that we have here the two chief forms of Bloody Sacrifice, both of which are prescribed in Exod. 20. 24.

The Phœnician term אועה, saw'at, may be compared with the Ethiopic root $\Lambda \Phi O$: sawi'a, "to call," "invite," e.g. to a sacrifice (I Sam. 16. 3, Ethiopic Version), and may accordingly denote a sacrifice to which guests are invited, as distinguished from a holocaust. Otherwise, as Munk thought, the Phœnician word may be connected with the Ethiopic maswā't, "sacrifice," although the sounds correspond less perfectly.

The שלם כליל, shèlem kālîl, "Peace-offering of (i.e. belonging to) a Whole-offering," probably denotes a secondary sacrifice, which at Carthage may have been the usual accompaniment of the Whole-offering or holocaust; cf. line II, and see W. Robertson Smith, Rel. Sem. 2 page 237, note.

Line 4. "Neck and shoulders." The breast and the right shoulder (or thigh) belonged to the priest in Jewish law (Lev. 7. 31, 32). The meaning of the Phænician expressions is uncertain. The editors of CIS. render prosecta et augmenta; assuming a correspondence between Phænician and Roman sacrificial usage. The Phænician term אָבְּרֶר, q-ṣ-r-t, has the same radical letters as the Arabic qaṣar, "necks." But it has also been compared with quṣra, "short rib"; and we might even suppose a relation to qutr, "side," which is used in the plural for the prominent parts of a horse, such as the withers and rump.

The other Phœnician term, יצלא, y-ṣ-l-t, resembles the Syriac yaṣṣilâ, "elbow" (Ecclus. 9. 9; Ezek. 13. 18); cf. also Arabic wuṣl, "joint," "limb."

The term שלבם, sh-l-b-m, is equally obscure. It is hardly akin to Arab. sulb (sulub, salab), which means "backbone," "loins." Shelabbîm (in the parallel inscription, Davis, No. 90, 'eshlabbîm) may perhaps be compared with Assyr. shelabbî, "worm" or "maggot," and so denote the intestines as vermiform; or it may be connected with lēbā'b, Assyr. libbi, in the sense of what is inside, τὰ ἔντερα. Possibly also it means the ribs, as being cross-pieces; cf. the use of the word in Hebrew, I Kings 7. 28.

Line 5. The puzzling expression אטמטאב was ingeniously supposed by Rénan and the other editors of CIS. to cover a loan from the Greek (ἀτόμητος = ἄτμητος); but the presence of the is against this. I can only suggest that the phrase is compounded of 'N, "not," and a term derived from the same root as the Talmudic מממול של which denotes an animal whose sex is not apparent (from מממול ולמט (בשמול בשמול). "to close up," "shut in"); so that אממול = שממול (בשמול בשמול). We might also divide thus: אממול בשמול בשמול בשמול בשמול בשמול וממן phrase descriptive of the calf.

Line 7. Some take ג'ב' as "ram," instead of "he-goat," and point in line 5 as ''x, "hart." But the he-goat, so frequent in Leviticus, is not likely to be wanting here. Besides, whereas the ram is often represented on votive cippi from Carthage, the stag never is.

The term $z\hat{e}r$ or $z\hat{i}r$, which seems related to the Hebrew $z\hat{e}r$, "ring," "circular moulding," reminds one of the gold and silver ring-money of ancient Egypt, and may have denoted the same sort of thing, considering the long-established intercourse between Phænicia and the Delta.

Line 9. The phrase ארב איל has caused much perplexity. As the line starts with lamb and kid, a third young animal might be expected; and as in Arabic zarb is "a cote for lambs and kids," we might, perhaps, take ṣ-r-b 'ayil to mean "a coteling, viz. a ram," i.e. a young ram. But as Arabic ṣaraba is found in the sense of ṣarama, "to cut," ṣ-r-b 'ayil is possibly "a wether ram," which is ranged with lambs and kids, as being of less value than an entire animal (line 5. Notice the smaller money-tax).

Line II. The words אנן אם צין have been rendered "tame or wild." In connexion with the sacrifice of birds, however, it seems natural to refer to Lev. I. 14 and 12. 6, 8; and when we find that the "young pigeon" $(gôz\bar{a}'l)$ of Gen. 15. 9 is actually rendered "in the Samaritan Targum, it appears likely that 'agnā'n (or 'agnôn) may be a Phœnician term for turtledove, derived from a root אום אונם אונם אונם באמן". Assyr. 'agâmu, "to be sad": or perhaps 'agan = 'anag = 'anach, 'anan, 'anah,

"to sigh," "mourn," Assyr. 'anâchu, "to sigh." To "mourn like a dove" is a common phrase in Babylonian poetry (cf. Isa. 38. 14; 59. 11).

Of the two new kinds of sacrifice here mentioned, אשר, Sh-ṣ-ph, and אוֹה, Ch-z-th, the former may be connected with Heb. "ששר," outpouring" (of wrath), Isa. 54. 8, and the Assyr. shiṣpu or shizbu, "milk" (that which overflows). This rare root is apparently cognate with that of ששר, "overflow" (Prov. 27. 4). The latter word, אוֹה, may be akin to אוֹה, chāzûth, "agreement" (Isa. 28. 18): see Gen. 15 for the description of a Covenant-sacrifice.

Line 12. The original text begins: "For birds, whether hallowed firstfruits," etc.; but as the words italicised are wanting in the parallel inscription (Davis, No. 90, line 9), it is probable that they should be regarded as due to the scribe's, or rather the sculptor's, inadvertence here. It may be, however, that the term for birds has taken the place of a general word for the various kinds of bloodless offerings which follow.

Line 14. The expression and for milk is written twice in the original; another inadvertence on the part of the engraver of the stone, who need not be supposed to have been a priest, or especially familiar with the sacred laws. To point the repeated letters so as to get the sense and for fat is against the general subject of the line, which deals with Unbloody Sacrifice.

Line 15. The term \(\text{\text{C}}\), m-n-m, "nothing," supplied at the end of the line from the parallel inscription, I would compare with the Assyrian manama, "any one" (usually with negative, "no one").

Line 16. CIS. translates: Omnis indigena et omnis incola et omnis parasitus deorum; but ששם can hardly mean incola, and מרוֹח אלם (cf. Amos 6.7; Jer. 16.5) is strange in the sense of parasitus deorum. As אוֹן is used of the breaking out of leprosy on a man (2 Chron. 26. 19), and as ששם (= ששם) may bear a similar meaning (Isa. 3. 17: "smite with a scab"), while שלה אלהים —note the paronomasia with אלום —in such a connexion recalls שלה אלהים (Isa. 53. 4), and may be compared with Arab. razaha, "to fall down through weakness or emaciation" (also "to thrust through with a spear"); it would seem that we have to do here with the special case of sacrificers who are ceremonially unclean. Cf. Meier and Schröder; and see Lev. 13—14.

Lines 17, 18. The "writing" or "book" which "the men who were over the taxes wrote," is evidently the Carthaginian source from which the laws of this Tablet were compiled for the benefit of the settlers of Marseilles.

Line 20. There is no root [77] in Semitic (including Assyrian); must therefore be the preposition, and the expression bedîs or bedês may be taken to mean "in deviation from" . . . cf. Arab. dâşa, "to turn aside or deviate from the right road."

Line 21. I have filled up the gap in the middle of the line thus: כערכת על ביקב ע]. If it were not that את precedes, שווי might be suggested (cf. Lev. 27. 12, 17).

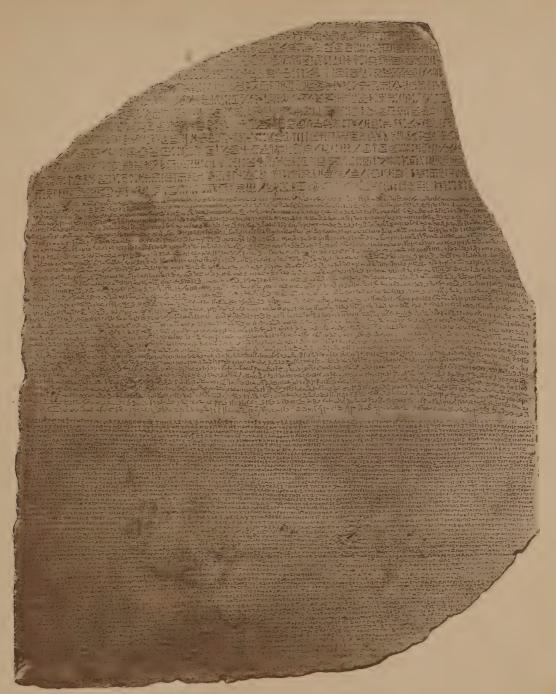

Notes to the Parallel Inscription, Davis No. 90.—Line 2. The term תברת, t-b-r-t, is of doubtful origin and meaning. As denoting the portions of the victim which were assigned to the man who brought it for sacrifice, viz., according to the preceding Tablet, the inwards and the feet and certain other parts, the word may perhaps be connected with the root קבר, Arab. habara, "to cut up flesh into great pieces," "to cut off a piece of flesh"; or possibly the root may be seen in Arab. bara, "to cut out "(a reed pen, an arrow, a bow, etc.).

Line 8. The spelling, בנת b-n-t שנת, p-n-t, "before," of the Marseilles Tablet, line 13, probably represents a difference of dialect. It reminds one of the Babylonian bunu for punu, "face."

BRONZE FIGURE OF EGYPTIAN GODDESS.

Eyre & Spottiswoode.]

The Rosetta Stone.

(Circ. B.C. 198-195.)

A STELE of black basalt, on which is inscribed a decree of the priests of Memphis (Noph) in honour of Ptolemy V. (Epiphanes), king of Egypt. It was discovered by a French officer named Boussard, in an old fort which the French called Fort St. Julien, four miles N. of Rosetta, in 1799, and after the surrender of Alexandria in 1801 became the property of the British Museum.

This bilingual inscription in the Old Egyptian and Greek languages is written (I) in hieroglyphics, the uncontracted pictorial character which was the original form of Egyptian writing; (2) in demotic, a running hand or cursive, the ordinary handwriting of the closing centuries B.C.*; and (3) in the Greek uncial, † i.e. large characters, to be understood by all

Cf. Isa. 8. 11 & 30. 8; Hab. 2. 2.

classes. It was from this inscription, principally by the labours of M. Champollion, that the key was obtained to the reading of the Egyptian hieroglyphics. The Greek

text was naturally assumed to be a translation of the Egyptian. Thus it was found that wherever the royal names occurred in the Greek, there were corresponding groups enclosed in ovals or *cartouches* in the hieroglyphics. By a comparison of these groups some of the characters of the hieroglyphic alphabet were ascertained. Finally, words thus deciphered were found to be closely akin to Coptic, a language now generally recognized as a daughter of the ancient Egyptian.

IMPRESSION OF A SMALL EGYPTIAN SEAL

Of glazed pottery, inscribed with the throne-names of Usertesen II. (Kha-kheper-Ra) and Amen-emhat III. (Maāt-en-Ra), of the 12th Dynasty. Interesting for the ancient forms of the hieroglyphs, and because the shape of the seal—a bored cylinder—indicates Babylonian influence. (From Mr. Ball's collection.)

^{*} For the hieratic, from which the demotic was developed, see page 107.

^{† &}quot;Uncial," from Lat. uncia, an inch; as though an inch long.

The Bilingual Inscription of Canopus.

(B.C. 238.)

The Bilingual Inscription of Canopus, preserved in the Gizeh Museum, is an official document of the time of Ptolemy III., Euergetes, king of Egypt. It is engraved in thirty-seven lines of Egyptian hieroglyphics and seventy-six lines of uncial Greek characters on a block of hard fine-grained limestone, seven feet high by two-and-a-half broad, found by Professor Lepsius, in the year 1866, in the ruins of Zoan, the ancient Tanis. The demotic text, which is in seventy-four lines, occupies the right-hand edge of the slab. It relates to certain divine honours decreed for the king and his sister-consort Berenice, and for the deceased princess Berenice their daughter. The inscription is entire in both languages; a fact which gives it the advantage over that of the Rosetta Stone, which is unfortunately imperfect. The opening lines specify the exact date:—

"Year IX. (month) Apellaeus, day 7, (month) Tybi, day 17, of the Egyptians, under the Majesty of the King of Upper and Lower Egypt, Ptolemy, the Ever-living, Beloved of Ptah, Son of Ptolemy (and) Arsinoë, the Divine Adelphoi; Apollonides son of Moschion being Priest of Alexander the Justified, and of the Divine Adelphoi, and of the Divine Euergetai; Menecrateia daughter of Philammon being the Canephoros before Arsinoë Philadelphos; on this day a Decree (was made)."

This opening reminds us very much of Luke 3. 1, 2. The date is equivalent to March 7, B.C. 238. A version of the inscription, which is too long for translation here, may be seen in Das bilingue Dekret von Kanopus, by Lepsius, Berlin, 1866. The closing lines are as follows:—

"That this Decree be written by the Arch-priests of the Temples, and the Overseers of the Sanctuaries, and the Scribes of the House of God, graven on a Stele of stone or bronze, in Hieroglyphics, the Writing of the Books, and the Writing of the Ha-nebu (Greeks); and that it be set up in the Assembly-hall in Temples of the First Class, Temples of the Second Class, (and) Temples of the Third Class, in order to apprize all men of the honour done by the Priests of the Temples of Egypt to the Divine Euergetai and their children, according to right."
